IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean the contaminated area on the product surface with a soft, dry cloth or a damp cloth. (Do not use a detergent or cosmetic products that contain alcohol, solvents or surfactants or oil constituents as they may deform or cause damage to the product.)
7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. This product is intended to be supplied by a Listed Power Supply Unit marked “Class 2” or “LPS” and rated from / PoE , 1.5A. (PNM-9320VQP)
16. This Lens module has to be connected with equipment, which supplied by a power supply unit marked “Class 2” or “LPS”. (SLA-2M2400P/2M2800P/2M3600P/2M6000P/2M1200P/5M3700P/5M4600P/5M7000P)
17. If you use excessive force when installing the product, the camera may be damaged and malfunction. If you forcibly install the product using non-compliant tools, the product may be damaged.
18. Do not install the product in a place where chemical substances or oil mist exists or may be generated. As edible oils such as soybean oil may damage or warp the product, do not install the product in the kitchen or near the kitchen table. This may cause damage to the product.
19. When installing the product, be careful not to allow the surface of the product to be stained with chemical substance. Some chemical solvents such as cleaner or adhesives may cause serious damage to the product’s surface.
20. If you install/disassemble the product in a manner that has not been recommended, the production functions/performance may not be guaranteed. Install the product by referring to “Installation & connection” in the user manual.
21. Installing or using the product in water can cause serious damage to the product.

WARNING
TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE. DO NOT INSERT ANY METALLIC OBJECT THROUGH THE VENTILATION GRILLS OR OTHER OPENINGS ON THE EQUIPMENT.

Apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.

To prevent injury, this apparatus must be securely attached to the Wall/ceiling in accordance with the installation instructions.

Pan/Tilt/Zoom motors and slip ring are warranted for one year under continuous operation.

CAUTION

EXPLANATION OF GRAPHICAL SYMBOLS

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.
Class I construction
An apparatus with CLASS I construction shall be connected to a MAINS socket outlet with a protective earthing connection.

Battery
Batteries (battery pack or batteries installed) shall not be exposed to excessive heat such as sunshine, fire or the like.

Disconnection Device
Disconnect the main plug from the apparatus, if it’s defected. And please call a repair man in your location.

When used outside of the U.S., it may be used HAR code with fittings of an approved agency is employed.

CAUTION
RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

ATTENTION
IL Y A RISQUE D’EXPLOSION SI LA BATTERIE EST REMPLACÉE PAR UNE BATTERIE DE TYPE INCORRECT.
METTRE AU REBUT LES BATTERIES USAGÉES CONFORMÉMENT AUX INSTRUCTIONS.

These servicing instructions are for use by qualified service personnel only.
To reduce the risk of electric shock do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.
The CVBS out terminal of the product is provided for easier installation, and is not recommended for monitoring purposes.
Please use the input power with just one camera and other devices must not be connected.
The ITE is to be connected only to PoE networks without routing to the outside plant.
The wired LAN hub providing power over the Ethernet (PoE) shall be a UL Listed device with the output evaluated as a Limited Power Source as defined in UL60950-1.
Unit is intended for installation in a Network Environment 0 as defined in IEC TR 62102. As such, associated Ethernet wiring shall be limited to inside the building.

Please read the following recommended safety precautions carefully.
- Do not place this apparatus on an uneven surface.
- Do not install on a surface where it is exposed to direct sunlight, near heating equipment or heavy cold area.
- Do not place this apparatus near conductive material.
- Do not attempt to service this apparatus yourself.
- Do not place a glass of water on the product.
- Do not install near any magnetic sources.
- Do not block any ventilation openings.
- Do not place heavy items on the product.
- Please wear protective gloves when installing/removing the camera.
  The high temperature of the product surface may cause a burn.

User’s Manual is a guidance book for how to use the products.
The meaning of the symbols are shown below.
- Reference : In case of providing information for helping of product’s usages
- Notice : If there’s any possibility to occur any damages for the goods and human caused by not following the instruction
  ※ Please read this manual for the safety before using of goods and keep it in the safe place.

30 Product Overview
31 Troubleshooting
32 Open Source Announcement
PRODUCT FEATURES

- **Lens options according to focal length**
  You can select the lens you want and attach it to the camera.

- **Dustproof/Waterproof**
  The dust-resistant/water-resistant design protects the product from rain and dust when installed outdoors. (IP66)

- **Multi-Streaming**
  This network camera can display videos in different resolutions and qualities simultaneously using different CODECs.

- **Web Browser-based Monitoring**
  Using the Internet web browser to display the image in a local network environment.

- **Alarm**
  When an event occurs, the relevant video is sent to the email and the FTP server registered by the user or stored in the Micro SD memory card, or a signal is sent to the alarm output terminal.

- **Tampering Detection**
  Detects tempering attempts on video monitoring.

- **Defocus detection function**
  Detects the defocus phenomenon of the camera lens.

- **Motion Detection**
  Detects motion from the camera’s video input.

- **Fog detection**
  Detects fog that is heavier than the detection level.

- **Face Detection**
  Detects faces in the specified area from the camera’s video input.

- **IVA (Intelligent Video Analysis) function**
  Detects a motion or situation that meets the configured event rules.

- **ONVIF Compliance**
  This product supports ONVIF Profile S.
  For more information, refer to www.onvif.org.

RECOMMENDED PC SPECIFICATIONS

- **CPU** : Intel(R) Core(TM) i7 3.4 GHz or higher
- **Supported OS** : MS Windows, Mac OS X
- **Supported web browsers** : Google Chrome, MS Edge, Mozilla Firefox (Windows 64bit only), Apple Safari (Mac OS X only), MS Explore

※ Please see the appendix for detailed information on verified OS and browsers.
Some functions may be restricted even in supported browsers.

RECOMMENDED MICRO SD/SDHC/SDXC MEMORY CARD SPECIFICATIONS

- **Recommended capacity** : 16GB to 256GB (MLC type)
- **The following types of memory cards from the following manufacturers are recommended for this camera.**
  - Manufacturer : SanDisk, Transcend
  - Product family : High endurance
- **It is recommended to use a memory card of 16GB or more that conforms to the UHS-3 class (MLC type) specification.**
**WHAT'S INCLUDED (PNM-9320VQP)**

Please check if your camera and accessories are all included in the product package. (As for each sales country, accessories are not the same.)

### AT A GLANCE (PNM-9320VQP)

#### Appearance

1. **Dome cover**
   - Case cover used to protect the lens and the main unit.

2. **Window cover**
   - Lens module indication light (normal: green, abnormal: red)
   - If the lens module is attached correctly, the green LED will illuminate and then turn off after approximately 40 seconds. (to prevent undesirable reflections)

3. **Power On/Off switch**
   - Switch used to turn the product On/off.
   - Use it only to replace your lens module.

4. **Reset Button**
   - The button restores all camera settings to the factory default.
   - Press and hold for about 5 seconds to reboot the system.
      - If you reset the camera, the network settings will be adjusted so that DHCP can be enabled. If there is no DHCP server in the network, you must run the IP Installer program to change the basic network settings such as IP address, Subnet mask, Gateway, etc., before you can connect to the network.

5. **Test Monitor Out**
   - Output port for test monitoring the video output. Use the test monitor cable to connect to a mobile display and check the test video.

6. **DIP switch for changing the channel**
   - Change the DIP switches to specify the channel you want to use to view the installation video.
     - You can only check the videos of the 4CH lens module, not the videos of the PTZ.

7. **Micro SD Memory Card Compartment**
   - Compartment for the Micro SD memory card.

8. **Lens module mounting portion**
   - This is the terminal to mount the lens module.

installation & connection

INSTALLATION

This camera is waterproof and in compliance with the IP66 spec, but the jack connected to the external cable is not. You are recommended to install this product below the edge of eaves to prevent the cable from being externally exposed.

Precautions before installation

Ensure you read out the following instructions before installing the camera:

- Select an installation site that can hold at least 5 times the camera’s weight.
- Stuck-in or peeled-off cables can cause damage to the product or a fire.
- For safety purposes, keep anyone else away from the installation site. And put aside personal belongings from the site, just in case.
- If the product is installed with excessive force, it may cause damage to the camera due to malfunction. Forcing assembly using non-compliant tools may damage the product.
- Do not install or remove the lens module while the power is on.

Disassembling

With the star key or drill bits, loosen the fastening screws counter-clockwise and remove the dome and window covers.

- You do not have to completely remove the screws from the covers.
- Remove the dome cover only when installing the Micro SD card for PTZ. In all other cases, do not remove the dome cover.
- Remove the window cover when installing the lens module. You do not have to remove the dome cover.
- Since the dome and window covers are transparent, there is no safety cable. Please be careful not to drop it.

Inserting the Micro SD memory card

1. Using the star key or drill bits, remove the dome cover and the SD card door.

2. Insert a Micro SD card in the arrow direction shown in the figure.

- Disconnect the power cable from the camera before inserting the Micro SD memory card.
- Do not forcefully insert it in the reverse direction. It might damage your Micro SD memory card and your product.
- When it rains or the humidity is high, insertion or ejection of a Micro SD card is not recommended.
- Disassembly of the product cover should be finished within 5 minutes, or there will be the risk of internal dew condensation.
- Remove the dome cover when installing the Micro SD card for PTZ.
installation & connection

Removing the Micro SD memory card

1. Gently press down on the exposed end of the memory card as shown in the diagram to eject the memory card from the slot.

- You should save an SD card for each channel.
- Please note that if you firmly push and release the Micro SD memory card when it is ejected, it may pop out.
- Before removing the Micro SD memory card, in <<Storage>>, set the device to <<Off>> and press the [Apply] button and turn the camera off.
- If you turn off the camera or remove the Micro SD memory card that contains data from the product, the data may be lost or damaged.

2. Using the star key or drill bits, join the dome cover and the SD card door.

- Use the star key or drill bits to firmly tighten the fastening bolts so that there is no water damage issue.

Mounting lens module

1. Align and fasten the connector of the lens module with the connector of the camera body.

- Install the lens module while power is not connected (HPoE).
- Make sure the power switch is "OFF" before installing the lens module. Replacing the lens module while it is "ON" can cause malfunction.
- You are recommended to avoid touching the lens separately, as it is shipped from the factory with the focus adjusted during the manufacturing inspection.

- When inserting the lens module, insert it until the top/bottom hooks "click".

2. Complete the lens mounting process.

3. Connect power to the product (HPoE).

- If the lens module is not attached correctly, the lens module status light will illuminate red, as shown in the figure. If this occurs, turn off the power switch and reattach the lens module. If attached normally, it will illuminate green and then turn off after approximately 40 seconds.
- If you want to replace the lens module while connecting power to the product (HPoE), turn the power switch "OFF", replace the lens module, and then turn the power switch "ON".
- Be careful not to use any tool with a sharp point when handling the switch since it might be damaged.
- Be careful not to forcefully handle the switch since it might be damaged.
Preparing & Installing Camera Bracket

For installation guidelines for brackets and housings, refer to the installation manual that is enclosed with the bracket or housing.

- **Available Bracket Models**

<table>
<thead>
<tr>
<th>Model</th>
<th>Item</th>
</tr>
</thead>
<tbody>
<tr>
<td>SBP-390WM1</td>
<td>Wall Mount</td>
</tr>
<tr>
<td>SBP-300CM</td>

<td>Parapet Mount</td>
</tr>
<tr>
<td>SBP-300KM</td>
<td>Corner Mount</td>
</tr>
<tr>
<td>SBP-300PM</td>
<td>Pole Mount</td>
</tr>
</tbody>
</table>

- See “Optional Accessories for Installation” for the appearance of each bracket (unbundled). (page 17)

**Attaching to the unbundled adapter**

Choose and purchase a necessary one of the following options (unbundled) that is suitable to the installation site or for your convenience.

See “Optional Accessories for Installation” for separately sold products. (Page 17)

1. Turn the cap in the direction shown by the arrow to separate the cap from the joint.

- If you are not using the SFP module for installation, you may skip the installation procedure from Step 1 to 6.

2. Route the cable exposed outside of the mount or pole through the joint.

3. Turn the joint in the direction of the arrow to connect the two materials.

- If the product is installed in an area where outside moisture can penetrate through the mount or pole, use the accessory bush to block the inflow of outside moisture.
  - Coat the bush with an appropriate amount of grease and connect the cable to the correct hole of the bush. Plug the remaining holes not penetrated by cables with the pins.
  - Evenly press on the bush to tighten precisely into the “Joint” as shown in the cross-section image.

4. Fasten the optical cable to the SFP module.
5. Fasten the SFP module to the SFP slot in the body.

6. Connect the body rib and joint groove by matching the shape and then fasten together by turning the cap in the direction of the arrow.

7. Turn the screws on both sides of the cap to prevent the cap from coming loose in the opposite direction. (Only part of the screws go inside to a certain degree.)
   - Even if you are not connecting the SFP module, firmly fasten the CAP to prevent leakage. It is not assembled tight at shipment.

8. Connect the Ethernet cable to the I/F PCB.
   - For smooth joining with the PTZ camera, please be careful with the shape and form. (After joining the camera, the cable might be tangled as the I/F PCB rotates.)

- Fasten the two materials while pulling the optical cable from the outside so that it is not bent inside.
9. After fastening the I/F PCB to the body, install the safety cable of the camera body to the installed base.

10. Join the installed base and the camera body by matching the direction reference indicators.

11. Turn the camera in the direction of the arrow so that the reference indicators at the top and bottom are the same as in the image to the right.

12. Use the hex key to secure the installed base and the camera.

13. Adjust the lens to the desired direction by referring to "Adjusting the monitoring direction for the camera". (Page 18)
   - If you tilt the lens, you may need to adjust the lens as this may block the screen.

14. Use the star key or drill bits to join the window cover.
   - Use the star key or drill bits to firmly tighten the fastening bolts so that there is no water damage issue.
   - Since the window cover is transparent, there is no safety cable. Please be careful not to drop it.
How to set up channels to monitor for installation

The camera body has a channel DIP switch, as shown in the figure. You can change the channel of the camera using the channel DIP switches.

<table>
<thead>
<tr>
<th>CH1</th>
<th>CH2</th>
<th>CH3</th>
<th>CH4</th>
</tr>
</thead>
<tbody>
<tr>
<td>00</td>
<td>01</td>
<td>10</td>
<td>11</td>
</tr>
</tbody>
</table>

- If a DIP switch is not fully On/Off, the product may malfunction. After installation, check the DIP switches at the back.
- Be careful, as you will risk damaging a DIP switch if you manipulate it using a sharp tool.
- Be careful, as a DIP switch may be damaged if you operate it with excessive force.

Connecting the installation monitor

Connect the video output terminal of this product to the video input terminal of the monitor for installation.

- The wiring varies depending on your monitor type and peripheral devices; please refer to the user manual for each device.
- Please make sure the monitor and camera are turned off when connecting them.

This product is a network camera that transfers video over a network; the video output terminal is used to set the imaging range of the camera at installation.
- Using the terminal for monitoring purposes may cause problems such as degradation in video quality.
- It is not suitable for 24-hour monitoring using professional CRT monitors or TFT/LCD portable monitors.
- Use the network transfer screen for 24-hour monitoring and storage.
- You can only check the videos of the 4CH lens module, not the videos of the PTZ.
Optional Accessories for Installation
For your easier installation, you can purchase appropriate optional accessories available.

1. If installing the camera on the wall
   • Wall mount (SBP-390WM1)

2. If installing the camera on the ceiling
   • Ceiling Mount (SBP-300CM)
     When installing the ceiling mount, it is recommended to place it at least 30 cm away from the side wall.

3. If installing the wall mount (SBP-390WM1) on an at least 80mm-long cylinder
   • Pole Mount (SBP-300PM)

4. If installing the wall mount (SBP-390WM1) on a corner of the wall
   • Corner Mount (SBP-300KM)

5. If installing on a building rooftop
   • Parapet Mount (SBP-300LM)

Mount Joint

Wall mount (SBP-390WM1)
Ceiling Mount (SBP-300CM)
Parapet Mount (SBP-300LM)
Adjusting the monitoring direction for the camera

You can adjust the camera direction only when the camera is fixed on the ceiling. The act of moving the camera module is called “Pan”; adjusting its angle “Tilt”; rotating the lens along the axis “Rotate”.

- The rotation angle of Pan is -90˚ to +90˚ for each module.
- The rotation angle of Rotation is -180˚ to +180˚.
- The rotation angle of Tilt varies for each lens. See the table below.

The image can be covered up by the camera case depending on the angle.
Do not pan over the specified rotation angle. It might damage the cable leading to a product malfunction.

Methods of adjustment

1. After installing the camera in consideration of the direction to monitor, adjust the Pan angle along the bottom rail.
2. Adjust the horizontal angle so that the image does not appear to be reversed during rotation.
3. Adjust the tilt angle so that it points in the direction to be monitored.

- A partial blockage of view at a corner of the monitor may occur as the result of installation beyond the allowed angle range.

CONNECTING WITH OTHER DEVICE

Camera Wiring Interface Board

For the camera wiring, please refer to the picture below.

- When the alarm output is connected as Normal Open:
  - the sensor input operates when it is short for point contact type, or at the “LOW” level for active type.
- The maximum capacity of the alarm output terminal is 30V DC/2A, 125V AC/0.5A and 250V AC/0.25A.
- When connecting alarm input and output cables, be sure to connect one cable to each terminal respectively.
- To connect products over the camera’s capacity, please use an additional relay device.
- Improper connection of GND with NC/NO port and COM port might cause fire or product damage.
Powering and networking
Connect the PoE device with the PoE terminal of the camera.

- Please use a compliant adaptor appropriate for the device power.

**CONNECTING THE CAMERA DIRECTLY TO LOCAL AREA NETWORKING**

Connecting to the camera from a local PC in the LAN

1. Launch an Internet browser on the local PC.
2. Enter the IP address of the camera in the address bar of the browser.

A remote PC in an external Internet out of the LAN network may not be able to connect to the camera installed in the intranet if the port-forwarding is not properly set or a firewall is set. In this case, to resolve the problem, contact your network administrator.

In the IP Installer, you can use the initial password, "4321" to set IP Address, Subnet Mask, Gateway, HTTP Port, VNP Port, IP type. After changing the network interface, for better security, access the web viewer and change the password.

By factory default, the IP address will be assigned from the DHCP server automatically. If there is no DHCP server available, the IP address will be set to 192.168.1.100. To change the IP address, use the IP Installer.

For further details on IP Installer use, refer to "Static IP Setup". (Page 21)

**CONNECTING THE CAMERA DIRECTLY TO A DHCP BASED DSL/CABLE MODEM**

1. Connect the user PC directly with the network camera.
2. Run the IP Installer and change the IP address of the camera so that you can use the web browser on your desktop to connect to the Internet.
3. Use the Internet browser to connect to the web viewer.
6. Move to [Basic] – [IP & Port], and set the IP type to [DHCP].
7. Connect the camera, which was removed from your PC, directly to the modem.
8. Restart the camera.

For information on how to set DDNS, refer to the online help of Web Viewer.

For information on how to set the IP format, refer to the online help of Web Viewer.

**STATIC IP SETUP**

**Manual Network Setup**

Run `<IP Installer_v2.XX.exe>` to display the camera search list. At the initial startup, both [Auto Set] and [Manual Set] will be grayed out.

- For cameras found with the IPv6 setting, these buttons will be grayed out as the cameras do not support this function.

1. Select a camera in the search list. Check the MAC address of the camera on the camera's label. Both the [Auto Set] and [Manual Set] buttons will be activated.

2. Click [Manual Set]. The Manual Setting dialog appears. `<IP Address>`, `<Subnet Mask>`, `<Gateway>`, `<HTTP Port>`, and `<VNP Port>` of the camera are displayed in the preset values.

3. In the <Address> pane, provide the necessary information.
   - For cameras found with the IPv6 setting, these buttons will be grayed out as the cameras do not support this function.

a. MAC (Ethernet) Address : The MAC address imprinted on the camera label is automatically displayed and requires no user setting.

b. IP related parameters can be set only when DHCP is not checked.
If not using a Broadband Router
For setting <IP Address>, <Subnet Mask>, and <Gateway>, contact your network administrator.

4. In the <Port> pane, provide necessary information,
   - HTTP Port: Used to access the camera using the Internet browser, defaulted to 80.
   - VNP Port: Used to control the video signal transfer, defaulted to 4520.
5. Enter the password.
Enter the password of “admin” account, which was used to access the camera.

   • For the security purposes, you are recommended to use a combination of numbers, alphabets uppercase and lowercase and special characters for your password.
   • For information on how to change the password, refer to the online help of Web Viewer.

6. Click [OK].Manual network setup will be completed.

If using a Broadband Router
• IP Address: Enter an address falling in the IP range provided by the Broadband Router.
ex) 192.168.1.2–254, 192.168.0.2–254, 192.168.XXX.2–254
• Subnet Mask: The <Subnet Mask> of the Broadband Router will be the <Subnet Mask> of the camera.
• Gateway: The <Local IP Address> of the Broadband Router will be the <Gateway> of the camera.

   • The settings may differ depending on the connected Broadband Router model.
   • For more information, refer to the user manual of the applicable router.
   • For more information about port forwarding of the broadband router, refer to “Port Range Forward (Port Mapping) Setup”.

If the Broadband Router has more than one camera connected
Configure the IP related settings and the Port related settings distinctly with each other.
ex)

<table>
<thead>
<tr>
<th>Category</th>
<th>Camera #1</th>
<th>Camera #2</th>
</tr>
</thead>
<tbody>
<tr>
<td>IP related settings</td>
<td>IP Address</td>
<td>192.168.1.100</td>
</tr>
<tr>
<td>Subnet Mask</td>
<td>255.255.255.0</td>
<td>255.255.255.0</td>
</tr>
<tr>
<td>Gateway</td>
<td>192.168.1.1</td>
<td>192.168.1.1</td>
</tr>
<tr>
<td>Port related settings</td>
<td>HTTP Port</td>
<td>8080</td>
</tr>
<tr>
<td>VNP Port</td>
<td>4520</td>
<td>4521</td>
</tr>
</tbody>
</table>

   • If the <HTTP Port> is set other than 80, you must provide the <Port> number in the address bar of the Internet browser before you can access the camera.
ex) http://IP address : HTTP Port
   http://192.168.1.100:8080

Auto Network Setup
Run <IP Installer_v2.XX.exe> to display the camera search list.
At the initial startup, both [Auto Set] and [Manual Set] will be grayed out.

   • For cameras found with the IPv6 setting, these buttons will be grayed out as the cameras do not support this function.

1. Select a camera in the search list.
   Check the MAC address of the camera on the camera’s label. Both the [Auto Set] and [Manual Set] buttons will be activated.
2. Click [Auto Set].
The Auto Setting dialog appears.
The <IP Address>, <Subnet Mask>, and <Gateway> will set automatically.
3. Enter the password.
Enter the password of “admin” account, which was used to access the camera.

   • For the security purposes, you are recommended to use a combination of numbers, alphabets uppercase and lowercase and special characters for your password.
   • For information on how to change the password, refer to the online help of Web Viewer.

4. Click [OK].Auto network setup will be completed.
DYNAMIC IP SETUP

Dynamic IP Environment Setup
- Example of the Dynamic IP environment
  - If a Broadband Router, with cameras connected, is assigned an IP address by the DHCP server
  - If connecting the camera directly to modem using the DHCP protocols
  - If IPs are assigned by the internal DHCP server via the LAN

Checking the Dynamic IP
1. Run the IP Installer on the user’s local computer. Cameras allocated with <Dynamic IP> address are shown in the list.
2. Select a camera from the search result.
3. Click the [Manual Set] button and check the camera’s <Dynamic IP> address. If you uncheck <DHCP>, you can change IP to <Static>.

PORT RANGE FORWARD (PORT MAPPING) SETUP

If you have installed a Broadband Router with a camera connected, you must set the port range forwarding on the Broadband Router so that a remote PC can access the camera in it.

Manual Port Range Forwarding
1. From the Setup menu of the Broadband Router, select <Applications & Gaming> - <Port Range Forward>. For setting the port range forward for a third-party Broadband Router, refer to the user guide of that Broadband Router.
2. Select <TCP> and <UDP Port> for each connected camera to the Broadband Router. The number of each port to be configured to the IP router should be set according to the port number designated in <Setup> - <Basic> - <IP & Port> on the camera web viewer.

3. When done, click [Save Settings]. Your settings will be saved.

- Above sample instructions are based on the CISCO’s Broadband Router.
- The settings may differ depending on the connected Broadband Router model. For more information, refer to the user manual of the applicable router.

Setting up Port Range Forward for several network cameras
- You can set a rule of Port Forwarding on the Broadband Router device through its configuration web page.
- A user can change each port using the camera setting screen.

When Camera1 and Camera2 are connected to a router:

<table>
<thead>
<tr>
<th>Start</th>
<th>End</th>
<th>Protocol</th>
<th>IP Address</th>
</tr>
</thead>
<tbody>
<tr>
<td>3000</td>
<td>3000</td>
<td>TCP/UDP</td>
<td>192.168.1.100</td>
</tr>
<tr>
<td>3001</td>
<td>3001</td>
<td>TCP/UDP</td>
<td>192.168.1.101</td>
</tr>
<tr>
<td>4520</td>
<td>4520</td>
<td>TCP/UDP</td>
<td>192.168.1.100</td>
</tr>
<tr>
<td>4521</td>
<td>4521</td>
<td>TCP/UDP</td>
<td>192.168.1.101</td>
</tr>
<tr>
<td>8080</td>
<td>8080</td>
<td>TCP/UDP</td>
<td>192.168.1.100</td>
</tr>
<tr>
<td>8081</td>
<td>8081</td>
<td>TCP/UDP</td>
<td>192.168.1.101</td>
</tr>
</tbody>
</table>

- Port forwarding can be done without additional router setup if the router supports the UPnP (Universal Plug and Play) function. After connecting the network camera, select the checkbox from the menu <Quick connect> in <Wisenet DDNS> in “Settings >> Network >> DDNS”.

User

Internet

Camera1 (192.168.1.100)
- HTTP port 8080
- Device port 4520
- RTSP port 3000

Camera2 (192.168.1.101)
- HTTP port 8081
- Device port 4521
- RTSP port 3001
CONNECTING TO THE CAMERA FROM A SHARED LOCAL PC

1. Run the IP Installer.
   It will scan for connected cameras and display them as a list.
2. Double-click a camera to access.
   The Internet browser starts and connects to the camera.

   Access to the camera can also be gained by typing the camera’s IP address in the address bar of the Internet browser.

CONNECTING TO THE CAMERA FROM A REMOTE PC VIA THE INTERNET

Since using the IP Installer on a remote computer that is not in the Broadband Router’s network cluster is not allowed, users can access cameras within a Broadband Router’s network by using the camera’s DDNS URL.

1. Before you can access a camera in the Broadband Router network, you should have set the port range forward for the Broadband Router.
2. From the remote PC, launch the Internet browser and type the DDNS URL address of the camera, or the IP address of the Broadband Router in the address bar.
   ex) http://ddns.hanwha-security.com/ID

   For information on how to register DDNS, refer to the network setup guide.
CONNECTING TO THE CAMERA

Normally, you would
1. Launch the Internet browser.
2. Type the IP address of the camera in the address bar.
ex) • IP address (IPv4) : 192.168.1.100 → http://192.168.1.100
   - the Login dialog should appear.
• IP address (IPv6) : 2001:230:abcd:ff:0000:0000:ff:1111

If the HTTP port is other than 80
1. Launch the Internet browser.
2. Type the IP address and HTTP port number of the camera in the address bar.
ex) IP address : 192.168.1.100:HTTP Port number(8080)

Using URL
1. Launch the Internet browser.
2. Type the DDNS URL of the camera in the address bar.
ex) URL address : http://ddns.hanwha-security.com/ID
   - the Login dialog should appear.

Connecting via Bonjour
1. Run the client or operating system in support of the Bonjour protocol.
2. Click the camera name for search.
   In the Mac operating system, click the camera name searched from the Bonjour tab of Safari.
   - The login window is displayed.

To check the DDNS address
If the camera is connected directly to a DHCP-based cable modem or DSL modem, the IP address will change each time it tries to connect to the ISP (the company you subscribed to).
If this is the case, you will not be informed of the IP address changed by DDNS.
Once you register a dynamic IP-based device with the DDNS server, you can easily check the changed IP when you try to access the device.
To register your device to the <DDNS> server, visit http://ddns.hanwha-security.com and register your device first, and then set the Web Viewer's <Network> - <DDNS> to <Wisenet DDNS>, as well as providing <Product ID> that had been used for DDNS registration.

Network connection is disabled in the LAN only environment.

Connecting via UPnP
1. Run the client or operating system in support of the UPnP protocol.
2. Click the camera name for search.
   In the Windows operating system, click the camera name searched from the network menu.
   - The login window is displayed.
**PASSWORD SETTING**

When you access the product for the first time, you must register the login password. When the "Password change" window appears, enter the new password.

- For a new password with 8 to 9 digits, you must use at least 3 of the following: uppercase/lowercase letters, numbers and special characters. For a password with 10 to 15 digits, you must use at least 2 types of those mentioned.
- Special characters that are allowed: ~`!@#$%^*()_-+=|{}[].?/
- For higher security, you are not recommended to repeat the same characters or consecutive keyboard inputs for your passwords.
- If you lose your password, you can press the [RESET] button to initialize the product. So, don't lose your password by using a memo pad or memorizing it.

**LOGIN**

Whenever you access the camera, the login window appears. Enter the User ID and password to access the camera.

1. Enter "admin" in the <User name> input box. The administrator ID, "admin", is fixed and cannot be changed.
2. Enter the password in the <Password> input field.
3. Click [OK]. If you have logged in successfully, you will see the Live Viewer screen.

When you access the camera web viewer, pay special attention to the security by checking whether the image data is encrypted.

- If you check the "Remember my credentials" option when your input is done, in future you will be logged in automatically without being prompted to enter the login information.
- You will experience the best video quality if the screen size is 100%. Reducing the ratio may cut the image on the borders.

**CAMERA WEB VIEWER SETUP**

1. Click the [Setup ()]) icon.
2. The Settings window appears.
3. You can configure settings for the camera's basic information, video, audio, network, event, analysis, and system over the network.
4. Click <Help (>): to view detailed descriptions of each function.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991
Copyright (C) 1989, 1991 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software-- to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too. When we speak of free software, we are referring to freedom, not price. So our worry is not whether you can charge for your program; the worry is whether you can deprive the world of the freedom to share your program.

When we use the word “free” we are using it in a special sense, not the ordinary meaning for free. Free programs, if you pay for them, aren't free; we're talking about freedom, not price.

‘Free software’ refers to the freedom for the software user to run, study, change, and distribute the software in a way that supports the user's independence and freedom, not to the freedom of software developers to choose what software to write.

We use the word ‘license’ here in a technical sense to mean the legal permission or lack thereof to use, modify, and distribute. The GNU General Public License is intended to make sure that users have the freedom to run, save, copy, distribute, study, change, and improve the software.

In some cases we can give you no guarantee about the software, and will offer, from time to time, a limited warranty that tries to be as close as we can get to being a warranty.

However, in addition and overriding all other warranties, the underlying intent is that this software is distributed “as is” and that the user is free to use it as they see fit. If you have any questions, concerns, or problems with the software, please reach out to the distribution manager or contact us at help.cctv@hanwha.com.

The GPL/LGPL software license is subject to the terms and conditions of the GNU General Public License and the Lesser General Public License (if applicable). You may obtain the complete Corresponding Source code from us for a period of three years after our last shipment of this product by sending email to help.cctv@hanwha.com.

If you want to obtain the complete Corresponding Source code in the physical medium such as CD-ROM, the cost of physically performing source distribution might be charged.

We are committed to providing you with the highest quality software available. If you have any questions or concerns, please do not hesitate to contact us at help.cctv@hanwha.com.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

You must read these terms carefully. You should not use this software if you do not agree to them. They are necessary to protect our rights and yours. For your convenience, a plain text copy of the full license is provided at the end of this announcement.

General Terms

The “Program”, below, refers to any such program or work, and a “work based on the Program” means either the Program or any derivative work under copyright law : that is to say, a work containing the Program or a portion of it, either verbatim or with modification and/or translated into another language.

The “License”, below, refers to the full text of this document, including all of the terms and conditions, and to the equivalence of any other written agreement between us with the same meaning.

The “Program”, below, refers to any such program or work, and a “work based on the Program” means either the Program or any derivative work under copyright law : that is to say, a work containing the Program or a portion of it, either verbatim or with modification and/or translated into another language.

The “License”, below, refers to the full text of this document, including all of the terms and conditions, and to the equivalence of any other written agreement between us with the same meaning.

1. Definitions

a) “Copyright Holder” means each individual or entity that obtained copyright ownership of the Program.

b) “Original Author” means each individual or entity that made a fundamental contribution to the creation of the Program.

c) “Source Code” means the computer readable form of the Program including all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable.

2. Source Code License

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License.

(Expections of the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or control your rights to work written entirely by you ; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program. In addition, mere aggregation of another work not based on the Program with the Program or with a work based on the Program does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2)in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following :

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange ; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange ; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the object code with such an offer, in accord with subsection 1 above.) The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major
components (composer, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable. If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place as counts as distribution of the source code, even through third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License.

However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

You are welcome to redistribute it under certain conditions; type 'show c' for details.

2. Basic Permissions. All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly authorizes you to run the unmodified Program. The output from running a covered work is covered by this License if only the output results derived from your combination of the Program (or a relevant portion thereof) and a copy of the Program (or a relevant portion thereof) are combined. A derivative of such output is covered by this License if the output and the Program are combined in a manner such that the resulting work, without modification by you, would fall within the definition of an object form, or could only become one by means of modifications not permitted by this License. However, if you add your work to the Program, the derivative of the Program excluding your work is not subject to this License; furthermore, if you share or distribute either the Program or a work that you combine with the Program, the recipient of such a share or distribution receives this License, and you must include a copy of this License with every copy of the Program you distribute. You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to a third party for a fee if the third party agrees to terms no less protective of your copyright interests and provides you with a written agreement to the effect that they do so.

3. Protecting Users' Legal Rights From Anti-Circumvention Law. This License explicitly authorizes you to run the unmodified Program. The output from running a covered work is covered by this License if only the output results derived from your combination of the Program (or a relevant portion thereof) and a copy of the Program (or a relevant portion thereof) are combined. A derivative of such output is covered by this License if the output and the Program are combined in a manner such that the resulting work, without modification by you, would fall within the definition of an object form, or could only become one by means of modifications not permitted by this License. However, if you add your work to the Program, the derivative of the Program excluding your work is not subject to this License; furthermore, if you share or distribute either the Program or a work that you combine with the Program, the recipient of such a share or distribution receives this License, and you must include a copy of this License with every copy of the Program you distribute. You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to a third party for a fee if the third party agrees to terms no less protective of your copyright interests and provides you with a written agreement to the effect that they do so.

4. Conveying Modified Source Versions. You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that this License and any other relevant proprietary or permissive license terms apply.

c) If the work was modified and you have added other code that was not originally part of the work, this License applies solely to the new code that you added.

d) If the work was modified and you have added other code that was originally part of the work, this License applies to the code you added as well as to the modified work as a whole.

5. Conveying Non-Source Forms. You may convey a covered work, or parts thereof, under the terms of this License provided that you also meet all of these conditions:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years, to give the same user the ability to copy the object code under terms no less protective of your copyright interests and provided you include a copy of this License with every copy of the product containing or deriving from the object code.

b) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source to all those who would receive the object code under these conditions. This License explicitly authorizes you to distribute a covered work from the site that hosts the Corresponding Source under the conditions stated in this section. The Corresponding Source must either be the unmodified Source Code, or the Corresponding Source distributed with the object code under this agreement.

c) Convey the object code by offering access from a physical medium customarily used for software interchange.

6. conveying non-Source forms.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that this License and any other relevant proprietary or permissive license terms apply.

c) If the work was modified and you have added other code that was not originally part of the work, this License applies solely to the new code that you added.

d) If the work was modified and you have added other code that was originally part of the work, this License applies to the code you added as well as to the modified work as a whole.

7. Additional Terms. "Additional terms" are terms that supplement the terms of this License by making exceptions or adding limitations to it. Additional permissions under this License are excepted only if they are included in version 1.0 of this License, or acquired as described below. Additional terms are considered "notified" unless they are within the notice section of this License. Additional terms are considered "notified" for the purpose of this License only if they have been published prior to 1 January 2000 (that is, before version 1.0 of this License was published) or (b) the conditions specified in paragraph (e) are followed, as theChoos freezes. Additional terms cannot make software that is distributable under the License subject to any more limiting conditions than this License provides. Additional terms may add to the socialife of the work, but do not incorporate it. The requirements of this section do not apply to any other license in any other way. If you add or remove additional terms to a covered work, you indicate your acceptance of this License to do so.

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified and installed, or for the User Product in which it has been modified and installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network. Consequences other than termination of a user's rights under this License are not considered material or adverse changes.

Any attempt otherwise to propagate or modify it is void, and will automatically terminate your License under this License and any other right to propagate this work. You must make a good faith effort to contact the person who distributed the work before propa ga ting it. If the person from whom you received the work does not grant you similar privileges when you distribute the work, you may not propagate it. The requirement to provide Installation Information does not include a requirement to provide support service, warranty, or updates for a work that has been modified and installed, or for the User Product in which it has been modified and installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network. Consequences other than termination of a user's rights under this License are not considered material or adverse changes. The requirements of this section do not apply to any other license in any other way.
If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply

16. Limitation of Liability.

17. Interpretation of Sections 15 and 16.

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.

2. Redistributions in source form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or

3. All advertising materials mentioning features or use of this software must display the above copyright notice, this list of conditions and the following disclaimer.

lighttpd is a secure, fast, compliant, and very flexible webserver that has been optimized for high-performance environments. It has a very low memory footprint compared to other web servers and takes care of outbound. Its advanced features-set (FastCGI, CGI, Auth, Output Compression, URI Rewriting, and many more) make lighttpd the perfect webserver for every server that suffers load problems. Simple Network Management Protocol (SNMP) is an International standard protocol for managing devices on IP networks. It is used mostly in network management systems to monitor the devices attached to the network for conditions that need administrative attention. Net-SNMP is a suite of applications used to implement SNMPv1, SNMPv2, and SNMPv3 using both IPv4 and IPv6. For more additional information, send email to hello@cvs/iwhaha.com.

Mozilla Public License

Since we, as a Hanwha Techwin, used the Mozilla Firefox component without modifying the source code according to the Mozilla Public License 1.1, we are not obliged to provide the source code of the corresponding component.

• Version 1.1

1. Definitions
1.0.1. "Commercial Use" means distribution or otherwise making the Covered Code available to a third party.
1.1. "Contributor" means each entity that creates or contributes to the creation of Modifications.
1.2. "Contributor Version" means the combination of the Original Code, prior Modifications made by a Contributor, and the Modifications made by that particular Contributor.
1.3. "Covered Code" means the Original Code or Modifications or the combination of the Original Code and Modifications, in each case including portions thereof.
1.4. "Electronic Distribution Mechanism" means a mechanism generally accepted in the software development community for the electronic transfer of data.
1.6. "Initial Developer" means the individual or entity identified as the Initial Developer in the Source Code notice required by Exhibit A.
1.7. "Large Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.
1.8. "License" means this document.
1.8.1. "Licensable" means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.
1.9. "Modifications" means any addition to or deletion from the structure or substance of either the Original Code or any previous Modifications. When Covered Code is released as a series of files, a Modification is:
A. Any addition to or deletion from the contents of a file containing Original Code or previous Modifications.
B. Any new file that contains any part of the Original Code or previous Modifications.
1.10. "Original Code" means Source Code of computer software code which is described in the Source Code notice required by Exhibit A as Original Code, and which, at the time of its release under this License is not already Covered Code governed by this License.
1.10.1. "Patched Code" means any patched code (r), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.
1.1. "Source Code" means the preferred form of the Covered Code for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an Executable, or source code differential comparisons against either the Original Code or another well known, available Covered Code of the contributor's choice. The Source Code can be in a compressed or archival form, provided the appropriate decompression or de-archiving software is widely available for no charge.

1.2. "Your Code" includes Covered Code which You create or modify under the terms of this License and which You then make available to the public (in whole or in part) under the terms of this License.

1.3. "Contribution" means the Source Code and Executable Code of the Contributor's choice contributed to the Covered Code under the terms of this License, which may include Portions of Covered Code made by the Contributor under the terms of Sections 2.1 and/or 2.2.

2. Source Code Licenses

2.1. The Initial Developer Grant. The Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer to use, reproduce, modify, sublicense and distribute the Initial Code, with or without Modifications, and/or as part of a Larger Work; and

(b) under Patents Claims infringed by the making, using or selling of Original Code, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Code (or portions thereof).

(c) the licenses granted in Section 2.1(a) and (b) are effective on the date Initial Developer first distributes Original Code under the terms of this License.

2.2. Contributor Grant. Subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor to use, reproduce, modify, sublicense and distribute the Covered Code, with or without Modifications, and/or as part of a Larger Work; and

(b) under Patents Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of the Modifications (or portions thereof); and

2.3. Availability of Source Code. Any Modification which You create or to which You contribute must be made available in Source Code form under the terms of this License either on the same media as an Executable version or via an accepted Electronic Distribution Mechanism to anyone to whom you made an Executable version available.

2.4. Availability of Executable Code. If You distribute Executable Form of Covered Code, You may choose the Media and format of distribution provided that the Modifications made by that Contributor either alone and/or in combination with its Contributor Version are not distributed with the Covered Code on a Media bearing a notice that it contains additions made to the Covered Code, unless those Modifications make the same claim and the party making the claim in detail that a recipient will know whom to contact. If Contributor obtains such knowledge after the Modifications made are available described in Section 3.2, Contributor shall promptly modify the LEGAL file in all copies Contributor distributes, or if the Modifications were described in a notice in an Executable version or related documentation in which You describe the origin or ownership of the Covered Code, then Contributor shall use reasonable efforts to cause the Modifications to be modified in the Source Code and Executable Code to reflect the same claim.

3. Intellectual Property Rights

3.1. Third Party Claims. If Contributor has knowledge that a license under a third party's intellectual property rights is required to exercise the rights granted by such Contributor under Sections 2.1 or 2.2, Contributor must include a text file with the Source Code distribution titled “LEGAL'' which describes the claim and the party under whose rights the claim is made. The file must be well formatted and well known, available Covered Code of the Contributor's choice. The Source Code can be in a compressed or archival form, provided the appropriate decompression or de-archiving software is widely available for no charge.

3.2. Distribution Obligations.

(a) You must make available as Source Code under the terms of this License all Covered Code distributed in Executable Form.

(b) You must make all Covered Code available in Executable Form under the terms of this License, whether or not such Covered Code is based on or derived from the Covered Code which is available under Source Code Form.

(c) You must make the Source Code and any notice of Source Code Form distribution available to You, or if You do not distribute Source Code Form, then to any recipient of Executable Form.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: 1) for code that You delete from the Original Code; 2) separate from the Original Code; or 3) for infringements caused by: i) the modification of the Original Code or ii) the combination of the Original Code with other software or devices.

3.3. Contributor Grant. Subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor to use, reproduce, modify, sublicense and distribute the Covered Code, with or without Modifications, and/or as part of a Larger Work; and

(b) under Patents Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of the Modifications (or portions thereof); and

2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) the licenses granted in Sections 2.2(a) and (b) are effective on the date Contributor first makes Commercial Use of the Covered Code.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: 1) for any code that Contributor has deleted from the Contributor Version; 2) separate from the Contributor Version; or 3) for infringements caused by: i) the modification of the Original Code or ii) the combination of the Original Code with other software or devices.

3.4. Description of Modifications. You must cause all Covered Code you contribute to contain a file documenting the changes You made to the Covered Code and the date of any change. You must include a prominent statement that the Modification is derived, directly or indirectly, from Original Code provided by the Initial Developer and includes names of copyright owners of the Modifications made by that Contributor.

3.5. Source Code Modifications. If you make any source code modifications, you must make the same modifications to the Source Code.

3.6. Contributor APIs. If Contributor's Modifications include an application programming interface and Contributor has knowledge of patent licenses which are reasonably necessary to implement that API, Contributor must also include this information in the LEGAL file.

3.7. Representations.

(a) Representations that exist, as disclosed pursuant to Section 3.4(a) above, Contributor believes that Contributor's Modifications are Contributor's original creations.

(b) Representations that, to the best of Contributor's knowledge, no patent license is required for the Contributor to distribute the Modifications made by that Contributor.

3.8. Required Notifications. You must notify the Initial Developer and every Contributor whose copyright is identified in the Source Code or whose copyright is reasonably ascertainable through the Source Code, and with whom You have not fulfilled the obligations of Section 3.2, of the following:

(a) whether You have fulfilled the obligations of Section 3.2, the notice must be conspicuously included in any notice in an Executable version, related documentation or collateral in which You describe recipients' rights relating to the Covered Code. You may distribute the Executable version of Covered Code or ownership rights under a license of Your choice, which may contain different terms from this License, provided that You are in compliance with the terms of this License and that the license for the Executable version does not attempt to limit or alter the recipient's rights in the Source Code version from the rights set forth in this License. If You distribute the Executable version under a different license You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or any Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You have incorporated into Your version of the Covered Code.

(b) 3.8. Larger Works. You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License and distribute the Larger Work as a whole, subject to the restrictions of Section 2.2. You must make a reasonable attempt to create a Larger Work so that the Modifications made by You and any other Contributor under the terms of this License, if any, can be made available to all royalty free, non-exclusive license holders of the Covered Code under the terms of this License.

3.9. Liability for Infringements.

(a) For any third party patent infringement claim covered by the licenses granted to You under Sections 2.1 and/or 2.2, You hereby agree to indemnify, defend, and hold each Initial Developer and other Contributor harmless from and against any costs, liability, and expenses arising out of or related to any such third party patent infringement claim.

4. Ability to Comply Due to Statute or Regulation.

If it is impossible for You to comply with any of the terms of this License with respect to the Original Code or any Contributor Version, if You are notified in writing by the parties that the rights granted under this License are invalid and/or unenforceable for any purpose for which they were granted to You (either in general or for particular portions of the Covered Code), if You contact the Initial Developer or an individual Contributor holding the patent or trademark rights, if applicable, and if You are not able to obtain a written confirmation that You can distribute Covered Code in the manner specified in the written notification or otherwise obtain a complete, full, and material written license under valid and enforceable terms from the entity or entities holding the patent or trademark rights to grant the necessary rights granted by this License, then You must: (a) cease distribution of the Covered Code or any portion thereof until such time as Your rights to distribute such Covered Code are clarified, or (b) if the Covered Code cannot be distributed without infringing such rights, return all of the Covered Code contributed by You to the Initial Developer or individual Contributor holding the necessary rights.

5. Application of this License

This License applies to code to which the Initial Developer has attached the notice in Exhibit A and to related Covered Code.

6. Versions of the License

6.1. New Versions. Netscape Communications Corporation (“Netscape”) may publish revised and/or new versions of the License from time to time. Each version will be given a distinguishing version number.

6.2. Effect of New Version. Unless meth Authorized Hereunder EXCEPT UNDER THE DISCLAIMER. Covered Code is PROVIDED UNDER THIS LICENSE ON AN “AS IS” BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED. INCLUDING WITHOUT LIMITATION, WARRANTIES THAT THE COVERED CODE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE COVERED CODE PROVIDED HEREUNDER IS PROVIDED “AS IS” AND WITHOUT ANY WARRANTY, EXPRESS OR IMPLIED. IF ANY APPLICABLE LAW PROHIBITS THIS EXCLUSION AND LIMITATION, THEN THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU. 10. U.S. GOVERNMENT END USERS. JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU. 11. Miscellaneous.

The Covered Code is a “commercial item,” as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of “commercial computer software” and “commercial computer software documentation” as such terms are used in 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Code with only those rights set forth herein.

11. Miscellaneous

This License represents the complete agreement concerning subject matter heretofore, if any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by California law provisions (except to the extent applicable law, if any, provides otherwise) with respect to disputes arising out of or relating to the use, the meaning or interpretation of this License, its breach, its termination, or other aspects of the License. In any such case, the parties agree to submit to the jurisdiction of the Federal Courts of the Northern District of California, with venue lying in Santa Clara County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which
provides that the language of a contract shall be construed against the drafter shall not apply to this License.

12. RESPONSIBILITY FOR CLAIMS.
As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and you agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute an admission of liability.

13. MULTIPLE-LICENSED CODE.

Initial Developer may designate portions of the Covered Code as Multiple-Licensed. Multiple-Licensed means that the Initial Developer permits you to utilize portions of the Covered Code under the MPL or the alternative license, if any, specified by the Initial Developer in the file described in Exhibit A.

EXHIBIT A - Mozilla Public License.

The contents of this file are declared to be those of the Mozilla Public License Version 1.1 ("the License"); you may not use this file except in compliance with the License. You may obtain a copy of the License at http://www.mozilla.org/MPL.

This Software is distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, either express or implied. See the License for the specific language governing rights and limitations under the License.

The Original Code is: ansi2knr.c

The Initial Developer of the Original Code is: L. Peter Deutsch

Portions created by: Aladdin Enterprises
All Rights Reserved.

Alternatively, the contents of this file may be used under the terms of the ______ License, in which case the provisions of ________ License are applicable instead of those above. If you wish to allow use of your version of this file only under the terms of the ________ License and not to allow others to use your version of this file under the MPL, indicate your decision by deleting the provisions above and replace them with the notice and other provisions required by the ________ License. If you do not delete the provisions above, a recipient may use your version of this file under either the MPL or the ________ License.

NOTE: The text of this Exhibit A may differ slightly from the text of the notices in the Source Code files of the Original Code. You should use the text of this Exhibit A rather than the text found in the Original Code Source Code for Your Modifications.

The Independent JPEG Group's JPEG Software

The software included in this product contains copyrighted software that is licensed under the JPEG license.

- JPEG license
  - Code project : Generating Blank GIF File by JPEG

This distribution contains the sixth public release of the Independent JPEG Group's free JPEG software. You are welcome to redistribute this software and to use it for any purpose, subject to the conditions under LEGAL ISSUES, below.

Serious users of this software (particularly those incorporating it into larger programs) should contact US at jpeg-info@uunet.uu.net to be added to our electronic mailing list. Mailing list members are notified of updates and have a chance to participate in technical discussions.

This software is the work of Tom Lane, Philip Gladstone, Jim Boucher, Lee Crocker, Julian Minguillon, Luis Ortiz, George Phillips, Davide Rossi, Guido Vollbeding, Ger Welgers, and other members of the Independent JPEG Group.

U.S. Government Rights

U.S. Government Users Restricted Rights - Use, duplication or disclosure restricted by GSA ADP Schedule Contract with Oracle Corp.

LEGAL ISSUES

--------------

In plain English:

1. We don't promise that this software works. (But if you find any bugs, please let us know!)
2. You can use this software for whatever you want. You don't have to pay us.
3. You may not pretend that this software is your own. If you use it in a program, you must acknowledge somewhere in your documentation that you've used the U.S.

In legalese:

The authors make NO WARRANTY or representation, either express or implied, with respect to this software, its quality, accuracy, merchantability, or fitness for a particular purpose. This software is provided "AS IS", and you, its user, assume the entire risk as to its quality and accuracy.

This software is copyright (C) 1991-1999, Thomas G. Lane. All Rights Reserved except as specified below.

Permission is hereby granted to use, copy, modify, and distribute this software (or portions thereof) for any purpose, without fee, subject to these conditions:

If any part of the source code for this software is distributed, then this README file must be included, with this copyright and no-warranty notice unaltered, and any additions, deletions, or changes to the original files must be clearly indicated in accompanying documentation.

If only executable code is distributed, then the accompanying documentation must state that this software is based on work in part of the Independent JPEG Group.

Permission for use of this software is granted only if the user accepts full responsibility for any undesirable consequences; the authors accept NO LIABILITY for damages of any kind.

These conditions apply to any software derived from or based on the U.S., not just to the unmodified library. If you use our work, you ought to acknowledge us.

Permission is NOT granted for the use of any U.S. author's name or company name in advertising or publicity relating to this software or products derived from it. This software may be referred to only as "the Independent JPEG Group's software."

As specifically permitted by the original source code license, this software may be distributed and modified in source code form by users of this derivative work. Further redistribution is possible as long as the copyright and no-warranty notice above are preserved, and provided that the above copyright notice and this permission notice are preserved.

1. Scope of License Agreement

1.1 This License Agreement sets forth the rights and conditions of use applicable to the source code of T-Kernel distributed by T-Engine Forum and any derivative work created therefrom.

2. Article 2. Definition

2.1 "T-Kernel" means a real-time operating system controlled and distributed by T-Engine Forum on behalf of the copyright holder thereof.

2.2 "Source Code" means a source program, including related comments and documentation, for the T-Kernel and the Ported Source Code defined in Article 2.8 which is registered with T-Engine Forum.

2.3 "Hardware-dependent Part" means the part of the Source Code which depends on hardware and needs to be changed when the Source Code is ported and operated on the target hardware, and is designated and separated as such part.

2.4 "Compiler-dependent Part" means the part of the Source Code which depends on compiler and needs to be changed when the Source Code is ported and operated on the target hardware, and is designated and separated as such part.

2.5 "Header File" means the part of the Source Code which contains definitions necessary to develop application programs.

2.6 "T-Engine Hardware" means the hardware which is manufactured in accordance with the T-Engine Hardware specifications or the µT-Engine Hardware specifications issued by T-Engine Forum, and registered with T-Engine Forum.

2.7 "Similar Hardware to T-Engine Hardware" means any hardware including software which emulates hardware other than that defined in Article 2.6 above, on which the T-Kernel can be operated.

2.8 "Ported Source Code" means a source program produced from the Source Code by modifying only its Hardware-dependent Part and/or Compiler-dependent Part to enable it to be operated on the T-Engine Hardware or the Similar Hardware to T-Engine Hardware. The Ported Source Code which is registered with T-Engine Forum shall be included in the Source Code.

2.9 "Modified Source Code" means a source program modified from the Source Code for the purpose of improving its performance, increasing or decreasing its function, and the like. The Ported Source Code shall not be included in the Modified Source Code.

2.10 "Binary Code" means an executable code form which is created by compiling programs, which include all or part of the Source Code or the Modified Source Code.

2.11 "Derivative Work" means the Modified Source Code or the Binary Code.

2.12 "Embedded Product" means any product which operates with executable code form of the Source Code, the Modified Source Code or the Binary Code loaded on its Hardware.

2.13 "End User" means a consumer who uses the Embedded Product.

2.14 "System Developer" means any person who develops the Embedded Product by itself or has a third party develop the same, and provides, whether with or without payment, the End User with the Embedded Product.

2.15 "Distributor of Modification" means any person who produces the Modified Source Code and, whether with or without payment, distributes the same to any third party.
16. "Patch for Modification" means a difference, program, system, or the like in order to create the Modified Source Code from the Source Code or the Binary Code thereof.

17. "Vicarious Execution of Patch Processing" means vicarious execution service to create the Modified Source Code applying the Patch for Modification to the Source Code or the Binary Code thereof.

19. "Distribution" means any of the following acts:
   1. to transmit a work to a large number of specific persons through the Internet communication, broadcasting, and the like;
   2. to transmit a work to the general public through the Internet communication, broadcasting, and the like automatically in response to a request from the public; and
   3. to distribute a copy of a work to the general public or a large number of specific persons.

Article 3. Copyright
1. The copyrights of the Source Code shall be owned by Ken Sakamura.

Article 4. License of Source Code
1. As provided for in this Article, T-Engine Forum shall provide, and grant a license to use, the Source Code free of charge to any person who has taken the necessary procedure for registration as prescribed by T-Engine Forum and agreed to the T-License.

3. In accordance with the license granted under Article 4.1 above, the Source Code User may perform the following acts:
   1. to copy and/or modify the Source Code provided by T-Engine Forum hereunder for its own research, development, and the like;
   2. to run the Source Code provided by T-Engine Forum hereunder for its own research, development and the like;
   3. to run the Source Code modified in accordance with the provision of Article 4.3 (1) above for its own research, development and the like;
   4. to distribute the Binary Code created from the Source Code provided by T-Engine Forum hereunder or from the Source Code modified in accordance with the provision of Article 4.3 (1) above.

4. In accordance with the license granted under Article 4.1 above, the System Developer may perform the following acts:
   1. to perform any and all acts set forth in the Article 4.3 above;
   2. to develop and manufacture the Embedded Product containing the Binary Code, and, whether with or without payment, provide the End User with the same and make the Binary Code available to the End User on the Embedded Product.

5. The Source Code User and the System Developer shall be obligated to give a notice that the Source Code is used, in such a way as separately specified by T-Engine Forum, when they use the Source Code or the Binary Code, or make the Binary Code available for the End User on the Embedded Product.

Article 5. Distribution of Modified Source Code
1. Any of A- members of T-Engine Forum may become the Distributor of Modification by obtaining the approval of T-Engine Forum through the registration procedure as prescribed by the Forum provided that only the department of the A- member which has taken the registration procedure may distribute the Modified Source Code in such a way as provided for in this Article as long as it holds the A-membership.

2. The Distributor of Modification may create the Modified Source Code based on the Source Code provided by T-Engine Forum and the Patch for Modification to be applied to create such Modified Source Code from the Source Code.

3. The Distributor of Modification shall, prior to the distribution, inform T-Engine Forum of and register a name and description of the Modified Source Code in such a way as specified by T-Engine Forum.

4. The Distributor of Modification shall determine the name of the Modified Source Code subject to the rules separately established by T-Engine Forum and publish an appropriate notice as required by the rules on the Patch for Modification and the Modified Source Code.

5. The Distributor of Modification may distribute the Modified Source Code to a third party, whether with or without payment, provided that the Distributor of Modification shall take the necessary measures to prohibit the third party from making the re-Distribution of the Modified Source Code.

6. Developer with the Patch for Modification. Provided, however, that the Distributor of Modification shall be obligated to confirm that the System Developer is the Source Code User duly licensed under Article 4.1.

7. The Distributor of Modification may perform the Vicarious Execution of Patch Processing for the System Developer.

8. The System Developer shall not distribute the Modified Source Code in further modified form to any third party as a stand-alone software product.

9. The System Developer may, under the same obligation as imposed in Article 4.5, make the Embedded Product available for the End User through use of the Patch for Modification distributed by the Distributor of Modification or the Derivative Works obtained through the Vicarious Execution of Patch Processing.

Article 6. Distribution and Registration of the Ported Source Code
1. The Source Code User and the System Developer may, whether with or without charge, distribute to any third party only the following parts of the Ported Source Code on the T-Engine Hardware or the Similar Hardware to T-Engine Hardware:
   1. The Hardware-dependent Part and/or Compiler-dependent Part, provided that the Source Code User and the System Developer shall inform T-Engine Forum of, and T-Engine Forum may publish, a method for distributing said Part(s) to third parties;
   2. The Header File, provided that the Header File shall be distributed together with the Binary Code of the Ported Source Code.
   2. Any member of T-Engine Forum may request T-Engine Forum to register and distribute, as an original source code for T-Kernel, the Ported Source Code on the T-Engine Hardware or the Similar Hardware to T-Engine Hardware.

2. Any member of T-Engine Forum who requests the distribution mentioned in the preceding paragraph shall accord to the following conditions:
   1. The member shall confirm that the object hardware is the T-Engine Hardware or the Similar Hardware to T-Engine Hardware.
   2. The member shall provide T-Engine Forum with a complete set of operational environment for the object hardware and T-Kernel free of charge when requesting the distribution.

2. The member shall submit test results of the Ported Source Code to T-Engine Forum when requesting the distribution.

4. In the event that T-Engine Forum accepts the request mentioned in Article 6.2, T-Engine Forum shall register and distribute the Ported Source Code as the Source Code for T-Kernel. Provided, however, that the Ported Source Code may be treated in the same way as the Modified Source Code until the time of registration hereunder.

5. The provision set forth in Article 3 shall apply to the Ported Source Code registered in accordance with this Article.

Article 7. Use for Other Purpose
1. Any use of the Source Code, the Modified Source Code or the Ported Source Code other than those stipulated in Articles 4, 5 and 6 shall be subject to the prior approval of T-Engine Forum.

Article 8. Limited Warranty
1. T-Engine Forum and the copyright holder of the Source Code warrant that the Source Code does not infringe third party's copyrights. Provided, however, that T-Engine Forum and the copyright holder of the Source Code make no warranty as to the Hardware-dependent Part and/or Compiler-dependent Part set forth in Article 6.2 in the Ported Source Code by any third party.

3. Neither T-Engine Forum nor the copyright holder of the Source Code warrants that the Source Code does not infringe any third party's industrial property rights. In no event shall T-Engine Forum and the copyright holder of the Source Code be liable for any dispute which may arise between the Source Code User and a third party in connection with the third party's industrial property rights.

Article 9. Indemnity
1. Neither T-Engine Forum nor the copyright holder of the Source Code shall be liable for any damages (including, but not limited to, damages resulting from loss of profit, business interruption, loss of business information or any other pecuniary damage) arising out of use or impossibility of use of the Source Code, even if T-Engine Forum and the copyright holder have been informed of the possibility of such damages.

Article 10. Breach of Agreement
1. In case that T-Engine Forum considers that this License Agreement is breached or that the popularization of T-Kernel is obstructed, T-Engine Forum shall take measures to correct such breach or such obstruction, take measures on the ground of copyright infringement, or take any other necessary measures against the breaching person or the obstructing person, regardless of whether or not the said person is a member of T-Engine Forum.

2. In case of breach of this License Agreement by a member of T-Engine Forum, T-Engine Forum may take appropriate measures against the member, for example, the member is disqualified from membership, depending on what kind of breach has been committed by it.

3. Any legal dispute which may arise in relation to any breach of this License Agreement shall be subject to the exclusive jurisdiction of the Tokyo District Court.

Article 11. Governing Law and Language
1. This License Agreement shall be governed by and interpreted under the laws of Japan.

2. This License Agreement is executed in both Japanese text and English text provided that the Japanese text shall govern the interpretation and performance of this License Agreement.

Correct Disposal of This Product (Waste Electrical & Electronic Equipment)

(Applicable in the European Union and other European countries with separate collection systems)

This marking on the product, accessories or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product and its electronic accessories should not be mixed with other commercial wastes for disposal.

Correct disposal of batteries in this product

(Applicable in the European Union and other European countries with separate battery return systems.)

This marking on the battery, manual or packaging indicates that the batteries in this product should not be disposed of with other household waste at the end of their working life. Where marked, the chemical symbols Hg, Cd or Pb indicate that the battery contains mercury, cadmium or lead above the reference levels in EC Directive 2006/66. If batteries are not properly disposed of, these substances can cause harm to human health or the environment.

To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system.
