IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean the contaminated area on the product surface with a soft, dry cloth or a damp cloth.
   (Do not use a detergent or cosmetic products that contain alcohol, solvents or surfactants or oil constituents
   as they may deform or cause damage to the product.)
7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. This product is intended to be supplied by a Listed Power Supply Unit marked “Class 2” or “LPS” and rated from / PoE, 0.6A. (PNM-9000VQ)
16. This Lens module has to be connected with equipment, which supplied by a power supply unit marked “Class 2” or “LPS”. (SLA-2M2400Q/2M2800Q/2M3600Q/2M6000Q/5M3700Q/5M4600Q/5M7000Q)
17. If you use excessive force when installing the product, the camera may be damaged and malfunction.
   If you forcibly install the product using non-compliant tools, the product may be damaged.
18. Do not install the product in a place where chemical substances or oil mist exists or may be generated. As edible oils such as soybean oil may damage or warp the product, do not install the product in the kitchen or near the kitchen table.
   This may cause damage to the product.
19. When installing the product, be careful not to allow the surface of the product to be stained with chemical substance.
   Some chemical solvents such as cleaner or adhesives may cause serious damage to the product’s surface.
20. If you install/disassemble the product in a manner that has not been recommended, the production functions/ performance may not be guaranteed.
   Install the product by referring to “Installation & connection” in the user manual.
21. Installing or using the product in water can cause serious damage to the product.

WARNING
TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE. DO NOT INSERT ANY METALLIC OBJECT THROUGH THE VENTILATION GRILLS OR OTHER OPENINGS ON THE EQUIPMENT.

Apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.

To prevent injury, this apparatus must be securely attached to the Wall/ceiling in accordance with the installation instructions.

CAUTION

EXPLANATION OF GRAPHICAL SYMBOLS

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.
Class I construction
An apparatus with CLASS I construction shall be connected to a MAINS socket outlet with a protective earthing connection.

Battery
Batteries (battery pack or batteries installed) shall not be exposed to excessive heat such as sunshine, fire or the like.

Disconnection Device
Disconnect the main plug from the apparatus, if it’s defected. And please call a repair man in your location.

When used outside of the U.S., it may be used HAR code with fittings of an approved agency is employed.

CAUTION
RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

ATTENTION
IL Y A RISQUE D’EXPLOSION SI LA BATTERIE EST REMPLACÉE PAR UNE BATTERIE DE TYPE INCORRECT.
METTRE AU REBUT LES BATTERIES USAGÉES CONFORMÉMENT AUX INSTRUCTIONS.

These servicing instructions are for use by qualified service personnel only.
To reduce the risk of electric shock do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.

The CVBS out terminal of the product is provided for easier installation, and is not recommended for monitoring purposes.

Please use the input power with just one camera and other devices must not be connected.

The ITE is to be connected only to PoE networks without routing to the outside plant.
The wired LAN hub providing power over the Ethernet (PoE) in accordance with IEEE 802-3af shall be a UL Listed device with the output evaluated as a Limited Power Source as defined in UL60950-1.

Unit is intended for installation in a Network Environment 0 as defined in IEC TR 62102. As such, associated Ethernet wiring shall be limited to inside the building.

Please read the following recommended safety precautions carefully.
• Do not place this apparatus on an uneven surface.
• Do not install on a surface where it is exposed to direct sunlight, near heating equipment or heavy cold area.
• Do not place this apparatus near conductive material.
• Do not attempt to service this apparatus yourself.
• Do not place a glass of water on the product.
• Do not install near any magnetic sources.
• Do not block any ventilation openings.
• Do not place heavy items on the product.
• Please wear protective gloves when installing/removing the camera.
The high temperature of the product surface may cause a burn.

User’s Manual is a guidance book for how to use the products.
The meaning of the symbols are shown below.
• Reference : In case of providing information for helping of product’s usages
• Notice : If there’s any possibility to occur any damages for the goods and human caused by not following the instruction
※ Please read this manual for the safety before using of goods and keep it in the safe place.
PRODUCT FEATURES

• Lens options according to focal length
  You can select the lens you want and attach it to the camera.

• 4-way Camera
  Each of the four camera lenses monitors a different direction.

• Dustproof/Waterproof
  The dust-resistant/water-resistant design protects the product from rain and dust when installed outdoors.
  (IP66)

• Multi-Streaming
  This network camera can display videos in different resolutions and qualities simultaneously using different
  CODECs.

• Web Browser-based Monitoring
  Using the Internet web browser to display the image in a local network environment.

• Alarm
  When an event occurs, related videos are sent to the user’s registered e-mail and FTP server or stored on the Micro
  SD memory card.

• Tampering Detection
  Detects tempering attempts on video monitoring.

• Defocus detection function
  Detects the defocus phenomenon of the camera lens.

• Motion Detection
  Detects motion from the camera’s video input.

• Fog detection
  Detects fog that is heavier than the detection level.

• Face Detection
  Detects faces in the specified area from the camera’s video input.

• IVA (Intelligent Video Analysis) function
  Detects a motion or situation that meets the configured event rules.

• ONVIF Compliance
  This product supports ONVIF Profile S.
  For more information, refer to www.onvif.org.

RECOMMENDED PC SPECIFICATIONS

• CPU: Intel(R) Core(TM) i7 3.4 GHz or higher
• Supported OS: MS Windows, Mac OS X
• Plug-in free web viewer
  Supported web browsers: Google Chrome, MS Edge, Mozilla Firefox (Windows 64bit only), Apple Safari (Mac
  OS X only)
※ Please see the appendix for detailed information on verified OS and browsers.
  Some functions may be restricted even in supported browsers.

RECOMMENDED MICRO SD/SDHC/SDXC MEMORY CARD SPECIFICATIONS

• Recommended capacity: 16GB to 256GB (MLC type)
• The following types of memory cards from the following manufacturers are recommended for this camera.
  - Manufacturer: SanDisk, Transcend
  - Product family: High endurance
• It is recommended to use a memory card of 16GB or more that conforms to the UHS-3 class (MLC type)
  specification.
WHAT’S INCLUDED (PNM-9000VQ)

Please check if your camera and accessories are all included in the product package. (As for each sales country, accessories are not the same.)

### AT A GLANCE (PNM-9000VQ)

**Appearance**

- **1** Dome cover: Case cover used to protect the lens and the main unit.
- **2** Camera Case: Housing part that covers the camera body.
Components

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| 1    | Power On/Off switch  
Switch used to turn the product On/off.  
Use it only to replace your lens module. |
| 2    | DIP switch for changing the channel  
Change the DIP switches to specify the channel you want to use to view the installation video. |
| 3    | Test Monitor Out  
Output port for test monitoring the video output. Use the test monitor cable to connect to a mobile display and check the test video. |
| 4    | Lens module indication light (normal: green, abnormal: red)  
If the lens module is attached correctly, the green LED will illuminate and then turn off after approximately 40 seconds. (to prevent undesirable reflections) |
| 5    | Micro SD Memory Card Compartment  
Compartment for the Micro SD memory card. |
| 6    | Reset Button  
The button restores all camera settings to the factory default.  
Press and hold for about 5 seconds to reboot the system.  
If you reset the camera, the network settings will be adjusted so that DHCP can be enabled. If there is no DHCP server in the network, you must run the IP Installer program to change the basic network settings such as IP address, Subnet mask, Gateway, etc., before you can connect to the network. |
| 7    | Lens module mounting portion  
This is the terminal to mount the lens module. |
| 8    | PoE+ Connection Terminal  
The terminal connects power and network through the PoE+ cable. |

AT A GLANCE (LEN S MODULE)

Appearance

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
</table>
| 1    | Lens module  
This is a lens module that records video. |
| 2    | Camera connector  
This is a terminal to connect with the camera. |
This camera is waterproof and in compliance with the IP66 spec, but the jack connected to the external cable is not. You are recommended to install this product below the edge of eaves to prevent the cable from being externally exposed.

Precautions before installation
Ensure you read out the following instructions before installing the camera:
• Select an installation site that can hold at least 5 times the camera’s weight.
• Stuck-in or peeled-off cables can cause damage to the product or a fire.
• For safety purposes, keep anyone else away from the installation site. And put aside personal belongings from the site, just in case.
• If the product is installed with excessive force, it may cause damage to the camera due to malfunction. Forcing assembly using non-compliant tools may damage the product.
• Do not remove the lens module while the power is on.

Disassembling
1. Remove the dome cover by loosening the fastening bolt of the dome cover. This can be done by turning it counterclockwise using the Allen key or drill bit provided.
2. Loosen the fastening screw on the camera body.
3. Remove the camera body and mounting plate by pulling the plate spring, as shown in the figure.

Inserting a Micro SD Memory Card
1. Remove the dome cover of the camera.
2. Insert a Micro SD card in the arrow direction shown in the figure.

- Disconnect the power cable from the camera before inserting the Micro SD memory card.
- Do not forcefully insert it in the reverse direction. It might damage your Micro SD memory card and your product.
- When it rains or the humidity is high, insertion or ejection of a Micro SD card is not recommended.
- Disassembly of the product cover should be finished within 5 minutes, or there will be the risk of internal dew condensation.
Removing a Micro SD Memory Card
Gently press down on the exposed end of the memory card as shown in the diagram to eject the memory card from the slot.

- You should save an SD card for each channel.
- Please note that if you firmly push and release the Micro SD memory card when it is ejected, it may pop out.
- Before removing the Micro SD memory card, in <Storage>, set the device to <Off> and press the [Apply] button and turn the camera off.
- If you turn off the camera or remove the Micro SD memory card that contains data from the product, the data may be lost or damaged.

Mounting lens module
1. Align and fasten the connector of the lens module with the connector of the camera body.
   - Install the lens module while power is not connected (PoE+).
   - Check if the power switch is “OFF” before installing the lens module.
   - You are recommended to avoid touching the lens separately, as it is shipped from the factory with the focus adjusted during the manufacturing inspection.

2. Complete the lens mounting process.
3. Connect power to the product (PoE+).
   - If you want to replace the lens module while connecting power to the product (PoE+), turn the power switch “OFF”, replace the lens module, and then turn the power switch “ON”.
   - Be careful not to use any tool with a sharp point when handling the switch since it might be damaged.
   - Be careful not to forcefully handle the switch since it might be damaged.
How to install using the perpendicular falling method
You can move the lens for only one channel to see the video after installing it in the direct-lit manner. In this case, the lens direction of the moved channel can be tilted up to 90 degrees.

1. Tilt the lens module part forward-facing and then pull it.
2. Align the groove with the center of the rotating part.
3. Lift the part with diagonal lines to release the frame pan.
4. Move the three channel lenses along the bottom rail.

How to install using the tilting method
You can move the lenses of CH1 - CH4 along the bottom rail to view videos by installing them using the tilting method. In this case, the orientation of the lens cannot be tilted by 90 degrees.

1. Mount the frame pan.
2. Remove the direct-lit lens from the rotation center.
3. Move the four channel lenses along the bottom rail.
Installation on a ceiling or wall

1. Use the provided template to drill holes for installation (diameter 6 mm and minimum depth 45 mm) and insert the supplied plastic anchors to the end.

2. Align the holes of the mount plate for installation with the holes inserted with plastic anchors, and fasten the tapping screws.

3. Connect the safety cable.

4. Mount the camera body to the mount plate.
   - Mount it to fit the hinges as shown in the image.

5. Connect the terminal inside camera with the required cable.
   - If the lens module is not attached correctly, the lens module status light will illuminate red, as shown in the figure. If this occurs, turn off the power switch and reattach the lens module. If attached normally, it will illuminate green and then turn off after approximately 40 seconds.

6. Push in the pin spring.

7. Adjust the lens to the desired direction by referring to “Adjusting the monitoring direction for the camera”. (Page 17)
   - If you tilt the lens, you may need to adjust the lens as this may block the screen.

8. Assemble the dome cover.
   - Align the arrows when assembling the dome cover.
   - To ensure there are no issues with waterproofing, tighten the fastening bolts tightly using the Allen key or drill bit.
Attaching to the unbundled adapter

Choose and purchase a necessary one of the following options (unbundled) that is suitable to the installation site or for your convenience.

1. Install the hanging mount to the wall mount adapter.
   - Wall mount adapters and hanging mounts are sold separately.

2. Connect the mounting plate and the hanging mount.

3. Connect the safety cable.

4. Mount the camera body to the mount plate.
   - Mount it to fit the hinges as shown in the image.

5. Connect the terminal inside camera with the required cable.

6. Push in the pin spring.

7. Adjust the lens to the desired direction by referring to “Adjusting the monitoring direction for the camera”. (Page 17)
   - If you tilt the lens, you may need to adjust the lens as this may block the screen.

8. Assemble the dome cover.
   - Align the arrows when assembling the dome cover.
   - To ensure there are no issues with waterproofing, tighten the fastening bolts tightly using the Allen key or drill bit.
Method 1. Connecting the LAN cable

1. Remove the dome cover and the case.
2. Pull out the long projected part of the rubber plug on the bottom and remove it as shown in the figure.
   - Use an appropriate cable bush for the LAN cable to be connected.
     - Basic camera: Use the cable with a diameter of Ø5~6.5.
     - Components provided: Use the cable with a diameter of Ø7~8.5.
3. Insert the LAN cable through the hole appeared after removing the projected part in step 2 above.
4. Remove the sheath with a cable cutter, and align the cables.
5. Connect the LAN cable with a LAN connector, and insert it into the LAN tool.
6. Connect the finished cable to the Ethernet port.

Method 2. Connecting the LAN cable

1. Remove the dome cover and the case.
2. Pull out the long projected part of the rubber plug on the bottom and remove it as shown in the figure.
3. Pull the rubber cover over the hole to remove it.
4. Use the Cap Installer to allow the RJ45 cable to pass through.
5. Insert the rubber stopper again and connect the LAN cable to the Ethernet terminal.
How to set up channels to monitor for installation

The camera body has a channel DIP switch, as shown in the figure. You can change the channel of the camera using the channel DIP switches.

<table>
<thead>

</tbody>
</table>

- If a DIP switch is not fully On/Off, the product may malfunction. After installation, check the DIP switches at the back.
- Be careful, as you will risk damaging a DIP switch if you manipulate it using a sharp tool.
- Be careful, as a DIP switch may be damaged if you operate it with excessive force.

Outdoor installation

When you install it outside of the building, please waterproof it with waterproof butyl rubber tape (can be purchased in stores) so that water does not leak from the gap of the cable connected to the outside.

1. Connect the PoE cable.
2. Wrap the black cable jacket (Area A) and the cable connection area with waterproof (butyl rubber) tape so that more than half of the butyl rubber tape is overlapped.

- If the cable jacket is not waterproofed properly, then it can directly cause leakage. Make sure to protect the cable with a dense layer of taping.
- Waterproof butyl tape is made of butyl rubber that can be stretched to twice its normal length.

Optional Accessories for Installation

For your easier installation, you can purchase appropriate optional accessories available.

1. WALL MOUNT ADAPTOR (SBP-300WM / SBP-300WM1) / HANGING MOUNT (SBP-276HM)
   - This adaptor is used when installing the dome camera onto a wall.

2. CEILING MOUNT ADAPTOR (SBP-300CM) / HANGING MOUNT (SBP-276HM)
   - This adaptor is used when installing the dome camera on a concrete ceiling.

3. The POLE MOUNT ADAPTOR (SBP-300PM) is the adapter to be used when installing the WALL MOUNT ADAPTOR (SBP-300WM or SBP-300WM1) on an 80mm or larger column.

4. CORNER MOUNT ADAPTOR (SBP-300KM)
   - This is an adaptor for WALL MOUNT ADAPTOR (SBP-300WM or SBP-300WM1) installation on the corner of wall joint.
Adjusting the monitoring direction for the camera

- Adjusting the monitoring direction
  
  You can adjust the camera direction only when the camera is fixed on the ceiling.
  
  The act of moving the camera module is called “Pan”; adjusting its angle “Tilt”; rotating the lens along the axis “Rotate”.
  
  - The rotation angle of Pan is -90° to +90° for each module.
  
  - The rotation angle of Rotation is -180° to +180°.
  
  - The rotation angle of Tilt varies for each lens. See the detailed specs. (Page 27)

  ! The image can be covered up by the camera case depending on the angle.
  
  ! Do not pan over the specified rotation angle. It might damage the cable leading to a product malfunction.

- Methods of adjustment

  1. After installing the camera in consideration of the direction to monitor, adjust the Pan angle along the bottom rail.
  
  2. Adjust the horizontal angle so that the image does not appear to be reversed during rotation.
  
  3. Adjust the tilt angle so that it points in the direction to be monitored.

CONNECTING WITH OTHER DEVICE

- The CVBS out terminal of the product is provided for easier installation, and is not recommended for monitoring purposes.

Powering and networking

Connect the PoE+ device with the PoE terminal of the camera.

! Connect and use a PoE+ enabled router.

! Use a PoE+ device that complies with the IEEE802.3at standard.

network connection and setup

You can set up the network settings according to your network configurations.

CONNECTING THE CAMERA DIRECTLY TO LOCAL AREA NETWORKING

Connecting to the camera from a local PC in the LAN

1. Launch an Internet browser on the local PC.
2. Enter the IP address of the camera in the address bar of the browser.

CONNECTING THE CAMERA DIRECTLY TO A DHCP BASED DSL/CABLE MODEM

1. Connect the user PC directly with the network camera.
2. Run the IP Installer and change the IP address of the camera so that you can use the web browser on your desktop to connect to the Internet.
3. Use the Internet browser to connect to the web viewer.
6. Move to [Basic] – [IP & Port], and set the IP type to [DHCP].
7. Connect the camera, which was removed from your PC, directly to the modem.
8. Restart the camera.

- A remote PC in an external Internet out of the LAN network may not be able to connect to the camera installed in the intranet if the port-forwarding is not properly set or a firewall is set.
- In this case, to resolve the problem, contact your network administrator.
- In the IP installer, you can use the initial password, "4321" to set IP Address, Subnet Mask, Gateway, HTTP Port, VNP Port, IP type. After changing the network interface, for better security, access the web viewer and change the password.
- By factory default, the IP address will be assigned from the DHCP server automatically.
- If there is no DHCP server available, the IP address will be set to 192.168.1.100.
- To change the IP address, use the IP Installer.
- For further details on IP Installer use, refer to "Static IP Setup". (Page 19)

### STATIC IP SETUP

**Manual Network Setup**

Run `<IP Installer_v2.XX.exe>` to display the camera search list. At the initial startup, both [Auto Set] and [Manual Set] will be grayed out.

- For cameras found with the IPv6 setting, these buttons will be grayed out as the cameras do not support this function.

1. Select a camera in the search list.
   - Check the MAC address of the camera on the camera’s label.
   - Both [Auto Set] and [Manual Set] buttons will be activated.

2. Click [Manual Set].
   - The Manual Setting dialog appears.
   - `<IP Address>`, `<Subnet Mask>`, `<Gateway>`, `<HTTP Port>`, and `<VNP Port>` of the camera are displayed in the preset values.

3. In the `<Address>` pane, provide the necessary information.
   - **MAC (Ethernet) Address**: The MAC address imprinted on the camera label is automatically displayed and requires no user setting.
   - IP related parameters can be set only when DHCP is not checked.
If not using a Broadband Router

For setting <IP Address>, <Subnet Mask>, and <Gateway>, contact your network administrator.

4. In the <Port> pane, provide necessary information.
   - HTTP Port : Used to access the camera using the Internet browser, defaulted to 80.
   - VNP Port : Used to control the video signal transfer, defaulted to 4520.

5. Enter the password.
   Enter the password of “admin” account, which was used to access the camera.
   - For the security purposes, you are recommended to use a combination of numbers, alphabets uppercase and lowercase and special characters for your password.
   - For information on how to change the password, refer to the online help of Web Viewer.

6. Click [OK].
   Manual network setup will be completed.

If using a Broadband Router

- IP Address : Enter an address falling in the IP range provided by the Broadband Router.
  ex) 192.168.1.2~254, 192.168.0.2~254, 192.168.XXX.2~254
- Subnet Mask : The <Subnet Mask> of the Broadband Router will be the <Subnet Mask> of the camera.
- Gateway : The <Local IP Address> of the Broadband Router will be the <Gateway> of the camera.

  The settings may differ depending on the connected Broadband Router model.
  For more information, refer to the user manual of the applicable router.
  For more information about port forwarding of the broadband router, refer to “Port Range Forward (Port Mapping) Setup”.
  (Page 21)

If the Broadband Router has more than one camera connected

Configure the IP related settings and the Port related settings distinctly with each other.

<td></td>
<td></td>
</tr>
</tbody>
</table>

- If the <HTTP Port> is set other than 80, you must provide the <Port> number in the address bar of the Internet browser before you can access the camera.
  ex) http://IP address : HTTP Port
  http://192.168.1.100:8080

Auto Network Setup

Run <IP Installer_v2.XX.exe> to display the camera search list.

At the initial startup, both [Auto Set] and [Manual Set] will be grayed out.

1. Select a camera in the search list.
   Check the MAC address of the camera on the camera's label.
   Both the [Auto Set] and [Manual Set] buttons will be activated.

2. Click [Auto Set].
   The Auto Setting dialog appears.
   The <IP Address>, <Subnet Mask>, and <Gateway> will be set automatically.

3. Enter the password.
   Enter the password of “admin” account, which was used to access the camera.
   - For the security purposes, you are recommended to use a combination of numbers, alphabets uppercase and lowercase and special characters for your password.
   - For information on how to change the password, refer to the online help of Web Viewer.

4. Click [OK].
   Auto network setup will be completed.
DYNAMIC IP SETUP

Dynamic IP Environment Setup
• Example of the Dynamic IP environment
  - If a Broadband Router, with cameras connected, is assigned an IP address by the DHCP server
  - If connecting the camera directly to modem using the DHCP protocols
  - If IPs are assigned by the internal DHCP server via the LAN

Checking the Dynamic IP
1. Run the IP Installer on the user’s local computer. Cameras allocated with <Dynamic IP> address are shown in the list.
2. Select a camera from the search result.
3. Click the [Manual Set] button and check the camera’s <Dynamic IP> address. If you uncheck <DHCP>, you can change IP to <Static>.

PORT RANGE FORWARD (PORT MAPPING) SETUP

If you have installed a Broadband Router with a camera connected, you must set the port range forwarding on the Broadband Router so that a remote PC can access the camera in it.

Manual Port Range Forwarding
1. From the Setup menu of the Broadband Router, select <Applications & Gaming> - <Port Range Forward>. For setting the port range forward for a third-party Broadband Router, refer to the user guide of that Broadband Router.
2. Select <TCP> and <UDP Port> for each connected camera to the Broadband Router. The number of each port to be configured to the IP router should be set according to the port number designated in <Setup> - <Basic> - <IP & Port> on the camera web viewer.

3. When done, click [Save Settings]. Your settings will be saved.

- Above sample instructions are based on the CISCO’s Broadband Router.
- The settings may differ depending on the connected Broadband Router model. For more information, refer to the user manual of the applicable router.

Setting up Port Range Forward for several network cameras
• You can set a rule of Port Forwarding on the Broadband Router device through its configuration web page.
• A user can change each port using the camera setting screen.
When Camera1 and Camera2 are connected to a router:

User Internet  Broadband Router

<table>
<thead>
<tr>
<th>Port Forwarding</th>
<th>Start</th>
<th>End</th>
<th>Protocol</th>
<th>IP Address</th>
</tr>
</thead>
<tbody>
<tr>
<td>Camera1 (192.168.1.100)</td>
<td>8080</td>
<td>8080</td>
<td>TCP/UDP</td>
<td>192.168.1.100</td>
</tr>
<tr>
<td>Camera2 (192.168.1.101)</td>
<td>4520</td>
<td>4521</td>
<td>TCP/UDP</td>
<td>192.168.1.101</td>
</tr>
</tbody>
</table>

- Port forwarding can be done without additional router setup if the router supports the UPnP (Universal Plug and Play) function. After connecting the network camera, select the checkbox from the menu <Quick connect> in <Wisenet DDNS> in "Settings >> Network >> DDNS".
CONNECTING TO THE CAMERA FROM A SHARED LOCAL PC

1. Run the IP Installer.
   It will scan for connected cameras and display them as a list.
2. Double-click a camera to access.
   The Internet browser starts and connects to the camera.

   Access to the camera can also be gained by typing the camera’s IP address in the address bar of the Internet browser.

CONNECTING TO THE CAMERA FROM A REMOTE PC VIA THE INTERNET

Since using the IP Installer on a remote computer that is not in the Broadband Router’s network cluster is not allowed, users can access cameras within a Broadband Router’s network by using the camera’s DDNS URL.

1. Before you can access a camera in the Broadband Router network, you should have set the port range forward for the Broadband Router.
2. From the remote PC, launch the Internet browser and type the DDNS URL address of the camera, or the IP address of the Broadband Router in the address bar.
   ex) http://ddns.hanwha-security.com/ID

   For information on how to register DDNS, refer to the network setup guide.
CONNECTING TO THE CAMERA

Normally, you would

1. Launch the Internet browser.
2. Type the IP address of the camera in the address bar.
   - IP address (IPv4) : 192.168.1.100 ➔ http://192.168.1.100

If the HTTP port is other than 80

1. Launch the Internet browser.
2. Type the IP address and HTTP port number of the camera in the address bar.

Using URL

1. Launch the Internet browser.
2. Type the DDNS URL of the camera in the address bar.
   - URL address : http://ddns.hanwha-security.com/ID
   - The login dialog should appear.

To check the DDNS address

If the camera is connected directly to a DHCP-based cable modem or DSL modem, the IP address will change each time it tries to connect to the ISP (the company you subscribed to). If this is the case, you will not be informed of the IP address changed by DDNS.

Once you register a dynamic IP-based device with the DDNS server, you can easily check the changed IP when you try to access the device.

To register your device to the <DDNS> server, visit http://ddns.hanwha-security.com and register your device first, and then set the Web Viewer’s <Network> - <DDNS> to <Wisenet DDNS>, as well as providing <Product ID> that had been used for DDNS registration.

Connecting via Bonjour

1. Run the client or operating system in support of the Bonjour protocol.
2. Click the camera name for search.
   - In the Mac operating system, click the camera name searched from the Bonjour tab of Safari.

The login window is displayed.

Connecting via UPnP

1. Run the client or operating system in support of the UPnP protocol.
2. Click the camera name for search.
   - In the Windows operating system, click the camera name searched from the network menu.

The login window is displayed.

Network connection is disabled in the LAN only environment.
PASSWORD SETTING

When you access the product for the first time, you must register the login password.

When the “Password change” window appears, enter the new password.

- For a new password with 8 to 9 digits, you must use at least 3 of the following: uppercase/lowercase letters, numbers and special characters. For a password with 10 to 15 digits, you must use at least 2 types of those mentioned.
- Special characters that are allowed: ~`!@#$%^*()_-+=|{}[].?/
- For higher security, you are not recommended to repeat the same characters or consecutive keyboard inputs for your passwords.
- If you lost your password, you can press the [RESET] button to initialize the product. So, don’t lose your password by using a memo pad or memorizing it.

LOGIN

Whenever you access the camera, the login window appears. Enter the User ID and password to access the camera.

1. Enter “admin” in the <User name> input box.
   The administrator ID, “admin”, is fixed and cannot be changed.
2. Enter the password in the <Password> input field.
3. Click [OK].
   If you have logged in successfully, you will see the Live Viewer screen.

- When you access the camera web viewer, pay special attention to the security by checking whether the image data is encrypted.

CAMERA WEB VIEWER SETUP

1. Click the [Setup ( ] icon.
2. The Settings window appears.
3. You can configure settings for the camera’s basic information, video, audio, network, event, analysis, and system over the network.
4. Click <Help ( )> to view detailed descriptions of each function.

- You will experience the best video quality if the screen size is 100%. Reducing the ratio may cut the image on the borders.

24. web viewer

### No video is displayed when accessing the plug-in free webviewer on Safari via HTTPS.

- On the authentication popup window prompted when initially accessing https, click "View Authentication Certificate" and select the "Always trust when connecting to the designated webviewer IP" check box.
- If the webviewer continues failing to display a video after you select "Next" on the message window below, press the command key + Q to exit the Safari browser, access again and follow the procedures stated above.

### I can't access the camera from a web browser.

- Check to make sure that the camera's Network settings are appropriate.<br>- Check to make sure that all network cables have been connected properly.<br>- If connected using DHCP, verify that the camera is able to acquire dynamic IP addresses without any problem.<br>- If the camera is connected to a Broadband Router, verify that port forwarding is properly configured.

### Viewer got disconnected during monitoring.

- Connected Viewers become disconnected upon any change to camera or network configurations.<br>- Check all network connections.

### The camera connected to the network is not detected in the IP installer program.

- Turn off the firewall settings on your PC and then search the camera again.
OPEN SOURCE ANNOUNCEMENT

GPL/LGPL software license

The software included in this product contains copyrighted software that is licensed under the GPL/LGPL. You may obtain the complete Corresponding Source code from us for a period of three years after our last shipment of this product by sending email to help@busybox.net.

If you want to obtain the complete Corresponding Source code in the physical medium such as CD-ROM, the cost of physically performing source distribution might be charged.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991
Copyright (C) 1989, 1991 Free Software Foundation, Inc. 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software - to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead. You can apply it to your programs, too. When we speak of free software, we are referring to freedom, not price. So our General Public Licenses make no restrictions on price or terms. These licenses strengthen User Free Rights while protecting the program from misrepresentation by others.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License.

1. Each license requires you to notify the recipients of that work that they are covered by this License; if you distribute such a work, you must copy the notice, giving the recipients of the work the opportunity to view a copy of this License. The text of the notice may be included optionally in the source code distributed under this License, or it may be included in any copy of the work distributed under this License.

2. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and a notice that there is no warranty; and give any other recipients of the Program a copy of this License along with the Program.

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself interacts interactively with a user,boss does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other authors extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to your works written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program. In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information received as to the offer to distribute corresponding source code. This alternative is allowed only if you receive the object code under the same conditions the source code was distributed under, that is, under the terms of Sections 1 and 2 above (at your option) by a third party who has distributed the object code under the terms of this License, and who has informed you in addition about those terms which apply, as described in subsection 2 above).

4. You may offer to distribute the Program under the terms of the offer provided it is an offer valid at the time of distribution. You are not restricted to offer distribution under this License at all if you choose to accept the terms of an offer that you receive.

5. In case an entity other than you distributes the Program, this entity may not make additional distribution of the program under these terms any more than you could, if you distributed the Program. You may not make a distribution under these terms merely to germinate further Distributions by others.

6. You may accept offers for the Program from others under these terms or under different terms. You may not copy or distribute the Program except in accordance with those offers.

7. You may not copy, distribute, or modify the Program except in compliance with this License. If you violate this License, you agree to return all copies of the Program to the Free Software Foundation under the terms of this License, and to promote its use and bring about its license, to the extent permitted or desired.

8. You may accept offers for the Program from others under this License or under different terms. You may not copy or distribute the Program except in accordance with those offers.

9. You may not copy, distribute, or modify the Program except in accordance with this License. If you violate this License, you agree to return all copies of the Program to the Free Software Foundation under the terms of this License, and to promote its use and bring about its license, to the extent permitted or desired.

10. If you distribute copies of a work under this License in, or you modify such a work or any part thereof to make it conform to the requirements of this License, you must attach to the work anastronomical copy of Copyright (C)1989, 1991 Free Software Foundation, Inc. 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA
5. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

6. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. You may not make any other modification of this License, or copy a modification of this License, in either source code or object code form, under the terms of this License; i.e. you may not modify an otherwise valid version of this License to make invalid things valid, or vice versa.

7. You may not apply any license or permission or otherwise restrict the usage of the Corresponding Source form of the Program or any of its derivative works by a third party unless you have received private permission from the Copyright Holder to do so, and also not violate Section 10 of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that the license incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

10. Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and “any later version”, you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose a version of this License corresponding to the way the Free Software Foundation actually practices. But you should consult this License itself or the examination of the versions to see the exact terms.

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT AS STATED HERE, THE COPYRIGHT HOLDERS AND LICENSORS PROVIDE THE PROGRAM “AS IS” WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, FREEDOM FROM COMPUTER VIRUS, AND NONINFRINGEMENT OF THIRD PARTY RIGHTS. THE COPYRIGHT HOLDERS AND LICENSORS SPECIFICALLY DISCLAIM ANY WARRANTIES INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, FREEDOM FROM COMPUTER VIRUS, AND NONINFRINGEMENT OF THIRD PARTY RIGHTS.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES萨SONED OR CORRUPTED IN ANY WAY), EVEN IF SUCH NOWAY WAS ALICE TO THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Program

If you develop a new program, and you wish to distribute it under the GNU General Public License, here are the steps:

1. Choose a license. The simplest way to do this is to offer the program as a “work of the United States Government” as defined in Section 105 of the United States Copyright Act. This makes the program freely usable in the United States. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Each version will be given a distinguishing version number.

2. Use a suitable version of the license. For organizational reasons, the Free Software Foundation uses version 3 of the license.

3. May you make a new version of the program?

You are free to change the program in any way, except that you may not distribute it without telling the users that it is not the original, so as not to deceive them.

4. You may redistribute the program...
2. Basic Permissions.
All rights granted under this License are for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affords your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License if only the output, and not the specific output you produced, is modified.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running them, provided that you comply with subsection 6b, above.

If you convey a covered work, you must make a reasonable effort to ensure that, in the event of later redistribution of that work, it will conform to the terms of this License. You may not promote or assist the creation of any derivative work from a covered work by methods that violate subsection 6b, above.

You must convey the source code along with the object code and source code of the work if the work is covered under section 4 of this License. You must make available the Installation Information. This information must include a statement that it is under this License, and that you have the right to distribute it. You must provide a method of conveying the Installation Information along with the work under this section. If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession of the User Product is transferred from the recipient to some third party, the recipient of the User Product must then make available the Installation Information under this section. The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified and installed, or for the User Product in which it has been modified and installed. Access to a network to may be denied when the modification itself materially and adversely affects the operation of the network or violates the terms and conditions of the network access.

You may convey an object code work according to subsection 6b above, while providing that part of the object code work as is needed to implement a prisoner of war communication system provided that the conveyance is accomplished without modification of the object code work, and provided that you conspicuously and appropriately publish on-screen or in writing, at a reasonable time after first copying or arising to distribute such object code work, an offer to at least provide irrevocably to the recipient the Corresponding Source, free of charge, human readable form.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running them, provided that you comply with subsection 6b, above.

Conveying under any other circumstances is permitted solely under the conditions stated below. Subsection is not included: section 10, makes it unnecessary.

3. Protecting Users' Legal Rights from Anti-Circumvention Law.
No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WPO copyright treaty as adopted by the member states of the WPO treaty (also as adopted in other applicable laws).

When you convey a covered work, you may take any legal action to enforce your rights under this License to agree that any party to whom you convey a covered work as under subsection 6a, above, must conform to this License. This requirement does not apply if either you or the recipient has a written agreement from the other that this requirement does not apply.

When you convey a covered work, you must make a reasonable effort to ensure that, in the event of later redistribution of that work, it will conform to the terms of this License. You may not promote or assist the creation of any derivative work from a covered work by methods that violate subsection 6b, above.

You must not misrepresent the origins of a work. You may not misrepresent the status of its use (e.g., as Authoritative, Official or Correct), nor its quality. Additional permissions are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part shall be分明 as covered work under this License. In such case, each additional permission must be accompanied by a notice stating the part of the Program that it applies to, and by a notice stating that the part does not have the full meaning of this License unless the additional permission applies to all of the covered work.

The information must suffice to ensure that the continued propagation of the work, under the same license, remains possible for later proprietors of the work. Notice satisfying this requirement may be included on copyright notices, in distribution statements, and notices to recipients, provided that the notice had no overreaching effect on licensing or other restrictions.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running them, provided that you comply with subsection 6b, above. This requirement does not apply if either you or the recipient has a written agreement from the other that this requirement does not apply.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running them, provided that you comply with subsection 6b, above. This requirement does not apply if either you or the recipient has a written agreement from the other that this requirement does not apply.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. This requirement does not apply if either you or the recipient has a written agreement from the other that this requirement does not apply.
15. Disclaimer of Warranty.

There is NO WARRANTY for the PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONV Faill OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

COMPILERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

OPENSSL COMBINED LICENSE

The OpenSSL toolkit stays under a dual license, i.e. both the conditions of the OpenSSL License and the original SSLeay license apply to the toolkit. See below for the actual license texts. Actually both licenses are BSD-style Open Source licenses. In case of any license issues related to OpenSSL, please contact openssl-core@openssl.org.

Component Name License URL
openssl-1.0.2e OpenSSL Combined License http://www.openssl.org/license

lighttpd is a secure, fast, compliant and very flexible webserver that has been optimized for high-performance environments. It has a very low memory footprint compared to other web servers and takes care of 'spitball' attacks. Its advanced feature-set (FastCGI, CGI, Auth, Output-Compression, URL rewriting and many more) make lighttpd the perfect webserver for every server that suffers load problems. Simple Name Management Protocol (SNMP) is an Internet standard protocol for managing devices on IP networks. It is used mostly in network management systems to monitor the devices attached to the network for conditions that need administrative attention. Net-SNMP is a suite of applications used to implement SNMP v1, SNMP v2c and SNMP v3 using both IPv4 and IPv6. For more additional information, send email to help@ccv.ethanea.com.

Mozilla Public License

Since we, at Hansie Teshciw, used the Mozilla Flexbox component without modifying the source code according to the Mozilla Public license 1.1, we are not obliged to provide the source code of the corresponding component.

• Version 1.1

1. Definitions.
1.0.1. "Commercial Use" means distribution or otherwise making the Covered Code available to a third party.
1.1. "Contributor" means each entity that creates or contributes to the creation of Modifications.
1.2. "Contributor Version" means the combination of the Original Code, prior Modifications used by a Contributor, and the Modifications made by that particular Contributor.
1.3. "Covered Code" means the Original Code or Modifications or the combination of the Original Code and Modifications, in each case including portions thereof.
1.4. "Electronic Distribution Mechanism" means a mechanism generally accepted in the software development community for the electronic transfer of data.
1.5. "Expat License" means a license for Covered Code in any form other than Source Code.
1.6. "Initial Developer" means the individual or entity identified as the Initial Developer in the Source Code notice required by Exhibit A.
1.7. "Large Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.
1.8. "License" means this document.
1.8.1. "Licensable" means having the right to grant, to the maximum extent possible, whether at the time of the Initial grant or subsequently acquired, any and all of the rights conveyed herein.
1.9. "Modifications" means any addition to or deletion from the substance or structure of either the Original Code or any previous Modifications. When Covered Code is released as a series of files, a Modification is:
A. Any addition to or deletion from the contents of a file containing Original Code or previous Modifications.
B. Any new file that contains any part of the Original Code or previous Modifications.
1.10. "Original Code" means Source Code of computer software code which is described in the Source Code notice required by Exhibit A as Original Code, and which, at the time of its release under this License is not already Covered Code governed by this License.
1.10.1. "Patent Claims" means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.
1.1.1. "Source Code" means the preferred form of the Covered Code for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an Executable, or source code differential comparisons against either the Original Code or another well-known, available Covered Code of the contributor's choice. The Source Code can be in a compressed or archival form, provided the appropriate de-compression or de-archiving software is widely available for no charge.

1.1.2. "[your]" or "[your]" means an individual or a legal entity exercising rights under, and providing all of the rights of, this License or a future version of this License issued under Section 6.1. "You" includes a licensee of such rights under this License and a licensee who has received such rights under a subsequent version of the License issued under Section 6.1. A person that distributes Covered Code under this License and thereafter modifies or makes other additions to the Covered Code shall be considered a Contributor to the modified version. "[your]" includes a distributor of such rights under this License and a distributor who has received such rights under a subsequent version of the License issued under Section 6.1.

3.2. Application of License. The Modifications which You create or to which You contribute are governed by the terms of this License, including without limitation Section 3.5.

3.3. Availability of Source Code. Any Modification which You create or to which You contribute must be made available in Source Code form.

3.4. Intellectual Property Matters

3.4.1. License Grant. Subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) licensable by Contributor to use, reproduce, modify, display, perform and distribute Covered Code, contributed or incorporated into Covered Code by such Contributor (or portions thereof) either on an unmodified basis, with other Modifications, as Covered Code and/or as part of a Larger Work; and

(b) under PatentClaims infringing the making, using, or selling of Original Code, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Code (or portions thereof).

3.4.2. Contribution Notice. If Contributor includes notice which announces that the Source Code version of the Covered Code is available under the terms of this License, including a description of how to obtain a copy of the Source Code version of the Covered Code, then You must make a corresponding notice in all copies of the Executable version of the Covered Code that You distribute.

3.4.3. Modifications. You must cause all Covered Code which You contribute to contain a file documenting the changes You made to create that Covered Code and the date of any change. You must include a prominent statement that the Modifications are, directly or indirectly, from Original Code provided by the Initial Developer and include an accompanying notice of the Modification rights granted by that Contributor. You must list the Modification rights in according with Section 3.4.1.

3.5. Distribution Obligations.

(a) If You distribute any Covered Code in Executable form, and the Modifications include an application programming interface and Contributor has knowledge of patent licenses which are reasonably likely to be infringed by the Modifications made by such Contributor (or portions thereof) in combination with the Original Code, then You shall include a copyright notice on the Executable version stating that "this product includes software developed by Netscape and/or its contributors (who may or may not have provided the Modifications), together with other modifications made by such Contributor (or portions thereof); and ii) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(b) The distribution of Covered Code is required to include corresponding source code or a license to distribute corresponding source code under the terms of this License.

3.6. Application of License. The Modifications which You create or to which You contribute are governed by the terms of this License, including without limitation Section 3.5.

Termination

8.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 10 days of receiving notice thereof. All sublicenses in effect as of the date of such termination are governed by Section 10.6.

8.2. If You assert a patent infringement claim against Initial Developer or a Contributor (the Initial Developer or an Contributor) alleging that such Initial Developer or a Contributor (the Initial Developer or an Contributor) has infringed any patent, then any and all rights granted by such Initial Developer or Contributorto You under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively, unless if within 60 days after receipt of notice You either: (i) agree in writing to license the Covered Code under the terms of this License; (ii) agree to an appropriate royalty/royalty-free license for Your past and future use of Modifications made by such Participant; or (iii) withdraw your litigation claim with respect to the Covered Code against such Participant. If within 60 days of notice, a reasonable royalty and payment arrangement are not mutually agreed upon in writing by the parties, the Initial Developer or Contributor has the option of: (a) continuing to distribute the Covered Code under the terms of this License; or (b) taking reasonable steps to cause You to continue receiving the Covered Code under the terms of this License. The Initial Developer or Contributor may also elect to terminate these rights if You proceed to litigate your claim (through licensing or settlement) prior to the initiation of patent infringement litigation, then the reasonable value of the licenses granted by such Initial Developer or Contributor shall survive termination.

9. LIMITATION OF LIABILITY.

9.1. UNDER NO CIRCUMSTANCES AND UNLESS OTHERWISE AGREED TO IN WRITING, CONTRACT OR OTHERWISE, SHALL THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR DISTRIBUTOR OF COVERED CODE, OR ANY SUPPLIER OF ANY PRODUCT OR SERVICE, RESULTING FROM USE OF THE COVERED CODE, OR ANY DISTRIBUTOR OF COVERED CODE, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

9.2. IN NO EVENT SHALL ANY CONTRIBUTOR BE LIABLE FOR ANY CLAIMS, DAMAGES OR OTHER LIABILITIES ARISING FROM, OUT OF OR IN CONNECTION WITH ITS DISTRIBUTION OR USE OF THE COVERED CODE.

11. MISCELLANEOUS

11.1. This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by California law (except to the extent applicable law, if any, is expressly specified by the parties) and shall be interpreted to the extent possible in accordance with its terms. Any supplement to this License provided by the parties shall be in writing. Licenses granted by the Initial Developer or a Contributor hereunder are subject to the jurisdiction of the United States of America (or to the jurisdiction of the country in which the Contributor is located and in which its assets are located) and to applicable United States of America laws and regulations with respect to the making and operating of businesses in the United States of America, Rights under this License to distribute Covered Code shall be subject to the jurisdiction of the Federal Courts of the Northern District of California in which the party is located (and in which its assets are located). Any legal action against any party shall be brought in the federal district courts of the Northern District of California in San Francisco County, and the parties hereby consent and submit to the exclusive jurisdiction of such courts for such purposes. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which

provides that the language of a contract shall be construed against the drafter shall not apply to this License.

12. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and you agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

13. MULTIPLE-LICENSED CODE.

Initial Developer may designate portions of the Covered Code as Multiple-Licensed. Multiple-Licensed means that the Initial Developer permits you to use portions of the Covered Code under the terms of one or more public licenses, if any, specified by the Initial Developer in the file described in Exhibit A.

EXHIBIT A - Mozilla Public License.

The contents of this file are subject to the Mozilla Public License Version 1.1 ("License"); you may not use this file except in compliance with the License. You may obtain a copy of the License at http://www.mozilla.org/MPL/.

Software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, either express or implied. See the License for the specific language governing rights and limitations under the License.

The Original Developer of the Original Code is Netscape Communications Corporation. Portions created by Netscape Communications Corporation are Copyright (C) 1996 Netscape Communications Corporation.

Contributor(s):

All Rights Reserved.

Alternatively, the contents of this file may be used under the terms of the [___] license (the [___] License), in which case the provisions of [___] License are applicable instead of those above. If you wish to allow use of your version of this file only under the terms of the [___] License and not to allow others to use your version of this file under the [___] License, then indicate your decision by deleting the provisions above and replace them with the corresponding provisions from the [___] License. If you do not delete the provisions above, a recipient may use your version of this file under either the MPL or the [___] License.

NOTE: The text of this Exhibit A may differ slightly from the text of the notices in the Source Code files of the Original Code. You should use the text of this Exhibit A rather than the text found in the Original Code Source Code for Your Modifications.

The Independent JPEG Group's JPEG Software

The software included in this product contains copyrighted software that is licensed under the MPL license.

- **MPL license**
  - Code project: Generating OpenGil Libgig

This distribution contains the sixth public release of the Independent JPEG Group's free JPEG software. You are welcome to redistribute this software and to use it for any purpose, subject to the conditions under LEGAL ISSUES, below. Serious users of this software (particularly those incorporating it into larger programs) should contact US at jepg-info@uunet.uu.net to be added to our electronic mailing list. Mailing list members are notified of updates and have a chance to participate in technical discussions.

This software is the work of Tom Lane, Philip Gladstone, Jim Boucher, Lee Crocker, Julian Minguillon, Luis Ortiz, George Phillips, Davide Rossi, Guido Vollbeding, Ge' Weijers, and other members of the Independent JPEG Group.

UG is not affiliated with the official ISO-JPEG standards committee.

**LEGAL ISSUES**

In plain English:

1. We don't promise that this software works. (But if you find any bugs, please let us know!)
2. You can use this software for whatever you want. You don't have to pay us.
3. You may not pretend that this software is your own creation. If you use it in a program, you must acknowledge somewhere in your documentation that you've used the UG code.

In legalese:

1. The authors make NO WARRANTY or representation, either express or implied, with respect to this software, its quality, accuracy, merchantability, or fitness for a particular purpose. This software is provided "AS IS", and you, its user, assume the entire risk as to its quality and accuracy.
2. This software is copyright (C) 1991-1998, Thomas G. Lane. All Rights Reserved except as specified below.
3. Permission is hereby granted to use, copy, modify, and distribute this software (or portions thereof) for any purpose, without fee, subject to the following conditions:
   (a) If any part of the source code for this software is distributed, then this README file must be included, with this copyright and no-warranty notice unaltered, and any additions, deletions, or changes to the original files must be clearly indicated in accompanying documentation.
   (b) If only executable code is distributed, then the accompanying documentation must state that "This software is based in part on the Independent JPEG Group's software."
   (c) Permission for use of this software is granted only if the user accepts full responsibility for any undesirable consequences; the authors accept NO LIABILITY for damages of any kind.

Conditions apply to any software derived from or based on the UG code, not just to the unmodified library. If you use our work, you ought to acknowledge us. Permission is NOT granted for the use of any UG author's name or company name in advertising or publicity relating to this software or products derived from it.

This software may be referred to only as the Independent JPEG Group's software.

We specifically permit and encourage the use of this software as the basis of commercial products, provided that all warranty or liability claims are assumed by the product vendor.

ansicClear is NOT covered by the above copyright and conditions, but instead by the usual distribution terms of the Free Software Foundation; principally, that you must include source code if you redistribute it. (See the file ansi2knr.h for full details.) However, since ansi2knr.c is not needed as part of any program generated from the UG code, this does not limit you more than the foregoing paragraphs do.

The Unix configuration script "configure" was produced with GNU Autoconf. It is copyright by the Free Software Foundation and is freely distributable. The same holds for its supporting scripts (config.guess, config.sub, ltoct, ltmain.sh). Another support script, install-sh, is by M.I.T. but is also freely distributable. It appears that the arithmetic coding option of the JPEG spec is covered by patents owned by IBM, AT&T, and Mitsubishi. Hence arithmetic coding cannot legally be used without obtaining one or more licenses. For this reason, support for arithmetic coding has been removed from the free JPEG software. Since arithmetic coding provides only a marginal gain over the unpatented Huffman mode, it is unlikely that very many implementations will support it. So far as we are aware, there are no patent restrictions on the remaining code.

The UG distribution formerly included code to read and write GIF files. To avoid entanglement with the Unisys LZW patent, GIF reading support has been removed altogether, and the GIF writer has been simplified to produce "uncompressed GIFs". This technique does not use the LZW algorithm, the resulting GIF files are larger than usual, but are readable by all standard GIF decoders.

We are required to state that "The Graphics Interchange Format is the Copyright property of CompuServe Incorporated. GIF(sm) is a Service Mark property of CompuServe Incorporated."
16. "Patch for Modification" means a difference, program, system, or the like in order to create the Modified Source Code from the Source Code or the Binary Code thereof.
17. "Vicarious Execution of Patch Processing" means vicarious execution service to create the Modified Source Code applying the Patch for Modification to the Source Code or the Binary Code thereof.
19. "Distribution" means any of the following acts:
   1. to transmit a work to a large number of specific persons through the Internet communication, broadcasting, and the like;
   2. to transmit a work to the general public through the Internet communication, broadcasting, and the like automatically in response to a request from the public; and
   3. to distribute a copy of a work to the general public or a large number of specific persons.

Article 3. Copyright

1. The copyrights of the Source Code shall be owned by Ken Sakamura.

Article 4. License of Source Code

1. As provided for in this Article, T-Engine Forum shall provide, and grant a license to use, the Source Code free of charge to any person who has taken the necessary procedure for registration as prescribed by T-Engine Forum and agreed to the T-License.
3. In accordance with the license granted under Article 4.1 above, the Source Code User may perform the following acts:
   1. to copy and/or modify the Source Code provided by T-Engine Forum hereunder for its own research, development and the like;
   2. to run the Source Code provided by T-Engine Forum hereunder for its own research, development and the like;
   3. to run the Source Code modified in accordance with the provision of Article 4.3 (1) above for its own research, development and the like;
   4. to distribute the binary Code created from the Source Code provided by T-Engine Forum hereunder or from the Source Code modified in accordance with the provision of Article 4.3 (1) above;
4. In accordance with the license granted under Article 4.1 above, the System Developer may perform the following acts:
   1. to perform any and all acts set forth in this Article 4.3 above.
   2. to develop and manufacture the Embedded Product containing the Binary Code, and, whether with or without payment, provide the End User with the same and make the Binary Code available to the End User on the Embedded Product.
5. The Source Code User and the System Developer shall be obligated to give a notice that the Source Code is used, in such a way as separately specified by T-Engine Forum, when they use the Source Code or the Binary Code, or make the Binary Code available for the End User on the Embedded Product.

Article 5. Distribution of Modified Source Code

1. Any of A- members of T-Engine Forum may become the Distributor of Modification by obtaining the approval of T-Engine Forum through the registration procedure as prescribed by the Forum provided that only the department of the A- member which has taken the registration procedure may distribute the Modified Source Code in such a way as provided for in this Article so long as it holds the A-membership.
2. The Distributor of Modification may create the Modified Source Code based on the Source Code provided by T-Engine Forum and the Patch for Modification to be applied to create such Modified Source Code from the Source Code.
3. The Distributor of Modification shall, prior to the distribution, inform T-Engine Forum of and register a name and description of the Modified Source Code in such a way as specified by T-Engine Forum.
4. The Distributor of Modification shall determine the name of the Modified Source Code subject to the rules separately established by T-Engine Forum and publish an appropriate notice as required by the rules on the Patch for Modification and the Modified Source Code.
5. The Distributor of Modification may distribute the Modified Source Code to a third party, whether with or without payment, provided that the Distributor of Modification shall take the necessary measures to prohibit the third party from making the re-Distribution of the Modified Source Code.
6. Developer with the Patch for Modification. Provided, however, that the Distributor of Modification shall be obligated to confirm that the System Developer is the Source Code User duly licensed under Article 4.1.
7. The Distributor of Modification may perform the Vicarious Execution of Patch Processing for the System Developer.
8. The System Developer shall not distribute the Modified Source Code in further modified form to any third party as a stand-alone software product.
9. The System Developer may, under the same obligation as imposed in Article 4.5, make the Embedded Product available for the End User through use of the Patch for Modification distributed by the Distributor of Modification or the Derivative Works obtained through the Vicarious Execution of Patch Processing.

Article 6. Distribution and Registration of the Ported Source Code

1. The Source Code User and the System Developer may, whether with or without charge, distribute to any third party only the following parts of the Ported Source Code on the T-Engine Hardware or the Similar Hardware to T-Engine Hardware:
   1. The Hardware-dependent Part and/or Compiler-dependent Part; provided that the Source Code User and the System Developer shall inform T-Engine Forum of, and T-Engine Forum may publish, a method for distributing said Part(s) to third parties.
   2. The Header File; provided that the Header File shall be distributed together with the Binary Code of the Ported Source Code.
   3. Any member of T-Engine Forum may request T-Engine Forum to register and distribute, as an original source code for T-Kernel, the Ported Source Code on the T-Engine Hardware or the Similar Hardware to T-Engine Hardware.
   4. Any member of T-Engine Forum who requests the distribution mentioned in the preceding paragraph shall accord to the following conditions:
      1. The member shall confirm that the object hardware is the T-Engine Hardware or the Similar Hardware to T-Engine Hardware.
      2. The member shall provide T-Engine Forum with a complete set of operational environment for the object hardware and T-Kernel free of charge when requesting the distribution.
      3. The member shall submit test results of the Ported Source Code to T-Engine Forum when requesting the distribution.
      4. In the event that T-Engine Forum accepts the request mentioned in Article 6.2, T-Engine Forum shall register and distribute the Ported Source Code as the Source Code for T-Kernel. Provided, however, that the Ported Source Code may be treated in the same way as the Modified Source Code until the time of registration hereunder.
5. The provision set forth in Article 3 shall apply to the Ported Source Code registered in accordance with this Article.

Article 7. Use for Other Purpose

1. Any use of the Source Code, the Modified Source Code or the Ported Source Code other than those stipulated in Articles 4, 5 and 6 shall be subject to the prior approval of T-Engine Forum.

Article 8. Limited Warranty

1. T-Engine Forum and the copyright holder of the Source Code warrant that the Source Code does not infringe third party's copyrights. Provided, however, that T-Engine Forum and the copyright holder of the Source Code make no warranty as to the Hardware-dependent Part and/or Compiler-dependent Part set forth in Article 6.2 in the Ported Source Code by any third party.
3. Neither T-Engine Forum nor the copyright holder of the Source Code warrants that the Source Code does not infringe any third party's industrial property rights. In no event shall T-Engine Forum and the copyright holder of the Source Code be liable for any dispute which may arise between the Source Code User and a third party in connection with the third party's industrial property rights.

Article 9. Indemnity

1. Neither T-Engine Forum nor the copyright holder of the Source Code shall be liable for any damages (including, but not limited to, damages resulting from loss of profit, business interruption, loss of business information or any other pecuniary damage) arising out of use or impossibility of use of the Source Code, including but not limited to use of the T-Engine Hardware or the Similar Hardware to T-Engine Hardware.

Article 10. Breach of Agreement

1. In case that T-Engine Forum considers that this License Agreement is breached or that the popularization of T-Kernel is obstructed, T-Engine Forum shall take measures to correct such breach or such obstruction, take measures on the ground of copyright infringement, or take any other necessary measures against the breaching person or the obstructing person, regardless of whether or not the said person is a member of T-Engine Forum.
2. In case of breach of this License Agreement by a member of T-Engine Forum, T-Engine Forum may take appropriate measures against the member, for example, the member is disqualified from membership, depending on what kind of breach has been committed by it.
3. Any legal dispute which may arise in relation to any breach of this License Agreement shall be subject to the exclusive jurisdiction of the Tokyo District Court.

Article 11. Governing Law and Language

1. This License Agreement shall be governed by and interpreted under the laws of Japan.
2. This License Agreement is executed in both Japanese text and English text provided that the Japanese text shall govern the interpretation and performance of this License Agreement.

The data format used by the zlib library is described by RFCs (Request for Comments) 1950 to 1952 in the files http://www.ietf.org/rfc/rfc1950.txt (zlib format), rfc1951.txt ( inflate format) and rfc1952.txt (gzip format).

Hamwha Techwin cares for the environment at all product manufacturing stages, and is taking measures to provide customers with more environmentally friendly products.

The Eco mark represents Hamwha Techwin’s devotion to creating environmentally friendly products, and indicates that the product satisfies the EU RoHS Directive.

Correct Disposal of This Product (Waste Electrical & Electronic Equipment)

(Applicable in the European Union and other European countries with separate collection systems)

This marking on the product, accessories or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take these items for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product and its electronic accessories should not be mixed with other commercial wastes for disposal.

Correct disposal of batteries in this product

(Applicable in the European Union and other European countries with separate battery return systems.)

This marking on the battery, manual or packaging indicates that the batteries in this product should not be disposed of with other household waste at the end of their working life. Where marked, the chemical symbols Hg, Cd or Pb indicate that the battery contains mercury, cadmium or lead above the reference levels in EC Directive 2000/53. If batteries are not properly disposed of, these substances can cause harm to human health or the environment. To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system.
