- Design and specifications are subject to change without prior notice.
- The initial administrator ID is “admin” and the password should be set when logging in for the first time.
  Please change your password every three months to safely protect personal information and to prevent the damage of the information theft.
  Please, take note that it’s a user’s responsibility for the security and any other problems caused by mismanaging a password.
IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean the contaminated area on the product surface with a soft, dry cloth or a damp cloth. (Do not use a detergent or cosmetic products that contain alcohol, solvents or surfactants or oil constituents as they may deform or cause damage to the product.)
7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. This product is intended to be supplied by a Listed Power Supply Unit marked “Class 2” or “LPS” and rated from PoE(48V), 0.14A. (QNF-8010)
16. This product is intended to be supplied by a Listed Power Supply Unit marked “Class 2” or “LPS” and rated from PoE(48V), 0.17A. (QNF-9010)
17. This product is intended to be supplied by isolation power.
18. If you use excessive force when installing the product, the camera may be damaged and malfunction.
19. Do not install the product in a place where chemical substances or oil mist exists or may be generated. As edible oils such as soybean oil may damage or warp the product, do not install the product in the kitchen or near the kitchen table. This may cause damage to the product.
20. When installing the product, be careful not to allow the surface of the product to be stained with chemical substance.
21. If you install/disassemble the product in a manner that has not been recommended, the production functions/performance may not be guaranteed. Install the product by referring to “Installation & connection” in the user manual.
22. Installing or using the product in water can cause serious damage to the product.

WARNING
TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE. DO NOT INSERT ANY METALLIC OBJECT THROUGH THE VENTILATION GRILLS OR OTHER OPENINGS ON THE EQUIPMENT.

Apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.

To prevent injury, this apparatus must be securely attached to the Wall/ceiling in accordance with the installation instructions.

CAUTION

EXPLANATION OF GRAPHICAL SYMBOLS

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.
Class I construction
An apparatus with CLASS I construction shall be connected to a MAINS socket outlet with a protective earthing connection.

Battery
Batteries (battery pack or batteries installed) shall not be exposed to excessive heat such as sunshine, fire or the like.
The battery cannot be replaced.

Disconnection Device
Disconnect the main plug from the apparatus, if it’s defected. And please call a repair man in your location.

When used outside of the U.S., it may be used HAR code with fittings of an approved agency is employed.

CAUTION
RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

ATTENTION
IL Y A RISQUE D’EXPLOSION SI LA BATTERIE EST REMPLACÉE PAR UNE BATTERIE DE TYPE INCORRECT. METTRE AU REBUT LES BATTERIES USAGÉES CONFORMÉMENT AUX INSTRUCTIONS.

These servicing instructions are for use by qualified service personnel only. To reduce the risk of electric shock do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.
The VIDEO out terminal of the product is provided for easier installation, and is not recommended for monitoring purposes.

Please use the input power with just one camera and other devices must not be connected.
The ITE is to be connected only to PoE networks without routing to the outside plant.
The wired LAN hub providing power over the Ethernet (PoE) in accordance with IEEE 802-3af shall be a UL Listed device with the output evaluated as a Limited Power Source as defined in UL60950-1.

Unit is intended for installation in a Network Environment 0 as defined in IEC TR 62102. As such, associated Ethernet wiring shall be limited to inside the building.

Please read the following recommended safety precautions carefully.
• Do not place this apparatus on an uneven surface.
• Do not install on a surface where it is exposed to direct sunlight, near heating equipment or heavy cold area.
• Do not place this apparatus near conductive material.
• Do not attempt to service this apparatus yourself.
• Do not place a glass of water on the product.
• Do not install near any magnetic sources.
• Do not block any ventilation openings.
• Do not place heavy items on the product.
• Please wear protective gloves when installing/removing the camera.
The high temperature of the product surface may cause a burn.

User’s Manual is a guidance book for how to use the products.
The meaning of the symbols are shown below.
• Reference : In case of providing information for helping of product’s usages
• Notice : If there’s any possibility to occur any damages for the goods and human caused by not following the instruction
• Please read this manual for the safety before using of goods and keep it in the safe place.

We do not guarantee the quality of third-party products (e.g. lenses, accessories) that you separately purchase.
## CONTENTS

### OVERVIEW
1. Important Safety Instructions  
2. Recommended PC Specifications

### APPENDIX
1. Specification  
2. Product Overview  
3. Troubleshooting  
4. Open Source Announcement
RECOMMENDED PC SPECIFICATIONS

- CPU: Intel(R) Core(TM) i7 3.4 GHz or higher
- RAM: 8G or higher
- Supported OS: Windows 7, 8.1, 10, Mac OS X 10.12, 10.13, 10.14
- Recommended browser: Google Chrome
- Supported browsers: MS Explore11, MS Edge, Mozilla Firefox (Windows 64bit only), Apple Safari (Mac OS X only)
- VGA: PCIe 256MB GDDR3 video graphics card or higher
* Some functions may be restricted even in supported browsers.

RECOMMENDED MICRO SD/SDHC/SDXC MEMORY CARD SPECIFICATIONS

- Recommended capacity: 16GB to 256GB (MLC type)
- Recommended Manufacturers: SanDisk, Transcend
- Product Type: High endurance
- The compatibility varies depending on the card manufacturers and types.

NAS RECOMMENDED SPECS

- Recommended capacity: 200GB or higher is recommended.
- For this camera, you are recommended to use a NAS with the following manufacturer’s specs.
  Recommended products: QNAP NAS, Synology NAS

WHAT’S INCLUDED

Please check if your camera and accessories are all included in the product package.
(As for each sales country, accessories are not the same.)

INSTALLATION

Precautions before installation
Ensure you read out the following instructions before installing the camera:
• Select an installation site that can hold at least 5 times the camera’s weight.
• Stuck-in or peeled-off cables can cause damage to the product or a fire.
• For safety purposes, keep anyone else away from the installation site.
  And put aside personal belongings from the site, just in case.

Disassembling
1. Peel off the protective film from the lens.
2. Using the L-wrench provided, loosen 2 screws by turning them counterclockwise and separate the cover top.
   ▪ Note that it is not necessary to loosen the screws completely.
   ▪ After removing the protective film, do not touch the lens.

Installing the camera on the ceiling or a wall
1. Consider the direction to be monitored, attach the template, and drill holes by following the template.
   ▪ Set the < mark imprinted on the camera to face the direction of camera monitoring.
2. Using 2 tapping screws, fix the camera at 2 holes drilled with a template.
3. Connect the camera internal terminal with the corresponding cable.
4. Adjust the lens in a desired direction by referring to the “Adjusting the monitoring direction for the camera” section. (page 9)
5. Close the cover top and turn it clockwise using the L-wrench.
   ▪ If necessary, use it after removing the wire hole cover on the side of the cover top.
Adjusting the monitoring direction for the camera

- **Adjusting the monitoring direction**
  
  You can adjust the camera direction only when the camera is fixed on the ceiling. Where, Turning the lens on its axis is called Rotation.
  
  - The effective range of rotation is a total of ±180 degrees.

- **Methods of adjustment**
  
  To adjust the camera direction, grab the lens holder and turn it while looking at the direction display.

  - To adjust the camera monitoring direction, grab the lens holder and turn it.
  
  If you grab the lens to adjust the direction, the focus could be out or fingerprints could remain on the surface.

---

**INSERTING/REMOVING A MICRO SD MEMORY CARD**

- Disconnect the power cable from the camera before inserting the Micro SD memory card.
- Do not insert the Micro SD memory card while it's upside down by force. Otherwise, it may damage the Micro SD memory card.
- When it rains or the humidity is high, insertion or ejection of a Micro SD card is not recommended.

**Inserting a Micro SD Memory Card**

1. Separate the cover top of the camera.
2. Insert a Micro SD card in the arrow direction shown in the figure.
Removing a Micro SD Memory Card
Gently press down on the exposed end of the memory card as shown in the diagram to eject the memory card from the slot.

- Before removing the Micro SD memory card, in <Storage>, set the device to <Off> and press the [Apply] button and turn the camera off.
- If you turn off the camera or remove the Micro SD memory card that contains data from the product, the data may be lost or damaged.

POWERING AND NETWORKING
Connect the PoE device and camera’s PoE connectors.
- The VIDEO out terminal of the product is provided for easier installation, and is not recommended for monitoring purposes.
- Connect to a PoE (Power over Ethernet) enabled router’s PoE connector.
- Use PoE (Power over Ethernet) that is compliant with the IEEE802.3af protocols.

Network Cable Specification

<table>

- If you use a cable other than Category 5e standards, 100m of transmission distance is not guaranteed.
network connection and setup

You can set up the network settings according to your network configurations.

CONNECTING THE CAMERA DIRECTLY TO LOCAL AREA NETWORKING

Connecting to the camera from a local PC in the LAN
1. Launch an Internet browser on the local PC.
2. Enter the IP address of the camera in the address bar of the browser.

CONNECTING THE CAMERA DIRECTLY TO A DHCP BASED DSL/CABLE MODEM

1. Connect the user PC directly with the network camera.
2. Run the Device Manager and change the IP address of the camera so that you can use the web browser on your desktop to connect to the Internet.
3. Use the Internet browser to connect to the web viewer.
6. Move to [Basic] – [IP & Port], and set the IP type to [DHCP].
7. Connect the camera, which was removed from your PC, directly to the modem.
8. Restart the camera.

- A remote PC in an external Internet out of the LAN network may not be able to connect to the camera installed in the intranet if the port-forwarding is not properly set or a firewall is set. In this case, to resolve the problem, contact your network administrator.
- By factory default, the IP address will be assigned from the DHCP server automatically. If there is no DHCP server available, the IP address will be set to 192.168.1.100. To change the IP address, use the Device Manager. For further details on Device Manager use, refer to “Using Device Manager”. (Page 12)
- For information on how to set DDNS, refer to the online help of Web Viewer.
- For information on how to set the IP format, refer to the online help of Web Viewer.
network connection and setup

USING DEVICE MANAGER

- Device manager program can be downloaded from Technical Guides<Online Tool> menu at Hanwha Techwin website (http://www.hanwha-security.com).
- More instructions of Device Manager can be found at Help menu of the main page.

AUTOMATICALLY SEARCHING CAMERA

If a camera is connected to the same network of the PC where device manager is installed, you can find network camera by using search function.

1. Click Search at the main page of device manager.
2. Check the camera from the list.
   - Check MAC address at the sticker attached to the camera.

CONFIGURING IP ADDRESS

If you want to change camera network setting, Login OK sign must be displayed at Status. Click Authentication at the main page to log in.

Configuring Static IP

Manually insert and configure IP address & port information.

1. Click the camera from the list that you want the change the IP setting.
2. Click IP Assign at the main page of device manager.
3. Select Assign the following IP address.
   - IP information of the camera will be displayed as previously set.
4. Fill in IP & Port related categories.

If not using a Broadband Router

For setting IP Address, Subnet Mask, and Gateway, contact your network administrator.
- HTTP Port: Used to access the camera using the Internet browser, defaulted to 80.
- RTSP Port: A port that controls real-time streaming. The initial value is 554.

If using a Broadband Router

- IP Address: Enter an address falling in the IP range provided by the Broadband Router. ex) 192.168.1.2~254, 192.168.0.2~254, 192.168.XXX.2~254
- Subnet Mask: The Subnet Mask of the Broadband Router will be the Subnet Mask of the camera.
- Gateway: The Local IP Address of the Broadband Router will be the Gateway of the camera.

- The settings may differ depending on the connected Broadband Router model. For more information, refer to the user manual of the applicable router.
- For more information about port forwarding of the broadband router, refer to "Port Range Forward (Port Mapping) Setup". (Page 14)

If the Broadband Router has more than one camera connected

Configure the IP related settings and the Port related settings distinctly with each other.

ex)

<table>
<thead>
<tr>
<th>Category</th>
<th>Camera #1</th>
<th>Camera #2</th>
</tr>
</thead>
<tbody>
<tr>
<td>IP related settings</td>
<td></td>
<td></td>
</tr>
<tr>
<td>IP Address</td>
<td>192.168.1.100</td>
<td>192.168.1.101</td>
</tr>
<tr>
<td>Subnet Mask</td>
<td>255.255.255.0</td>
<td>255.255.255.0</td>
</tr>
<tr>
<td>Gateway</td>
<td>192.168.1.1</td>
<td>192.168.1.1</td>
</tr>
<tr>
<td>Port related settings</td>
<td></td>
<td></td>
</tr>
<tr>
<td>HTTP Port</td>
<td>8080</td>
<td>8081</td>
</tr>
<tr>
<td>RTSP Port</td>
<td>554</td>
<td>555</td>
</tr>
</tbody>
</table>

- If the HTTP Port is set other than 80, you must provide the Port number in the address bar of the Internet browser before you can access the camera. ex) http://IP address : HTTP Port http://192.168.1.100:8080

5. Click [Apply] Button.
6. If the success message is displayed, click [OK].
Configuring Dynamic IP

Receive IP address from DHCP

- Example of the Dynamic IP environment
  - If a Broadband Router, with cameras connected, is assigned an IP address by the DHCP server
  - If connecting the camera directly to modem using the DHCP protocols
  - If IPs are assigned by the internal DHCP server via the LAN

1. Click the camera from the list that you want to change the IP setting.
2. Click <IP Assign> at the main page of device manager.
3. Select <Obtain an IP address automatically (DHCP)>.
4. Click [Apply] button.
5. If the success message is displayed, click [OK].

Automatically Configuring IP

1. Click the camera from the list that you want to automatically configure the IP.
2. Click < at the main page of device manager.
3. At the menu, click <Auto IP Configure>.
4. Click [Close] button.

Manually Registering Camera

If the camera cannot be found using search function, the camera can be registered remotely by manually inserting IP information, if the camera is connected to external network.

1. Click <Add Devices> - <Manually Add Device> at the main page of device manager.
2. Insert the range of IP address that you search.
3. Select the <Model Name> of the camera that you register, and insert HTTP port, ID, and password.
4. Click [Register] button.
5. Check if camera is registered.
   - Check MAC address at the sticker attached to the camera.
PORT RANGE FORWARD (PORT MAPPING) SETUP

If you have installed a Broadband Router with a camera connected, you must set the port range forwarding on the Broadband Router so that a remote PC can access the camera in it.

Manual Port Range Forwarding

1. From the Setup menu of the Broadband Router, select <Applications & Gaming> - <Port Range Forward>. For setting the port range forward for a third-party Broadband Router, refer to the user guide of that Broadband Router.

2. Select <TCP> and <UDP Port> for each connected camera to the Broadband Router. The number of each port to be configured to the IP router should be set according to the port number designated in <Setup> - <Basic> - <IP & Port> on the camera web viewer.

3. When done, click [Save Settings]. Your settings will be saved.

- Port forwarding setting is an example of setting CISCO IP router.
- The settings may differ depending on the connected Broadband Router model. For more information, refer to the user manual of the applicable router.

Setting up Port Range Forward for several network cameras

- You can set a rule of Port Forwarding on the Broadband Router device through its configuration web page.
- A user can change each port using the camera setting screen.

When Camera1 and Camera2 are connected to a router:

<table>
<thead>
<tr>
<th>Broadband Router</th>
<th>Start</th>
<th>End</th>
<th>Protocol</th>
<th>IP Address</th>
</tr>
</thead>
<tbody>
<tr>
<td>3000</td>
<td>3000</td>
<td>TCP/UDP</td>
<td>192.168.1.100</td>
<td></td>
</tr>
<tr>
<td>8080</td>
<td>8081</td>
<td>TCP/UDP</td>
<td>192.168.1.100</td>
<td></td>
</tr>
</tbody>
</table>

- Port forwarding can be done without additional router setup if the router supports the UPnP (Universal Plug and Play) function. After connecting the network camera, select the checkbox from the menu <Quick connect> in <Wisenet DDNS> in "Settings -> Network -> DDNS".
CONNECTING TO THE CAMERA FROM A SHARED LOCAL PC

1. Run device manager.
   It will scan for connected cameras and display them as a list.
2. Double-click a camera to access.
   The Internet browser starts and connects to the camera.

- Access to the camera can also be gained by typing the camera’s IP address in the address bar of the Internet browser.

CONNECTING TO THE CAMERA FROM A REMOTE PC VIA THE INTERNET

On a remote computer that is not in the Broadband Router’s network cluster is not allowed, users can access cameras within a Broadband Router’s network by using the camera’s DDNS URL.

1. Before you can access a camera in the Broadband Router network, you should have set the port range forward for the Broadband Router.
2. From the remote PC, launch the Internet browser and type the DDNS URL address of the camera, or the IP address of the Broadband Router in the address bar.
   ex) http://ddns.hanwha-security.com/ID

- To use Wisenet DDNS, sign up at the Wisenet DDNS homepage (http://ddns.hanwha-security.com) and register the product at [My DDNS]>[Register Product].
CONNECTING TO THE CAMERA

Normally, you would

1. Launch the Internet browser.
2. Type the IP address of the camera in the address bar.
   - IP address (IPv4) : 192.168.1.100
     http://192.168.1.100
     - the Login dialog should appear.

If the HTTP port is other than 80

1. Launch the Internet browser.
2. Type the IP address and HTTP port number of the camera in the address bar.
   - IP address : 192.168.1.100:HTTP Port number(8080)

Using URL

1. Launch the Internet browser.
2. Type the DDNS URL of the camera in the address bar.
   - URL address : http://ddns.hanwha-security.com/ID
     - the Login dialog should appear.

- Network connection is disabled in the LAN only environment.

Connecting via UPnP

1. Run the client or operating system in support of the UPnP protocol.
2. Click the camera name for search.
   - In the Windows operating system, click the camera name searched from the network menu.
     - The login window is displayed.

Connecting via Bonjour

1. Run the client or operating system in support of the Bonjour protocol.
2. Click the camera name for search.
   - In the Mac operating system, click the camera name searched from the Bonjour tab of Safari.
     - The login window is displayed.

To check the DDNS address

If the camera is connected directly to the DHCP cable modem, DSL modem, the IP address of your network will be changed each time you try to connect to the ISP (Internet Service Provider) server.
If this is the case, you will not be informed of the IP address changed by DDNS.

Once you register a dynamic IP-based device with the DDNS server, you can easily check the changed IP when you try to access the device.

To register your device to the <DDNS> server, visit http://ddns.hanwha-security.com and register your device first, and then set the Web Viewer's <Network> - <DDNS> to <Wisenet DDNS>, as well as providing <Product ID> that had been used for DDNS registration.
**PASSWORD SETTING**

When you access the product for the first time, you must register the login password.

- For a new password with 8 to 9 digits, you must use at least 3 of the following: uppercase/lowercase letters, numbers and special characters. For a password with 10 to 15 digits, you must use at least 2 types of those mentioned.
  - Special characters that are allowed: ~`!@#$%^*()_-+=|{}[].?
- For higher security, you are not recommended to repeat the same characters or consecutive keyboard inputs for your passwords.
- If you lost your password, you can press the [RESET] button to initialize the product. So, don’t lose your password by using a memo pad or memorizing it.

**LOGIN**

Whenever you access the camera, the login window appears. Enter the User ID and password to access the camera.

1. Enter “admin” in the <User name> input box. The administrator ID, “admin”, is fixed and can not be changed.
2. Enter the password in the <Password> input field.
3. Click [OK].
   If you have logged in successfully, you will the Live Viewer screen.

- When you access the camera web viewer, pay special attention to the security by checking whether the image data is encrypted.
- If you check the “Remember my credentials” option when your input is done, in future you will be logged in automatically without being prompted to enter the login information.
- You will experience the best video quality if the screen size is 100%. Reducing the ratio may cut the image on the borders.

**CAMERA WEB VIEWER SETUP**

1. Click the [Setup] icon.
2. The Settings window appears.
3. You can configure settings for the camera’s basic information, video, audio, network, event, analysis, and system over the network.
4. Click <Help> to view detailed descriptions of each function.

## TROUBLESHOOTING

<table>
<thead>
<tr>
<th>PROBLEM</th>
<th>SOLUTION</th>
</tr>
</thead>
</table>
| No video is displayed when accessing the plug-in free webviewer on Safari via HTTPS. | • On the authentication popup window prompted when initially accessing https, click "View Authentication Certificate" and select the "Always trust when connecting to the designated webviewer IP" check box.  
• If the webviewer continues failing to display a video after you select "Next" on the message window below, press the command key + Q to exit the Safari browser, access again and follow the procedures stated above. |
| I can't access the camera from a web browser.                          | • Check to make sure that the camera's Network settings are appropriate.  
• Check to make sure that all network cables have been connected properly.  
• If connected using DHCP, verify that the camera is able to acquire dynamic IP addresses without any problem.  
• If the camera is connected to a Broadband Router, verify that port forwarding is properly configured. |
| Viewer got disconnected during monitoring.                             | • Connected Viewers become disconnected upon any change to camera or network configurations.  
• Check all network connections. |
| The camera connected to the network is not detected in the Device Manager program. | • Turn off the firewall settings on your PC and then search the camera again. |
| Images overlap.                                                        | • Check whether two or more cameras are set to a single multicast address instead of different addresses. If a single address is used for multiple cameras, the images may overlap. |
| No image appears.                                                      | • If the transmission method is set to multicast, check whether there is a router that supports multicast in the LAN the camera is connected to.  
• Verify the settings in the following sequence:  
A. Check <Data & Time> settings.  
B. The <Motion detection> should be set to <Enable>.  
C. Check if the <E-mail> option of <Event setup> menu is checked to use. |
| <Motion detection> of <Analytics> is set to <Enable>, but no notification e-mail reaches me even when an analysis event had occurred. | • Check if the memory card is defective.  
• Check if the memory card is inserted in the proper direction. Operation of memory card that is formatted by other devices is not guaranteed with this camera unit  
• Format the memory card again in <Setup> → <Event> → <Storage> menu. |
| Cannot record in the NAS.                                              | • Confirm that the IP address of the NAS is valid.  
• Confirm that the ID/password of the NAS is valid.  
• Confirm that you can access the folder designated as the default folder using the ID of the NAS.  
• Confirm that the NAS SMB/CIFS items are unchecked.  
• Confirm that the NAS IP address and the camera IP address are in the same format.  
  ex) The NAS & camera subnet mask initial value is 255.255.255.0.  
  If the IP address is 192.168.20.32 then the NAS IP address should be in the range of 192.168.20.1~192.168.20.255.  
• Check whether you tried to access as another user without formatting the default folder saved or used.  
• Confirm that you used recommended NAS equipment. |
| It reports NAS setting has failed.                                     | • Confirm that the information registered in the NAS is correct. |
OPEN SOURCE ANNOUNCEMENT

GPL/LGPL software license

The software included in this product contains copyrighted software that is licensed under the GPL/LGPL. You may obtain the complete Corresponding Source code from us for a period of three years after our last shipment of this product by sending email to help.cctv@hanwha.com

If you want to obtain the complete Corresponding Source code in the physical medium such as CD-ROM, the cost of physically performing source distribution might be charged.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991
Copyright (C) 1989, 1991 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead. (You can use the GNU General Public License if you like, but it applies to less than 1% of Free Software Foundation software.)

You may apply it to your programs, too. When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish) without losing the freedom to change the software for so long as you hail the modified version under this same license. (Indeed, by copying the source code distributed under this license, burdened users also provide you with the right to make changes, even into the source code of the copies they receive.)

Preamble

You make a copy or copies of the Program (or a work based on the Program), and distribute such modifications or work or work with the terms of Sections 1 and 2 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed at all. The precise terms and conditions for copying, distribution and modification follow.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print a brief summary of suitable communications to the user, and to offer the user the ability to accept, decline, or request a detailed list.

The author may add to the summary a brief statement of any special copyright notices or conditions.

d) The source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable, must be distributed under the terms of Sections 1 and 2 above. If a module’sModification, as a whole at no charge to all third parties under the terms of this License.

c) The source code for any work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed in such a work.

d) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

e) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machinereadable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

f) Accompany it with the information you received as to the offer to distribute corresponding source code. If a work contains portions of copyrighted or other protected materials, including but not limited to sound and video recordings, photographs, and illustrations, which are not otherwise covered by this License, you may not distribute corresponding source code unless you receive the copyright holder's prior written permission. You do not otherwise have to accept the terms of this License, and you have nothing to lose by refusing to accept this License. By electing the distribution option in this paragraph, you indicate your acceptance of these terms.

Thus, since a modified version is a special form of the original, the Option 1 definition applies if and only if it does not alter the fundamental nature of the work, and if it does not alter the license and distribution of any of the files of the work.

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major
components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable. If a program is designed to make extensive use of a device that monitors outputs from devices under its control, it is considered to interact with the device.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work. "A standard interface" means an interface either that is official standard defined by an official standardization body, or, in the case of interfaces specified for a particular programming language, that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything other than the work as a whole, that is included in the normal form of packaging a Major Component. Such System Libraries may be designed only to work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. "A Major Component", in this context, means a major essential component (compiler, kernel, and so on) of the specific operating system (if any) on which the executable work runs, or an object code interpreter used to run the object code.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (by means of running and installing) modify or run the object code. The term "Corresponding Headers" means interface definitions to the above headers for the object code.

The "Corresponding Code" for a work in object code form means all the source code needed to generate, install, and (by means of running and installing) modify or run the object code. The term "Corresponding headers" means interface definitions to the above headers for the object code.
6. Conveying Non-Source Forms.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of the Program. You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also do so under this License, and deal only with non-infringing copies. Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WPO copyright treaty as used by the publisher of the work. The rights embodied in this License in a covered work shall not granting you the legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you may not impose any such restriction.

You may convey verbatim copies of the Program’s source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program. You may charge any price for copying

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also do so under this License, and deal only with non-infringing copies. Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright of the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if two conditions are met: (a) the output does not contain any part of the Unmodified Version under this License; and (b) the output is supplied under this License by the copyright holder or by a licensee authorized by the copyright holder. You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or to provide you with facilities for running those works, provided that you comply with the terms of this License in conveying the work and provide its recipients a copy of this License. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their sole possession of it; and keep those recipients from propagating the modified versions.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. No patent licenses are granted under this License for code that your product modifying the covered work requires to function, unless separately licensed to you for that purpose.

11. Patents.

A "contributor" is a holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the "contributor's" "contributor's version." A "contributor's essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, next to run or propagate a covered work that infringes one or more of the contributor’s essential patent claims. The "community version" means the work as it is available from a copyrighted contributor under this License, as well as any later version that results from a conveyance of the work as a covered work, but is not otherwise modified.

12. Additional Terms.

"Additional terms" are terms that supplement the terms of this License, but are not part of it. You may convey covered works only if you propagate such Additional Terms exactly as they were propaga-

1.11. “Source Code” means the preferred form of the Covered Code for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an Executable, or source code differential comparisons against either the Original Code or another well known, available Covered Code of the Contributor’s choice. The Source Code can be in a compressed or archival form, provided the appropriate decompression or de-archiving software is available for free from a place of your choice.

1.12. “You” or “Your” means an individual or a legal entity exercising rights under, and performing its obligations under, all of the terms of this License, or a subsequent version published by the Free Software Foundation. “You” includes an entity that has been granted a license to the Original Code and/or Modifications made by that Contributor under the terms of this License, and “Recipient” includes such entity’s employees, independent contractors and consultants.

3.2. Contributor Grant. Subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license under intellectual property rights (other than patent rights) it owns or controls to the Contributor Version.

5. Distribution. You may distribute and sublicense the Covered Code.

6.1. New Versions. Notwithstanding Section 2.1 above, no patent license is granted: 1) for code that You delete from the Original Code; 2) separate from the Original Code; or 3) for infringements caused by: i) the modification of the Original Code or ii) the combination of Original Code with other software or devices.

6.2. Contributor Grant. Subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license under intellectual property rights (other than patent rights) it owns or controls to the Contributor Version.

6.3. Source Code Availability. Any Modification which You create or to which You contribute must be made available in Source Code form.

7.1. Use of Copyright notices. You must make sure your use of the Covered Code is compliant with applicable copyright laws. You must include all copyright notices for the Covered Code You distribute, including those You added.

7.3. Larger Works. You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License, provided that You add Your own license notice and copyright notice for Your version to the Original Code. You may not distribute such a Larger Work under the terms of this License.

8. LIMITATION OF LIABILITY

9. MISCELLANEOUS

10. TERMINATION

11. MISCELLANEOUS
provides that the language of a contract shall be construed against the drafter shall not apply to this License.

12. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and you agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute an admission of liability.

13. MULTIPLE-LICENSED CODE.

Initial Developer may designate portions of the Covered Code as Multiple-Licensed. Multiple-Licensed means that the Initial Developer permits you to utilize portions of the Covered Code under the terms of the MPL, or the alternative license, if any, specified by the Initial Developer in the file described in Exhibit A.

EXHIBIT A - Mozilla Public License.

The contents of this file are subject to the Mozilla Public License Version 1.1 (the "License"); you may not use this file except in compliance with the License. You may obtain a copy of the License at http://www.mozilla.org/MPL.

This software is copyright (C) 1991-1998, Thomas G. Lane. All Rights Reserved except as specified below.

The Original Author of the Original Code is _________________. All Rights Reserved.

The Initial Developer of the Original Code is _________________. Portions created by _________________. All Rights Reserved.

Contributor(s): ______________________________________.

Alternatively, the contents of this file may be used under the terms of the _____ license (the [___] License), in which case the provisions of [______] License are applicable. If you do not delete the provisions above, a recipient may use your version of this file under either the MPL or the [______] License."

NOTE: The text of this Exhibit A may differ slightly from the text of the notices in the Source Code files of the Original Code. You should use the text of this Exhibit A rather than the text found in the Original Code Source Code for Your Modifications.

The Independent JPEG Group's JPEG Software

The software included in this product contains copyrighted software that is licensed under the JPEG License.

- JPEG License
- Code project : Generating Open GIF Library

This distribution contains the sixth public release of the Independent JPEG Group's free JPEG software. You are welcome to redistribute this software and to use it for any purpose, subject to the conditions under LEGAL ISSUES, below.

Serious users of this software (particularly those incorporating it into larger programs) should contact IJG at jpeg-info@uunet.uu.net to be added to our electronic mailing list. Mailing list members are notified of updates and have a chance to participate in technical discussions.

This software is the work of Tom Lane, Phil Graf, Sima Cheng, Julian Krinsky, Lutz Losch, George Phillips, Davide Rossi, Guido Vollbrecht, Ger Wijker, and other members of the Independent JPEG Group.

IJG is not affiliated with the official ISO-JPEG standard committee.

LEGAL ISSUES

In plain English:
1. We don't promise that this software works. (But if you find any bugs, please let us know!)
2. You can use this software for whatever you want. You don't have to pay us.
3. You may not pretend that you wrote this software. If you use it in a program, you must acknowledge somewhere in your documentation that you've used the IJG code.

In legal terms:

The authors make NO WARRANTY or representation, either express or implied, with respect to this software, its quality, accuracy, merchantability, or fitness for a particular purpose. This software is provided "AS IS", and you, its user, assume the entire risk as to its quality and accuracy.

This software is copyright (C) 1991-1998, Thomas G. Lane. All Rights Reserved except as specified below.

Permission is hereby granted to use, copy, modify, and distribute this software (or portions thereof) for any purpose, without fee, subject to these conditions:

1. [ ] any part of the source code for this software is distributed, then this README file must be included, with this copyright and no-warranty notice unaltered, and any additions, deletions, or changes to the original files must be clearly indicated in accompanying documentation.
2. [ ] if only executable code is distributed, then the accompanying documentation must state that this software is based on work in part on the Independent JPEG Group.
3. [ ] Permission for use of this software is granted only if the user accepts full responsibility for any undesirable consequences; the authors accept NO LIABILITY for damages of any kind.

These conditions apply to any software derived from or based on the IJG code, not just to the unmodified library. If you use our work, you ought to acknowledge us. Permission is NOT granted for the use of any IJG author's name or company name in advertising or publicity relating to this software or products derived from it. This software may be referred to only as "the Independent JPEG Group's software.

We specifically permit and encourage the use of this software as the basis of commercial products, provided that all warranty or liability claims are assumed by the product vendor.

ansicolor is NOT covered by the above copyright and conditions, but instead by the usual distribution terms of the Free Software Foundation; principally, you must include source code if you redistribute it. (See the file ansi2knr.c for full details.) However, since ansi2knr.c is not needed as part of any program generated from the IJG code, this does not limit you more than the foregoing paragraphs do.

The Unix configuration script "configure" was produced with GNU Autoconf. It is copyright by the Free Software Foundation but is freely distributable. The same holds for its supporting scripts (config.guess, config.sub, ltconfig, ltmain.sh). Another support script, install-sh, is copyright by M.I.T. but is freely distributable.

It appears that the arithmetic coding option of the JPEG spec is covered by patents owned by IBM, AT&T, and Mitsubishi. Hence arithmetic coding cannot legally be used without obtaining one or more licenses. For this reason, support for arithmetic coding has been removed from this free JPEG software. Since arithmetic coding provides only a marginal gain over the unpatented Huffman mode, it is unlikely that very many implementations will support it. So far we are aware, there are no patent restrictions on the remaining code.

The US distribution formerly included code to read and write GIF files. To avoid entanglement with the Unisys LZW patent, GIF reading support has been removed altogether, and the GIF writer has been simplified to produce "uncompressed GIFs". This technique does not use the LZW algorithm; the resulting GIF files are larger than usual, but are readable by all standard GIF decoders.

We are required to state that "The Graphics Interchange Format is the Copyright property of CompuServe Incorporated. GIF(sm) is a Service Mark property of CompuServe Incorporated."

T-License

- This Product uses the Source Code of T-Kernel under T-License granted by the T-Engine Forum(www.t-engine.org)

T-License [License Agreement for Source Code of T-Kernel]

established by T-Engine Forum on January 23, 2004
revised on June 17, 2004
revised on December 21, 2006
revised on March 24, 2009

Article 1. Scope of License Agreement
1. This License Agreement sets forth copyrights and the terms and conditions of use applicable to the source code of T-Kernel distributed by T-Engine Forum and any derivative work created therefrom.

Article 2. Definition
1. "T-Kernel" means a real-time operating system controlled and distributed by T-Engine Forum on behalf of the copyright holder thereof.

2. "Source Code" means a source program, including related comments and documents, for the T-Kernel and the Ported Source Code defined in Article 2.8 which is registered with T-Engine Forum.

3. "Hardware-dependent Part" means the part of the Source Code which depends on hardware and needs to be changed when the Source Code is ported and operated on the target hardware, and is designated and separated as such part.

4. "Compiler-dependent Part" means the part of the Source Code which depends on compiler and needs to be changed when the Source Code is ported and operated on the target hardware, and is designated and separated as such part.

5. "Header File" means the part of the Source Code which contains definitions necessary to develop application programs.

6. "T-Engine Hardware" means the hardware which is manufactured in accordance with the T-Engine Hardware specifications or the µT-Hardware specifications issued by T-Engine Forum, and registered with T-Engine Forum.

7. "Similar Hardware to T-Engine Hardware" means any hardware including software which emulate hardware other than that defined in Article 2.6 above, on which the T-Kernel can be operated.

8. "Ported Source Code" means a source program produced from the Source Code by modifying only its Hardware-dependent Part and/or Compiler-dependent Part to enable it to be operated on the T-Engine Hardware or the Similar Hardware to T-Engine Hardware. The Ported Source Code which is registered with T-Engine Forum shall be included in the Source Code.

10. "Binary Code" means an executable code form which is created by compiling programs, which include all or part of the Source Code or the Modified Source Code.

11. "Derivative Work" means the Modified Source Code or the Binary Code.

12. "Embedded Product" means any product which operates with executable code form of the Source Code, the Modified Source Code or the Binary Code loaded on its hardware.

14. "System Developer" means any person who develops the Embedded Product by itself or has a third party develop the same, and provides, whether with or without payment, the End User with the Embedded Product.

15. "Distributor of Modification" means any person who produces the Modified Source Code and, whether with or without payment, distributes the same to any third party.
Article 3. Copyright

1. The copyrights of the Source Code shall be owned by Ken Sakamura.

Article 4. License of Source Code

1. As provided for in this Article, T-Engine Forum shall provide, and grant a license to use, the Source Code free of charge to any person who has taken the necessary procedure for registration as prescribed by T-Engine Forum and agreed to the T-License.

3. In accordance with the license granted under Article 4.1 above, the Source Code User may perform the following acts:
   1. to copy and/or modify the Source Code provided by T-Engine Forum hereunder for its own research, development, and the like;
   2. to run the Source Code provided by T-Engine Forum hereunder for its own research, development and the like;
   3. to run the Source Code modified in accordance with the provision of Article 4.3 (1) above for its own research, development and the like;
   4. to distribute the Binary Code created from the Source Code provided by T-Engine Forum hereunder or from the Source Code modified in accordance with the provision of Article 4.3 (1) above.

4. In accordance with the license granted under Article 4.1 above, the System Developer may perform the following acts:
   1. to perform any and all acts set forth in the Article 4.3 above.
   2. to develop and manufacture the Embedded Product containing the Binary Code, and, whether with or without payment, provide the End User with the same and make the Binary Code available to the End User on the Embedded Product.

5. The Source Code User and the System Developer shall be obligated to give a notice that the Source Code is used, in such a way as separately specified by T-Engine Forum, when they use the Source Code or the Binary Code, or make the Binary Code available for the End User on the Embedded Product.

Article 5. Distribution of Modified Source Code

1. Any of A- members of T-Engine Forum may become the Distributor of Modification by obtaining the approval of T-Engine Forum through the registration procedure as prescribed by the Forum provided that only the department of the A-member which has taken the registration procedure may distribute the Modified Source Code in such a way as provided for in this Article as long as it holds the Authorship.

2. The Distributor of Modification may create the Modified Source Code based on the Source Code provided by T-Engine Forum and the Patch for Modification to be applied to create such Modified Source Code from the Source Code.

3. The Distributor of Modification shall, prior to the distribution, inform T-Engine Forum of and register a name and description of the Modified Source Code in such a way as specified by T-Engine Forum.

4. The Distributor of Modification shall determine the name of the Modified Source Code subject to the rules separately established by T-Engine Forum and publish an appropriate notice as required by the rules on the Patch for Modification and the Modified Source Code.

5. The Distributor of Modification may distribute the Modified Source Code to a third party, whether with or without payment, provided that the Distributor of Modification shall take the necessary measures to prohibit the third party from making the re-Distribution of the Modified Source Code.

6. Developer with the Patch for Modification. Provided, however, that the Distributor of Modification shall be obligated to confirm that the System Developer is the Source Code User duly licensed under Article 4.1.

7. The Distributor of Modification may perform the Vicarious Execution of Patch Processing for the System Developer.

8. The System Developer shall not distribute the Modified Source Code in further modified form to any third party as a stand-alone software product.

9. The System Developer may, under the same obligation as imposed in Article 4.5, make the Embedded Product available for the End User through use of the Patch for Modification distributed by the Distributor of Modification or the Derivative Works obtained through the Vicarious Execution of Patch Processing.

Article 6. Distribution and Registration of the Ported Source Code

1. The Source Code User and the System Developer may, whether with or without charge, distribute to any third party only the following parts of the Ported Source Code on the T-Engine Hardware or the Similar Hardware to T-Engine Hardware:
   1. The Hardware-dependent Part and/or Compiler-dependent Part; provided that the Source Code User and the System Developer shall inform T-Engine Forum of, and T-Engine Forum may publish, a method for distributing said Parts to third parties.
   2. The Header File; provided that the Header File shall be distributed together with the Binary Code of the Ported Source Code.

2. Any member of T-Engine Forum may request T-Engine Forum to register and distribute, as an original source code for T-Kernel, the Ported Source Code on the T-Engine Hardware or the Similar Hardware to T-Engine Hardware.

3. Any member of T-Engine Forum who requests the distribution mentioned in the preceding paragraph shall accord to the following conditions:
   1. The member shall confirm that the object hardware is the T-Engine Hardware or the Similar Hardware to T-Engine Hardware.
   2. The member shall provide T-Engine Forum with a complete set of operational environment for the object hardware and T-Kernel free of charge when requesting the distribution.
   3. The member shall submit test results of the Ported Source Code to T-Engine Forum when requesting the distribution.

4. In the event that T-Engine Forum accepts the request mentioned in Article 6.2, T-Engine Forum shall register and distribute the Ported Source Code as the Source Code for T-Kernel. Provided, however, that the Ported Source Code may be treated in the same way as the Modified Source Code until the time of registration hereunder.

5. The provision set forth in Article 3 shall apply to the Ported Source Code registered in accordance with this Article.

Article 7. Use for Other Purpose

1. Any use of the Source Code, the Modified Source Code or the Ported Source Code other than those stipulated in Articles 4, 5 and 6 shall be subject to the prior approval of T-Engine Forum.

Article 8. Limited Warranty

1. T-Engine Forum and the copyright holder of the Source Code warrant that the Source Code does not infringe third party's copyrights. Provided, however, that T-Engine Forum and the copyright holder of the Source Code make no warranty as to the Hardware-dependent Part and/or Compiler-dependent Part set forth in Article 6.2 in the Ported Source Code by any third party.

3. Neither T-Engine Forum nor the copyright holder of the Source Code warrants that the Source Code does not infringe any third party's industrial property rights. In no event shall T-Engine Forum and the copyright holder of the Source Code be liable for any dispute which may arise between the Source Code User and a third party in connection with the third party's industrial property rights.

Article 9. Indemnity

1. Neither T-Engine Forum nor the copyright holder of the Source Code shall be liable for any damages (including, but not limited to, damages resulting from loss of profit, business interruption, loss of business information or any other pecuniary damages) arising out of use or impossibility of use of the Source Code even if T-Engine Forum and the copyright holder have been informed of the possibility of such damages.

Article 10. Breach of Agreement

1. In case that T-Engine Forum considers that this License Agreement is breached or that the popularization of T-Kernel is obstructed, T-Engine Forum shall take measures to correct such breach or such obstruction, take measures on the ground of copyright infringement, or take any other necessary measures against the breaching person or the obstructing person, regardless of whether or not the said person is a member of T-Engine Forum, to make the T-Engine Forum and the copyright holder of the Source Code entitled to the possibility of such damages.

2. In case of breach of this License Agreement by a member of T-Engine Forum, T-Engine Forum may take appropriate measures against the member; for example, the member is disqualified from membership, depending on what kind of breach has been committed by it.

3. Any legal dispute which may arise in relation to any breach of this License Agreement shall be subject to the exclusive jurisdiction of the Tokyo District Court.

Article 11. Governing Law and Language

1. This License Agreement shall be governed by and interpreted under the laws of Japan.

2. This License Agreement is executed in both Japanese text and English text provided that the Japanese text shall govern the interpretation and performance of this License Agreement.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.
   "License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

   "Licensee" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

“Legal Entity” shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, “control” means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"you", “your” shall mean an individual or Legal Entity exercising permissions granted by this license.

"Work" shall be the work of authorship, including any derivative work, modifications, additions, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contributor" shall mean any individual or Legal Entity making a Contribution to the Work or a Work in which such Contribution is incorporated, including but not limited to the initial author(s) of the Work but excluding those that do not make any Contribution to the Work or whose Contributions were added by another Contributor.

"Works" shall mean the Collection of Works, Source Code, and Binaries distributed under the License. The term "Work" does not include copies or compendiums of Works that are created by combining a Work with other expressly permitted material.

"work" shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"You" shall mean a Contributor, Licensor, or end user of the Work.

"You" shall mean any individual or Legal Entity exercising permissions granted by this license.

"Work" shall mean the work of authorship, including any derivative work, modifications, additions, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contributor" shall mean any individual or Legal Entity making a Contribution to the Work or a Work in which such Contribution is incorporated, including but not limited to the initial author(s) of the Work but excluding those that do not make any Contribution to the Work or whose Contributions were added by another Contributor.

"License" shall mean this document or any later version published by the Free Software Foundation. A version is considered to be the same if it was produced in accordance with this License, including that all contributing work was covered by this License and such version includes a notice that this License applies to the contribution.

"Work" shall mean the work of authorship, including any derivative work, modifications, additions, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contributor" shall mean any individual or Legal Entity making a Contribution to the Work or a Work in which such Contribution is incorporated, including but not limited to the initial author(s) of the Work but excluding those that do not make any Contribution to the Work or whose Contributions were added by another Contributor.
