IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean the contaminated area on the product surface with a soft, dry cloth or a damp cloth. (Do not use a detergent or cosmetic products that contain alcohol, solvents or surfactants or oil constituents as they may deform or cause damage to the product.)
7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. This product is intended to be supplied by a Listed Power Supply Unit marked “Class 2” or “LPS” and rated from 24 Vac (50/60 Hz) 1.1 A or 12 Vdc, 1.0 A. (XNV-6080RSA/XNV-8080RSA/XNV-6120RSA)
16. If you use excessive force when installing the product, the camera may be damaged and malfunction. If you forcibly install the product using non-compliant tools, the product may be damaged.
17. Do not install the product in a place where chemical substances or oil mist exists or may be generated. As edible oils such as soybean oil may damage or warp the product, do not install the product in the kitchen or near the kitchen table. This may cause damage to the product.
18. When installing the product, be careful not to allow the surface of the product to be stained with chemical substance. Some chemical solvents such as cleaner or adhesives may cause serious damage to the product’s surface.
19. If you install/disassemble the product in a manner that has not been recommended, the production functions/performance may not be guaranteed. Install the product by referring to “Installation & connection” in the user manual.
20. Installing or using the product in water can cause serious damage to the product.

WARNING

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE. DO NOT INSERT ANY METALLIC OBJECT THROUGH THE VENTILATION GRILLS OR OTHER OPENINGS ON THE EQUIPMENT.

Apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.

To prevent injury, this apparatus must be securely attached to the Wall/ceiling in accordance with the installation instructions.

CAUTION

EXPLANATION OF GRAPHICAL SYMBOLS

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.
Class I construction
An apparatus with CLASS I construction shall be connected to a MAINS socket outlet with a protective earthing connection.

Battery
Batteries (battery pack or batteries installed) shall not be exposed to excessive heat such as sunshine, fire or the like.

Disconnection Device
Disconnect the main plug from the apparatus, if it’s defected. And please call a repair man in your location.

When used outside of the U.S., it may be used HAR code with fittings of an approved agency is employed.

CAUTION
RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

ATTENTION
IL Y A RISQUE D’EXPLOSION SI LA BATTERIE EST REMPLACÉE PAR UNE BATTERIE DE TYPE INCORRECT.
METTRE AU REBUT LES BATTERIES USAGÉES CONFORMÉMENT AUX INSTRUCTIONS.

These servicing instructions are for use by qualified service personnel only.
To reduce the risk of electric shock do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.
The CVBS out terminal of the product is provided for easier installation, and is not recommended for monitoring purposes.
Please use the input power with just one camera and other devices must not be connected.
The ITE is to be connected only to PoE networks without routing to the outside plant.
The wired LAN hub providing power over the Ethernet (PoE) in accordance with IEEE 802-3af shall be a UL Listed device with the output evaluated as a Limited Power Source as defined in UL60950-1.
Unit is intended for installation in a Network Environment 0 as defined in IEC TR 62102.
As such, associated Ethernet wiring shall be limited to inside the building.

Please read the following recommended safety precautions carefully.
• Do not place this apparatus on an uneven surface.
• Do not install on a surface where it is exposed to direct sunlight, near heating equipment or heavy cold area.
• Do not place this apparatus near conductive material.
• Do not attempt to service this apparatus yourself.
• Do not place a glass of water on the product.
• Do not install near any magnetic sources.
• Do not block any ventilation openings.
• Do not place heavy items on the product.
• Please wear protective gloves when installing/removing the camera. The high temperature of the product surface may cause a burn.

User’s Manual is a guidance book for how to use the products.
The meaning of the symbols are shown below.
• Reference : In case of providing information for helping of product’s usages
• Notice : If there’s any possibility to occur any damages for the goods and human caused by not following the instruction
✘ Please read this manual for the safety before using of goods and keep it in the safe place.
## CONTENTS

### OVERVIEW

3

- Important Safety Instructions
- Product Features
- Recommended PC Specifications
- Recommended Micro SD/SDHC/SDXC Memory Card Specifications
- NAS recommended specs

### APPENDIX

28

- Specification
- Product Overview
- Troubleshooting
- Open Source Announcement
PRODUCT FEATURES

- **Material**: stainless steel
  The exterior of the camera is made of stainless steel, which can be installed in various special environments due to its corrosion prevention properties and ease of handling.

- **Dustproof/Waterproof**
  The dustproof/waterproof design protects the product from rain and dust when installed outdoors.

- **IR mode**
  If the IR indicator turns on, the product switches to the IR mode for preventing an object from being too bright, which helps you identify the object in near distance.

- **Supports 2M pixel resolution videos (XNV-6080RSA/XNV-6120RSA)**
- **Supports 5M pixel resolution videos (XNV-8080RSA)**

- **Multi-Streaming**
  This network camera can display videos in different resolutions and qualities simultaneously using different CODECs.

- **Web Browser-based Monitoring**
  Using the Internet web browser to display the image in a local network environment.

- **Alarm**
  When an event occurs, video is either sent to the email address registered by the user, sent to the FTP server, saved in a Micro SD card or NAS, or a signal is sent to the alert output terminal.

- **Tampering Detection**
  Detects tampering attempts on video monitoring.

- **Defocus detection function**
  Detects the defocus phenomenon of the camera lens.

- **Motion Detection**
  Detects motion from the camera’s video input.

- **Audio Detection**
  Detects sound louder than a certain level specified by user.

- **Smart Codec**
  Adaptively applies codecs for a portion of the camera’s field of view to improve the quality of such area specified by user.

- **Auto Detection of Disconnected Network**
  Detects network disconnection before triggering an event.

- **Fog detection**
  Detects fog that is heavier than the detection level.

- **Face Detection**
  Detects faces in the specified area from the camera’s video input.

- **IVA (Intelligent Video Analysis) function**
  Detects a motion or situation that meets the configured event rules.

- **Sound source classification**
  Detects a sound source specified by the user.

- **ONVIF Compliance**
  This product supports ONVIF Profile S&G. For more information, refer to www.onvif.org.

RECOMMENDED PC SPECIFICATIONS

- **CPU**: Intel(R) Core(TM) i7 3.4 GHz or higher
- **RAM**: 8G or higher
- **Supported OS**: MS Windows, Mac OS X

**Plug-in free web viewer**
Supported web browsers: Google Chrome, MS Edge, Mozilla Firefox (Windows 64bit only), Apple Safari (Mac OS X only)

**Plug-in Webviewer**
Supported web browsers: MS Explore, Apple Safari (Mac OS X only)
※ Refer to the appendix for detailed version information of the verified OS and browser.

RECOMMENDED MICRO SD/SDHC/SDXC MEMORY CARD SPECIFICATIONS

- **Recommended capacity**: 16GB to 256GB (MLC type)
- The following types of memory cards from the following manufacturers are recommended for this camera.
  - **Manufacturer**: SanDisk, Transcend
  - **Product family**: High endurance

NAS RECOMMENDED SPECS

- **Recommended capacity**: 200GB or higher is recommended.
- **Simultaneous access**: One unit of NAS can accept a maximum of sixteen camera accesses.
- For this camera, you are recommended to use a NAS with the following manufacturer’s specs.

<table>
<thead>
<tr>
<th>Recommended products</th>
<th>Available sizes</th>
</tr>
</thead>
<tbody>
<tr>
<td>QNAP NAS</td>
<td>A maximum of 16 cameras can access simultaneously.</td>
</tr>
<tr>
<td>Synology NAS</td>
<td>A maximum of 16 cameras can access simultaneously.</td>
</tr>
</tbody>
</table>

※ If you use NAS equipment for purposes other than video saving, the number of accessible cameras may be reduced.
# WHAT'S INCLUDED

Please check if your camera and accessories are all included in the product package. (As for each sales country, accessories are not the same.)

| **11** Network Port  | Used to connect the PoE or Ethernet cable for network connection.           |
**INSTALLATION**

⚠️ This camera is waterproof and in compliance with the IP66 spec, but the jack connected to the external cable is not. You are recommended to install this product below the edge of eaves to prevent the cable from being externally exposed.

**Precautions before installation**
Ensure you read out the following instructions before installing the camera:

- It must be installed on the area (ceiling or wall) that can withstand 5 times the weight of the camera including the installation bracket.
- Stuck-in or peeled-off cables can cause damage to the product or a fire.
- For safety purposes, keep anyone else away from the installation site. And put aside personal belongings from the site, just in case.
- If excessive force is used while installing the product, the camera may be damaged due to malfunction. Forcing assembly using non-compliant tools may damage the product.

**Disassembling**
1. Use the supplied star-shaped wrench to loosen the dome cover fastening bolt by turning it in a counterclockwise direction, and remove the dome cover.

**Installation**
1. Drill holes to fit the four D points of the mounting plate provided as an accessory.
   - Orient the [1] mark toward the direction you want to monitor.
2. Fully insert the plastic anchor.
3. Align the mounting hole of the camera with the hole where the plastic anchor is inserted, then tighten the tapping screw.
4. Tighten the mount plate and camera case as shown.
   - Orient the [1] mark toward the direction you want to monitor.
5. Connect and arrange the necessary cables lest that they should be damaged or twisted while installing the camera.
6. Adjust the lens in a desired direction by referring to the “Adjusting the monitoring direction for the camera” section. (page 15)
7. Close the dome cover.
   - Securely fasten the fastening bolt using an L wrench to prevent water from leaking.

**Connecting waterproof power cable and LAN cable**
1. Remove the dome cover and the case.
2. Pull out the long projected part of the rubber plug on the bottom and remove it as shown in the figure.
3. Insert the power cable into the small hole made by removing the projected part of the rubber plug in step 2 above, and lay the cable along the long groove.

4. Connect the power cable with the power terminal block.

5. Pull out the rubber stopper on the floor as shown.

6. Use the Cap Installer to allow the RJ45 cable to pass through.

7. Insert the rubber stopper again and connect the LAN cable to the Ethernet terminal.

Connecting the alarm and audio cable

1. Remove the dome cover and the case.
2. Pull out the rubber plug on the bottom as shown in the figure.

3. Insert the alarm/audio cable through the hole created by removing the rubber cap in No. 2, and connect the cable to the alarm terminal.
4. Align the cable so that it should not be damaged or jammed when installing the camera.
5. Put the rubber cap located on the alarm/audio cable in the hole.
6. Adjust the lens in a desired direction by referring to the “Adjusting the monitoring direction for the camera” section, (page 15)
7. Attach the dome cover.
Attaching to the unbundled adapter

Choose and purchase a necessary one of the following options (unbundled) that is suitable to the installation site or for your convenience.

1. Remove the dome cover from the case by referring to the “Disassembling” section. (page 12)
2. Use the provided machine screw to fix the camera case to the unbundled adapter.
3. Connect and arrange the necessary cables lest that they should be damaged or twisted while installing the camera.
4. Install the camera body in the reverse order of “Disassembling”.
5. Adjust the lens in a desired direction by referring to the “Adjusting the monitoring direction for the camera” section. (page 15)
6. Close the dome cover.
   - Tighten the fastening bolts tightly using the star-shaped wrench to prevent water leakage.

Outdoor installation

When you install it outside of the building, please waterproof it with waterproof butyl rubber tape (can be purchased in stores) so that water does not leak from the gap of the cable connected to the outside.

1. Connect the power, I/O, BNC, and LAN cables.
2. Wrap the black cable jacket (Area A) and the cable connection area with waterproof (butyl rubber) tape so that more than half of the butyl rubber tape is overlapped.
   - If the cable jacket is not waterproofed properly, then it can directly cause leakage. Make sure to protect the cable with a dense layer of taping.
   - Waterproof butyl tape is made of butyl rubber that can be stretched to twice its normal length.

Optional Accessories for Installation

For your easier installation, you can purchase appropriate optional accessories available.

1. FRAME MOUNT(SBP-300WMS)/HANGING MOUNT(SBP-HMS6)
   - This adaptor is used when installing the dome camera onto a wall.

2. POLE MOUNT ADAPTOR(SBP-300PMS)
   - This is an adapt for WALL MOUNT ADAPTOR (SBP-300WMS or SBP-300WMS1) installation on a pole whose diameter is bigger than 80mm.

3. CORNER MOUNT ADAPTOR (SBP-300KMS)
   - This is an adapt for WALL MOUNT ADAPTOR (SBP-300WMS or SBP-300WMS1) installation on the corner of wall joint.
**Adjusting the monitoring direction for the camera**

![Diagram of camera with Pan, Tilt, Lens rotation labels]

- **Adjusting the monitoring direction**
  
  You can adjust the camera direction only when the camera is fixed on the ceiling. Where, rotating the camera unit to the left or right is called Pan, adjusting the tilt is called Tilt, and turning the lens on its axis is called Rotation.
  
  - The effective range of pan is a total of 354 degrees.
  - The effective range of rotation is a total of 355 degrees.
  - Tilt rotation angle is 67° for XNV-6080RSA/8080RSA and 75° for XNV-6120RSA.

  - The image can be covered up by the camera case depending on the angle.
  - Do not forcefully turn the focus/zoom lens after the dome case is disassembled. Otherwise, it may cause an incorrect focus due to a motor failure.

- **Methods of adjustment**
  
  1. Adjust the Pan angle after installing the camera, considering the direction to be monitored.
  2. Set the horizontal angle so that the image is not reversed.
  3. Adjust the tilt angle so that the camera faces toward the monitoring object.

---

**INSERTING/REMOVING A MICRO SD MEMORY CARD**

- Disconnect the power cable from the camera before inserting the Micro SD memory card.
- Do not insert the Micro SD memory card while it's upside down by force. Otherwise, it may damage the Micro SD memory card.
- When it rains or the humidity is high, insertion or ejection of a Micro SD card is not recommended.
- Disassembly of the product cover should be finished within 5 minutes, or there will be the risk of internal dew condensation.

**Inserting a Micro SD Memory Card**

1. Separate the Dome cover of the camera.
2. Insert a Micro SD card in the arrow direction shown in the figure.

![Diagram showing Micro SD card insertion]

**Notes**

- Disconnect the power cable from the camera before inserting the Micro SD memory card.
- Do not insert the Micro SD memory card while it's upside down by force. Otherwise, it may damage the Micro SD memory card.
- When it rains or the humidity is high, insertion or ejection of a Micro SD card is not recommended.
- Disassembly of the product cover should be finished within 5 minutes, or there will be the risk of internal dew condensation.
Removing a Micro SD Memory Card
Gently press down on the exposed end of the memory card as shown in the diagram to eject the memory card from the slot.

- Pressing too hard on the Micro SD memory card can cause the card to shoot out uncontrollably from the slot when released.
- Before removing the Micro SD memory card, in <Storage>, set the device to <Off> and press the [Apply] button and turn the camera off.
- If you turn off the camera or remove the Micro SD memory card that contains data from the product, the data may be lost or damaged.

CONNECTING WITH OTHER DEVICE

- The CVBS out terminal of the product is provided for easier installation, and is not recommended for monitoring purposes.
- The Micro USB out terminal of the product is provided for easier installation, and is not recommended for monitoring purposes.

Ethernet Connection
Connect the Ethernet cable to the local network or to the Internet.

Connecting Wi-Fi
Camera Setup
1. Connect OTG adapter (5-pin) and WiFi dongle to the micro USB terminal.

Smartphone Setup
1. Install the Wisenet Installation application.
2. Select the camera SSID after turning on the WiFi.
3. Run the Wisenet Installation application.
4. When you log in to the camera, the video will be connected. (initial password: 4321)
   - The video will be played without being logged in during the initial connection.
5. You can adjust angle of view while watching the video through smartphone.

Power Supply
Use the screwdriver to connect each line (+, –) of the power cable to the corresponding power port of the camera.

- When supplying PoE and DC 12V or PoE and AC 24V power at the same time, the equipment is powered by the external source (AC 24V, DC 12V).
  - You can also use a router featuring PoE to supply power to the camera.
  - Use PoE that is compliant with the IEEE 802.3af protocols.
  - It is recommended to use a single source for powering the equipment among PoE, DC 12V and AC 24V.
- Be careful not to reverse the polarity when you connect the power cable.
- AC 24V can be connected in non-polar union.
- If you want to connect an external device, you must turn off the external device before proceeding.
- Connect the set and the adapter power line first, and then connect the power cable to the outlet on the wall.

Power Cable Specification for Each Model

Connecting to Audio Input/Output

1. Connect the AUDIO IN port of the camera with the microphone or LINE OUT port of the amplifier that the microphone is connected to.
2. Connect the AUDIO OUT port of the camera with the speaker or LINE IN port of the amplifier that the speaker is connected to.
3. Check the specifications for audio input.
   - **Audio Codec**
     - Audio In : G.711 PCM (Bit Rate: 64kbps / Sampling Frequency: 8kHz), G.726 ADPCM (Bit Rate: 16Kbps, 24Kbps, 32Kbps, 40Kbps / Sampling Frequency: 8kHz), AAC (Bit Rate: 48Kbps / Sampling Frequency: 16kHz)
     - Audio Out : G.711 PCM (Bit Rate: 64kbps / Sampling Frequency: 8kHz)
   - **Full duplex Audio**
   - **Audio in** : Selectable (microphone/Line-in), Supported voltage: 2.5VDC (4mA), Input impedance: 2K Ohm
   - **Audio out** : Line-out (3.5mm mono jack), Maximum output: 1Vrms
   - **Line out impedance** : 600Ω
Connecting to the I/O port box
Connect the Alarm I/O cable to the corresponding port of the port box.

- ALARM-IN : Used to connect the alarm input sensor or external day/night sensor.
- ALARM-OUT : Used to connect the alarm output signal.
- GND : Common port for alarm in/output signal.

⚠️ If devices (e.g., flashing light and siren) that exceed the voltage and current specifications are connected by using the open collector method, it may cause malfunction.
Refer to the "Alarm Out Wiring Diagram" when connecting devices that exceed the voltage and current specifications. (page 18)

To connect the external sensor
Connect one strand of each signal line (2-strand) of the sensors to the [ALARM IN] port, and connect the other strand to the [GND] port.

Alarm In Wiring Diagram

To connect the alarm out
If devices (e.g., flashing light and siren) that exceed the voltage and current specifications are connected by using the open collector method, it may cause malfunction.
Refer to the alarm out connection diagram below when connecting devices that exceed the voltage and current specifications.

Alarm Out Wiring Diagram
You can set up the network settings according to your network configurations.

**CONNECTING THE CAMERA DIRECTLY TO LOCAL AREA NETWORKING**

**Connecting to the camera from a local PC in the LAN**

1. Launch an Internet browser on the local PC.
2. Enter the IP address of the camera in the address bar of the browser.

- A remote PC in an external Internet out of the LAN network may not be able to connect to the camera installed in the intranet if the port-forwarding is not properly set or a firewall is set.
- In this case, to resolve the problem, contact your network administrator.
- In the Device Manager, you can use the initial password, "4321" to set IP Address, Subnet Mask, Gateway, HTTP Port, VNP Port, IP type. After changing the network interface, for better security, access the web viewer and change the password.
- By factory default, the IP address will be assigned from the DHCP server automatically. If there is no DHCP server available, the IP address will be set to 192.168.1.100. To change the IP address, use the Device Manager. For further details on Device Manager use, refer to "Using Device Manager". (Page 21)

**CONNECTING THE CAMERA DIRECTLY TO A DHCP BASED DSL/CABLE MODEM**

1. Connect the user PC directly with the network camera.
2. Run the Device Manager and change the IP address of the camera so that you can use the web browser on your desktop to connect to the Internet.
3. Use the Internet browser to connect to the web viewer.
6. Move to [Basic] – [IP & Port], and set the IP type to [DHCP].
7. Connect the camera, which was removed from your PC, directly to the modem.
8. Restart the camera.

- For information on how to set DDNS, refer to the online help of Web Viewer.
- For information on how to set the IP format, refer to the online help of Web Viewer.
CONNECTING THE CAMERA DIRECTLY TO A PPPoE MODEM

1. Connect the user PC directly with the network camera.
2. Run the Device Manager and change the IP address of the camera so that you can use the web browser on your desktop to connect to the Internet.
3. Use the Internet browser to connect to the web viewer.
6. Move to [Basic] – [IP & Port] Setup Page, set the IP type to [PPPoE], and enter the network service’s ID and password.
7. Connect the camera, which was removed from your PC, directly to the modem.
8. Restart the camera.

- For information on how to set DDNS, refer to the online help of Web Viewer.
- For information on how to set the IP format, refer to the online help of Web Viewer.

CONNECTING THE CAMERA TO A BROADBAND ROUTER WITH THE PPPoE/CABLE MODEM

This is for a small network environment such as homes, SOHO and ordinary shops.

Configuring the network settings of the local PC connected to a Broadband Router

Configuring the network settings of the local PC connected to a Broadband Router, follow the instructions below.

- Select : <Network> – <Properties> – <Local Area Connection> – <General> – <Properties> – <Internet Protocol (TCP/IP)> – <Properties> – <Obtain an IP address automatically> or <Use the following IP address>.
- Follow the instructions below if you select <Use the following IP address>:
  - ex1) If the address (LAN IP) of the Broadband Router is 192.168.1.1
    - IP address : 192.168.1.100
    - Subnet Mask : 255.255.255.0
    - Default Gateway : 192.168.1.1
  - ex2) If the address (LAN IP) of the Broadband Router is 192.168.0.1
    - IP address : 192.168.0.100
    - Subnet Mask : 255.255.255.0
    - Default Gateway : 192.168.0.1
  - ex3) If the address (LAN IP) of the Broadband Router is 192.168.xxx.1
    - IP address : 192.168.xxx.100
    - Subnet Mask : 255.255.255.0
    - Default Gateway : 192.168.xxx.1

- For the address of the Broadband Router, refer to the product’s documentation.
- For more information about port forwarding of the broadband router, refer to “Port Range Forward (Port Mapping) Setup”. (Page 23)
**USING DEVICE MANAGER**

- More instructions of Device Manager can be found at [Help] menu of the main page.

**AUTOMATICALLY SEARCHING CAMERA**

If a camera is connected to the same network of the PC where device manager is installed, you can find network camera by using search function.

1. Click [Search] at the main page of device manager.
2. Check the camera from the list.
   - Check MAC address at the sticker attached to the camera.

**CONFIGURING IP ADDRESS**

If you want to change camera network setting, [Login OK] sign must be displayed at [Status]. Click [Authentication] at the main page to log in.

### Configuring Static IP

Manually insert and configure IP address & port information.

1. Click the camera from the list that you want to change the IP setting.
2. Click [IP Assign] at the main page of device manager.
3. Select [Assign the following IP address].
   - IP information of the camera will be displayed as previously set.
4. Fill in IP & Port related categories.

#### If not using a Broadband Router

For setting [IP Address], [Subnet Mask], and [Gateway], contact your network administrator.

- HTTP Port: Used to access the camera using the Internet browser, defaulted to 80.
- VNP Port: Used to control the video signal transfer, defaulted to 4520.
- RTSP Port: A port that controls real-time streaming. The initial value is 554.

<table>
<thead>
<tr>
<th>Category</th>
<th>Camera #1</th>
<th>Camera #2</th>
</tr>
</thead>
<tbody>
<tr>
<td>IP Address</td>
<td>192.168.1.100</td>
<td>192.168.1.101</td>
</tr>
<tr>
<td>Subnet Mask</td>
<td>255.255.255.0</td>
<td>255.255.255.0</td>
</tr>
<tr>
<td>Gateway</td>
<td>192.168.1.1</td>
<td>192.168.1.1</td>
</tr>
<tr>
<td>HTTP Port</td>
<td>8080</td>
<td>8081</td>
</tr>
<tr>
<td>VNP Port</td>
<td>4520</td>
<td>4521</td>
</tr>
<tr>
<td>RTSP Port</td>
<td>554</td>
<td>555</td>
</tr>
</tbody>
</table>

- If the [HTTP Port] is set other than 80, you must provide the [Port] number in the address bar of the Internet browser before you can access the camera.

#### If using a Broadband Router

- IP Address: Enter an address falling in the IP range provided by the Broadband Router.
  - ex) 192.168.1.2–254, 192.168.0.2–254, 192.168.XXX.2–254
- Subnet Mask: The [Subnet Mask] of the Broadband Router will be the [Subnet Mask] of the camera.
- Gateway: The [Local IP Address] of the Broadband Router will be the [Gateway] of the camera.

- The settings may differ depending on the connected Broadband Router model.
  - For more information, refer to the user manual of the applicable router.
- For more information about port forwarding of the broadband router, refer to “Port Range Forward (Port Mapping) Setup” (Page 23)

If the Broadband Router has more than one camera connected

Configure the IP related settings and the Port related settings distinctly with each other.

<table>
<thead>
<tr>
<th>Category</th>
<th>Camera #1</th>
<th>Camera #2</th>
</tr>
</thead>
<tbody>
<tr>
<td>IP Address</td>
<td>192.168.1.100</td>
<td>192.168.1.101</td>
</tr>
<tr>
<td>Subnet Mask</td>
<td>255.255.255.0</td>
<td>255.255.255.0</td>
</tr>
<tr>
<td>Gateway</td>
<td>192.168.1.1</td>
<td>192.168.1.1</td>
</tr>
<tr>
<td>HTTP Port</td>
<td>8080</td>
<td>8081</td>
</tr>
<tr>
<td>VNP Port</td>
<td>4520</td>
<td>4521</td>
</tr>
<tr>
<td>RTSP Port</td>
<td>554</td>
<td>555</td>
</tr>
</tbody>
</table>

- If the [HTTP Port] is set other than 80, you must provide the [Port] number in the address bar of the Internet browser before you can access the camera.
  - ex) http://IP address : HTTP Port
    - http://192.168.1.100:8080

5. Click [Apply] Button.
6. If the success message is displayed, click [OK].
Configuring Dynamic IP

Receive IP address from DHCP

- Example of the Dynamic IP environment
  - If a Broadband Router, with cameras connected, is assigned an IP address by the DHCP server
  - If connecting the camera directly to modem using the DHCP protocols
  - If IPs are assigned by the internal DHCP server via the LAN

1. Click the camera from the list that you want to change the IP setting.
2. Click <IP Assign> at the main page of device manager.
3. Select <Obtain an IP address automatically (DHCP)>.
4. Click [Apply] button.
5. If the success message is displayed, click [OK].

MANUALLY REGISTERING CAMERA

If the camera cannot be found using search function, the camera can be registered remotely by manually inserting IP information, if the camera is connected to external network.

1. Click <Add Devices> - <Manually Add Device> at the main page of device manager.
2. Insert the range of IP address that you search.
3. Select the <Model Name> of the camera that you register, and insert HTTP port, VNP port, ID, and password.
4. Click [Register] button.
5. Check if camera is registered.
   - Check MAC address at the sticker attached to the camera.

AUTOMATICALLY CONFIGURING IP

1. Click the camera from the list that you want to automatically configure the IP.
2. Click < > at the main page of device manager.
   - Equipment Setting menu appears.
3. At the menu, click <Auto IP Configure>.
4. Click [Close] button.
PORT RANGE FORWARD (PORT MAPPING) SETUP

If you have installed a Broadband Router with a camera connected, you must set the port range forwarding on the Broadband Router so that a remote PC can access the camera in it.

Manual Port Range Forwarding

1. From the Setup menu of the Broadband Router, select <Applications & Gaming> - <Port Range Forward>. For setting the port range forward for a third-party Broadband Router, refer to the user guide of that Broadband Router.

2. Select <TCP> and <UDP Port> for each connected camera to the Broadband Router.
The number of each port to be configured to the IP router should be set according to the port number designated in <Setup> - <Basic> - <IP & Port> on the camera web viewer.

3. When done, click [Save Settings]. Your settings will be saved.

- Port forwarding setting is an example of setting CISCO IP router.
- The settings may differ depending on the connected Broadband Router model. For more information, refer to the user manual of the applicable router.

Setting up Port Range Forward for several network cameras

- You can set a rule of Port Forwarding on the Broadband Router device through its configuration web page.
- A user can change each port using the camera setting screen.

When Camera1 and Camera2 are connected to a router:

<table>
<thead>
<tr>
<th>Start</th>
<th>End</th>
<th>Protocol</th>
<th>IP Address</th>
</tr>
</thead>
<tbody>
<tr>
<td>3000</td>
<td>3000</td>
<td>TCP/UDP</td>
<td>192.168.1.100</td>
</tr>
<tr>

</tr>
<tr>
<td>8080</td>
<td>8080</td>
<td>TCP/UDP</td>
<td>192.168.1.100</td>
</tr>
<tr>
<td>8081</td>
<td>8081</td>
<td>TCP/UDP</td>
<td>192.168.1.101</td>
</tr>
</tbody>
</table>

- Port forwarding can be done without additional router setup if the router supports the UPnP (Universal Plug and Play) function. After connecting the network camera, select the checkbox from the menu <Quick connect> in <Wisenet DDNS> in “Settings -> Network -> DDNS”. 
CONNECTING TO THE CAMERA FROM A SHARED LOCAL PC

1. Run device manager.
   It will scan for connected cameras and display them as a list.
2. Double-click a camera to access.
   The Internet browser starts and connects to the camera.

Access to the camera can also be gained by typing the camera’s IP address in the address bar of the Internet browser.

CONNECTING TO THE CAMERA FROM A REMOTE PC VIA THE INTERNET

On a remote computer that is not in the Broadband Router’s network cluster is not allowed, users can access cameras within a Broadband Router’s network by using the camera’s DDNS URL.

1. Before you can access a camera in the Broadband Router network, you should have set the port range forward for the Broadband Router.
2. From the remote PC, launch the Internet browser and type the DDNS URL address of the camera, or the IP address of the Broadband Router in the address bar.
   ex) http://ddns.hanwha-security.com/ID

To use Wisenet DDNS, sign up at the Wisenet DDNS homepage (http://ddns.hanwha-security.com) and register the product at [My DDNS]>[Register Product].
CONNECTING TO THE CAMERA

Normally, you would

1. Launch the Internet browser.
2. Type the IP address of the camera in the address bar.
   ex) IP address (IPv4) : 192.168.1.100 → http://192.168.1.100
   - the Login dialog should appear.
   IP address (IPv6) : 2001:230:abcd:0000:0000:00ff:1111

If the HTTP port is other than 80

1. Launch the Internet browser.
2. Type the IP address and HTTP port number of the camera in the address bar.
   ex) IP address : 192.168.1.100:HTTP Port number(8080)

Using URL

1. Launch the Internet browser.
2. Type the DDNS URL of the camera in the address bar.
   ex) URL address : http://ddns.hanwha-security.com/ID
   - the Login dialog should appear.

Network connection is disabled in the LAN only environment.

Connecting via UPnP

1. Run the client or operating system in support of the UPhP protocol.
2. Click the camera name for search.
   In the Windows operating system, click the camera name searched from the network menu.
   - The login window is displayed.

Connecting via Bonjour

1. Run the client or operating system in support of the Bonjour protocol.
2. Click the camera name for search.
   In the Mac operating system, click the camera name searched from the Bonjour tab of Safari.
   - The login window is displayed.

To check the DDNS address

If the camera is connected directly to the DHCP cable modem, DSL modem, or PPPoE modem, the IP address of your network will be changed each time you try to connect to the ISP (Internet Service Provider) server.
If this is the case, you will not be informed of the IP address changed by DDNS.
Once you register a dynamic IP-based device with the DDNS server, you can easily check the changed IP when you try to access the device.
To register your device to the <DDNS> server, visit http://ddns.hanwha-security.com and register your device first, and then set the Web Viewer’s <Network> - <DDNS> to <Wisenet DDNS>, as well as providing <Product ID> that had been used for DDNS registration.
PASSWORD SETTING
When you access the product for the first time, you must register the login password. When the “Password change” window appears, enter the new password.

- For a new password with 8 to 9 digits, you must use at least 3 of the following: uppercase/lowercase letters, numbers and special characters. For a password with 10 to 15 digits, you must use at least 2 types of those mentioned.
  - Special characters that are allowed: ~`!@#$%^*()_+-=|{}[].?
- For higher security, you are not recommended to repeat the same characters or consecutive keyboard inputs for your passwords.
- If you lost your password, you can press the [RESET] button to initialize the product. So, don’t lose your password by using a memo pad or memorizing it.

LOGIN
Whenever you access the camera, the login window appears. Enter the User ID and password to access the camera.

1. Enter “admin” in the <User name> input box. The administrator ID, “admin”, is fixed and can not be changed.
2. Enter the password in the <Password> input field.
3. Click [OK].
   - If you have logged in successfully, you will the Live Viewer screen.
   - When you access the camera web viewer, pay special attention to the security by checking whether the image data is encrypted.
   - If you check the “Remember my credentials” option when your input is done, in future you will be logged in automatically without being prompted to enter the login information.
   - You will experience the best video quality if the screen size is 100%. Reducing the ratio may cut the image on the borders.

PLUG-IN SUPPORT SPECIFICATIONS FOR EACH BROWSER
The existing plug-in web viewer and a new plug-in free web view is embedded together. This allows you to use the web viewer in newer browser environments that do not support plug-ins, such as Chrome, EDGE and FireFox (Windows 64-bit only). For browsers that allow the installation of plug-ins, such as IE and Safari, installing the plug-in is recommended.

According to the browser environment, the following differences may be observed.

- Chrome, FireFox (Windows 64bit only), EDGE, and Safari browsers : The browser environment does not allow the use of a plug-in, but with the plug-in-free web viewer installed, you can use the web viewer.
  - Plug-in free web viewers may have lower performance than plug-in-based web viewers depending on the video codec and resolution.
  - When there is delay in the live video, a plug-in free profile (HD (1280x720) and 20 FPS of H.264) is automatically created.
  - There may be delays in playback depending on the codec and resolution.
  - The plug-in free feature has been optimized for the Chrome browser.
- IE, Safari browser : Even if you do not install the plug-in from the existing plug-in web viewer, you can use the web viewer with limited functionality.
  - To monitor/play saved video seamlessly, you are required to install a plug-in.
INSTALLING WebViewer PLUGIN

If you try to access the plugin free web viewer from IE and request a live view with a codec other than the currently playing codec, or attempt to use the recorded video playback function, an installation message will appear. At this time, the web viewer plugin must be installed to use the functions normally.

1. When the monitoring page is accessed for the very first time, the installation page is displayed. Click [Download plugin] to begin installation.

   - If the plug-in installation file download status is suspended at 99% in the Internet Explorer browser, retry it after selecting “Release SmartScreen filter” in “Tool → SmartScreen filter”.

2. Click [Run] in the message window.
3. Click [Yes] when the notice window saying that all browser windows will be closed.

   - Steps 4 and 5 will be skipped if no Web Viewer Plug-in is installed.

4. When the old version of the Web Viewer Plug-in is installed, a notice window saying the old version will be deleted is displayed. Click [Yes] when the notice window is displayed.
5. Click [OK].
   The old version of Web Viewer Plug-in is deleted.
6. Click [Install] to begin installation of the Web Viewer Plug-in.
7. Click [Finish].
   Web Viewer Plug-in installation is completed.

   - In your internet explorer, if you need to move to the installation screen after installing the webviewer plugin, check whether webviewer_activexplugin_32b.control in the “Tool → Additional Function Management” menu is “Activated”. If not, and if there is a persisting problem, then select “Tools → Internet Options → General” and delete all the search records. If the problem persists, please register the IP or Domain of your camera in “Tools → Internet Options → Security → Trusted sites”.

USING A PLUG-IN FREE WEBVIEWER

Although it is not possible to install plug-ins separately If you access the camera from Google Chrome, Mozilla Firefox, or the MS Edge web browser, you can view and control the camera video without installing plug-ins.

1. Enter your username and password to log in.
2. When you are logged in, a camera live view screen appears.

To set the camera

1. Click the [Setup ( ] icon.
2. The Settings window appears.
3. It is possible to manage the settings of the camera’s basic information, PTZ, video and audio, network, event, analysis, system, and open platform via the network.
4. Click <Help ( )> to view detailed descriptions of each function.

## WiseStream II

- **Support**

## Video Quality Adjustment

- **H.264/H.265** : Target Bitrate Level Control
- **MJPEG** : Target Bitrate Level Control

## Bitrate Control Method

- **H.264/H.265** : CBR or VBR
- **Motion JPEG** : VBR

## Streaming Capability

- Multiple Streaming (Up to 10 Profiles)

## Audio In

- Selectable (Mic IN/Line IN)
- Supply voltage: 2.5VDC(4mA), Input impedance: approx. 2K Ohm

## Audio Out

- Line out, Max output level: 1 Vrms

## Audio Compression Format

- **G.711 μ-law / G.726 Selectable**
- **G.726 (ADPCM) 8KHz, G.711 8KHz**
- **G.726** : 160Kbps, 240Kbps, 320Kbps, 400Kbps
- **AAC-LC** : 48Kbps at 8/16/32/48KHz

## Audio Communication

- Bi-directional (2-Way)

## Protocol

- **TCP/IP, UDP/IP, RTCP(TCP, RTCP, RTP, NTP, HTTP, HTTPS, SSL/TLS, DHCP, PPPoE, FTP, SMTP, ICMP, IGMP, SNMPv1/v2c/v3(MIB-2), APP, DNS, DON, GoS, PIM-SM, UPnP, Bonjour**

## Security

- HTTPS(SSL) Login Authentication
- Digest Login Authentication
- IP Address Filtering
- User access Log
- 802.1x Authentication (EAP-TLS, EAP-LEAP)

## Streaming Method

- Unicast / Multicast

## Max. User Access

- 20 users at Unicast Mode

### TROUBLESHOOTING

<table>
<thead>
<tr>
<th>PROBLEM</th>
<th>SOLUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>When an Windows 10 user accesses the web viewer through Chrome or Firefox, the sound volume of microphone changes periodically.</td>
<td>- This is what happens when microphone driver has been set to Realtek driver. &lt;br&gt; Install the High Definition Audio device (Windows Default Driver) or the third party driver as the microphone driver.</td>
</tr>
<tr>
<td>No video is displayed when accessing the plug-in free webviewer on Safari via HTTPS.</td>
<td>- On the authentication popup window prompted when initially accessing https, click &quot;View Authentication Certificate&quot; and select the &quot;Always Trust when connecting to the designated webviewer IP&quot; check box. &lt;br&gt; - If the webviewer continues failing to display a video after you select &quot;Next&quot; on the message window below, press the command key + Q to exit the Safari browser, access again and follow the procedures stated above.</td>
</tr>
<tr>
<td>I can’t access the camera from a web browser.</td>
<td>- Check to make sure that the camera’s Network settings are appropriate. &lt;br&gt; - Check to make sure that all network cables have been connected properly. &lt;br&gt; - If connected using DHCP, verify that the camera is able to acquire dynamic IP addresses without any problem. &lt;br&gt; - If the camera is connected to a Broadband Router, verify that port forwarding is properly configured.</td>
</tr>
<tr>
<td>Viewer got disconnected during monitoring.</td>
<td>- Connected Viewers become disconnected upon any change to camera or network configurations. &lt;br&gt; - Check all network connections. &lt;br&gt; - If the camera is connected over an PPPoE network, it’s possible for Viewer to disconnect under poor network conditions.</td>
</tr>
<tr>
<td>The camera connected to the network is not detected in the Device Manager program.</td>
<td>- Turn off the firewall settings on your PC and then search the camera again.</td>
</tr>
<tr>
<td>Images overlap.</td>
<td>- Check whether two or more cameras are set to a single multicast address instead of different addresses. If a single address is used for multiple cameras, the images may overlap.</td>
</tr>
<tr>
<td>No image appears.</td>
<td>- If the transmission method is set to multicast, check whether there is a router that supports multicast in the LAN the camera is connected to.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>PROBLEM</th>
<th>SOLUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Voice is not recorded even though audio input settings are configured.</td>
<td>- Select the &lt;Audio Input&gt; checkbox from &lt;Basic&gt; - &lt;Video Profile&gt;.</td>
</tr>
<tr>
<td>&lt;Motion detection&gt; of &lt;Analytics&gt; is set to &lt;Enable&gt;, but no notification e-mail reaches me even when an analysis event had occurred.</td>
<td>- Verify the settings in the following sequence: &lt;br&gt; A. Check &lt;Data &amp; Time&gt; settings. &lt;br&gt; B. The &lt;Motion detection&gt; should be set to &lt;Enable&gt;. &lt;br&gt; C. Check if the &lt;E-mail&gt; option of &lt;Event setup&gt; menu is checked to use.</td>
</tr>
<tr>
<td>No signal is found at the Alarm Output port even when an intelligent video analysis event is generated.</td>
<td>- Check alarm output port settings.</td>
</tr>
<tr>
<td>Cannot record into the Micro SD memory card.</td>
<td>- Check if the memory card is defective.</td>
</tr>
<tr>
<td>Micro SD memory card is inserted but the camera does not operate properly.</td>
<td>- Check if the memory card is inserted in the proper direction. Operation of memory card that is formatted by other devices is not guaranteed with this camera unit. &lt;br&gt; - Format the memory card again in &lt;Setup&gt; - &lt;Event&gt; - &lt;Storage&gt; menu.</td>
</tr>
<tr>
<td>Cannot record in the NAS.</td>
<td>- Confirm that the information registered in the NAS is correct.</td>
</tr>
<tr>
<td>It reports that NAS setting has failed.</td>
<td>- Confirm that the IP address of the NAS is valid. &lt;br&gt; - Confirm that the ID/password of the NAS is valid. &lt;br&gt; - Confirm that you can access the folder designated as the default folder using the ID of the NAS. &lt;br&gt; - Confirm that the NAS SMB/CIFS items are unchecked. &lt;br&gt; - Confirm that the NAS IP address and the camera IP address are in the same format. &lt;br&gt; ex) The NAS &amp; camera subnet mask initial value is 255.255.255.0. If the IP address is 192.168.20.32 then the NAS IP address should be in the range of 192.168.20.1~192.168.20.255. &lt;br&gt; - Check whether you tried to access as another user without formatting the default folder that was saved or used. &lt;br&gt; - Confirm that you used recommended NAS equipment.</td>
</tr>

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991
Copyright (C) 1989, 1991 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software - to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead. You can apply it to your programs, too. When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish) that you received and that you receive source code or can get it if you want it, that you can change the software and use new features for free by changing it, and that you can distribute improved versions of the program under the terms for keeping them free. The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all parts of the work, except as otherwise stated. For a work containing a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License, the “work” includes previous versions of the work.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

You may copy and distribute verbatim copies of this license document, but changing it is not allowed.

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed at all. The precise terms and conditions for copying, distribution and modification follow.

c) Accompany it with the offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machinereadable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

d) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

e) Accompany it with the information you received as to the offer to distribute corresponding source code.

(Alternatively, if you received the object code and the corresponding source code is already available on the public web, you may offer it to your recipients under terms equivalent to the terms of this License, if the Distributed Version is not otherwise modified. The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major distribution of a work, or otherwise stated in this section as part of the work itself.)
components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

if the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who
GRANTS YOU PERMISSION TO MAKE COPIES OF A COVERED WORK FOR ANY PURPOSE WITH THE EXCEPT OF SHARING IN A \PUBLIC\" USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE
YOU SHOULD ALSO GET YOUR EMPLOYER IF YOU WORK AS A PROGRAMMER OR YOUR SCHOOL, IF ANY, TO SIGN A "COPYRIGHT DISCLAIMER" FOR THE PROGRAM IF NECESSARY. HERE IS A SAMPLE ; ALTER THE NAMES.
Yoyodyne, Inc., hereby disclaims all copyright interest in the program "Gnomovision" which makes passes at compilers written by James Hacker. signature of

{}
Basic Permissions. All rights granted under this License are for the term of the copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License if the output, without any modification of that output, is not itself a covered work. Under this License, a covered work means a work subject to copyright, on whatever media, with or without any modification or protection, that satisfies the section 1 definition of "work", provided that any other such works that exist or later be covered by this License, without limitation as to modified versions, also satisfy the section 1 definition for the work. You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying the work, and provide its Corresponding Source under terms no less protective of copyright than these. You may not convey a covered work under terms that are different from this License, for example by granting access for reading or execution only on a computer network without also conveying an equivalent copy of its Corresponding Source. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any other otherwise than as expressly permitted under this License, is prohibited without the specific written consent of the copyright holder.

2. Basic Permissions. All rights granted under this License are for the term of the copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License if the output, without any modification of that output, is not itself a covered work. Under this License, a covered work means a work subject to copyright, on whatever media, with or without any modification or protection, that satisfies the section 1 definition of "work", provided that any other such works that exist or later be covered by this License, without limitation as to modified versions, also satisfy the section 1 definition for the work. You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying the work, and provide its Corresponding Source under terms no less protective of copyright than these. You may not convey a covered work under terms that are different from this License, for example by granting access for reading or execution only on a computer network without also conveying an equivalent copy of its Corresponding Source. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any other otherwise than as expressly permitted under this License, is prohibited without the specific written consent of the copyright holder.

3. Protecting Users' Legal Rights from Anti-Circumvention Law. No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws protecting against technological measures that can reasonably be considered effective for protecting against unauthorized copying, reproducing, modifying, displaying, distributing, or otherwise using a work.

4. Conveying Verbatim Copies. You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on the medium from which you convey the Program, a copy of this License along with the Corresponding Source; and maintain consistentinterfaces.

5. Conveying Modified Source Versions. You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any additional terms added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the work under terms consistent, at your option, with this License or with a term that is equivalent to this License. This License gives no license to make derivative works.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices, but only once as the user begins to run the work. A "network server" means the facilities necessary to provide the software or service, such as network nodes running the necessary networking software, including the server in which the client software runs. A "network application" means the software running primarily on a network server with some interaction with a user interface in that network application's environment.

6. Conveying Non-Source Forms. You may convey copies of the Program in object code form under the terms of sections 4 and 5, provided that you also convey the Corresponding Source for the same version of the Program.

7. Additional Terms. "Additional permissions" are terms that supplement the terms of this License by making exceptions or adding exceptions for one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. Additional permissions that apply only to a part of the Program may be stated in terms of a section name. The requirements for conveying this additional permission, if any, must be conspicuously published or contained within the Corresponding Source.

8. Termination. You may not propagate or modify a covered work except as expressly provided by this License. Any attempt to propagate or modify it with or for the purpose of violating this License shall nullify your previous grants of the right under this License to propagate or modify any copies of the Program or work that are propagated or modified as permitted by this License. Furthermore, any parties providing separable portions of the combined work under this License shall not have the right to forcibly limit the terms and conditions of these portions when combined with others in the combined work.

9. Acceptance Not Required for Having Copies. Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. The original license grant includes, but may not be limited to, this additional grant of rights.

10. Automatic Licensing of Downstream Recipients. Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. The original license grant includes, but may not be limited to, this additional grant of rights.

11. Patents. A "contributor" is any person or entity that provides an "essential" patent claim.

12. Installation Information. "Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install a covered work onto a computer without the work being incorporated into an installation generated by an end-user product. You may convey an object code version of a covered work under this section, in which you convey an object code version of a covered work, and the corresponding Installation Information for said covered work, only if the code version's object code and the Installation Information are provided under this License (see section 3). You may convey an object code version of a covered work under this section, in which you convey an object code version of a covered work, and the corresponding Installation Information for said covered work, only if the code version's object code and the Installation Information are provided under this License (see section 3). You may convey an object code version of a covered work under this section, in which you convey an object code version of a covered work, and the corresponding Installation Information for said covered work, only if the code version's object code and the Installation Information are provided under this License (see section 3). You may convey an object code version of a covered work under this section, in which you convey an object code version of a covered work, and the corresponding Installation Information for said covered work, only if the code version's object code and the Installation Information are provided under this License (see section 3).

13. Additional Terms. "Additional permissions" are terms that supplement the terms of this License by making exceptions or adding exceptions for one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. Additional permissions that apply only to a part of the Program may be stated in terms of a section name. The requirements for conveying this additional permission, if any, must be conspicuously published or contained within the Corresponding Source.

14. Acceptance Not Required for Having Copies. Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. The original license grant includes, but may not be limited to, this additional grant of rights.

15. Automatic Licensing of Downstream Recipients. Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. The original license grant includes, but may not be limited to, this additional grant of rights.

16. Further Rights For the Benefit of the Work. You may convey copies or a derivative of this License, and add to the text of the license or otherwise modify that text or additional permissions under terms of supplemental permissions granted by the copyright holder of that version or version with supplemental permissions, if you also do one of the following:

a) Accompany the copies or derivative with the corresponding source distribution.

b) Convey the object code in compiled or object code form accompanied by the Corresponding Source of the same version, or an equivalent.

c) Convey the object code in compiled or object code form accompanied by a notice that says that you do not distribute this License; in this case, a notice stating that you store, run, modify, compile, or otherwise make available the object code under this License, regardless of what is conveyed along with it, if any; or

d) Convey the object code in compiled or object code form accompanied by a notice that says that you modify the object code and will make it available under this License (subject to section 14).
If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply

17. Interpretation of Sections 15 and 16.

LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO

INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO

THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING

THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME

THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM “AS IS” WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR

Mozilla Public License
Since we, at Hanaele Tcherni, used the Mozilla Firefox component without modifying the source code according to the MOZILLA Public license 1.1, we are not obliged to provide the source code of the corresponding constituent.

1. Definitions.
1.1.0. "Commercial Use" means distribution or otherwise making the Covered Code available to a third party.
1.1.1. "Contributor" means each entity that creates or contributes to the creation of Modifications.
1.1.2. "Contributor Version" means the combination of the Original Code, prior Modifications made by a particular Contributor.
1.1.3. "Covered Code" means the Original Code or Modifications or the combination of the Original Code and Modifications, in each case including portions thereof.
1.2. "Electronic Distribution Mechanism" means a mechanism generally accepted in the software development community for the electronic transfer of data.
1.3. "Expat" means the Covered Code in any form other than Source Code.
1.4. "Initial Developer" means the individual or entity identified as the Initial Developer in the Source Code notice required by Exhibit A.
1.5. "Layered Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.
1.6. "Licensable" means this document.
1.7. "Licensable" means the right to grant, to the maximum extent possible, whether at the time of the Initial grant or subsequently acquired, any and all of the rights conveyed herein.
1.8. "Modifications" means any addition to or deletion from the substance or structure of either the Original Code or any previous Modifications. When Covered Code is released as a series of files, a Modification is:
A. Any addition to or deletion from the contents of a file containing Original Code or previous Modifications.
B. Any new file that contains any part of the Original Code or previous Modifications.
1.9. "Mozilla Public License" means the License.
1.10. "Original Code" means Source Code of computer software code which is described in the Source Code notice required by Exhibit A as Original Code, and which, at the time of its release under this License is not already Covered Code governed by this License.
1.10.1. "Patent Claims" means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor. 
1.1. "Source Code" means the preferred form of the Covered Code for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an Executable, or source code differential comparisons against either the Original Code or another well-known, available Covered Code of the Contributor’s choice. The Source Code can be in a compressed or archival form, provided the appropriate decompression or de-archiving software is widely available for no charge.

1.2. "Contribution" means any contribution made to the Covered Code in accordance with the terms and conditions of this License.

2. License Grant. The Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims:

(a) under intellectual property rights (other than patent or trademark) Licenseable by Initial Developer to use, reproduce, modify, display, perform, sublicense and distribute the Original Code or portions thereof.

(b) under Patents Claims infringed by the making, using or selling of Original Code, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Code.

(c) the licenses granted in this Section 2.1(a) and (b) are effective on the date Initial Developer first distributes Original Code under the terms of this License.

2.2. Contributor Grant. Subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licenseable by Contributor to use, reproduce, modify, display, perform, sublicense and distribute the Covered Code or portions thereof.

(b) under Patents Claims which are reasonably necessary for the Contributions made by such Contributor (or portions thereof) either on an unmodified basis, with other Modifications, as Covered Code and/or as part of a Larger Work;

(c) under Patents Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone or in combination with the Contributor Version (or portions of such combination) to make, use, sell, offer for sale, have made, and/or otherwise dispose of the Contribution or of any part thereof;

(d) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination);

(e) in the case of Contributions made in accordance with Section 2.1(b) above, no patent license is granted: 1) for code that You delete from the Original Code; 2) separate from the Original Code; or

(f) for infringements caused by: i) the modification of the Original Code or ii) the combination of the Original Code with other software or devices.

(f) if You distribute the Modifications created by such Contributor (or portions thereof) either on an unmodified basis, with other Modifications, as Covered Code and/or as part of a Larger Work; and

(g) under Patents Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of the Modifications.

(h) in the case of Contributions made in accordance with Section 2.1(b) above, no patent license is granted: 1) for any code that Contributor has deleted from the Contributor Version; 2) separate from the Contributor Version; or

(i) for infringements caused by: i) the modification of the Contributor Version or ii) the combination of Modifications made by that Contributor (or portions thereof) either on an unmodified basis, with other Modifications, as Covered Code and/or as part of a Larger Work; and

2.3. Availabilty of Source Code. Any Modification which You create or to which You contribute must be made available in Source Code form. The Source Code version must be distributed under the terms of this License, including by exchanging electronically.

2.4. Availability of Source Code. Any Modification which You create or to which You contribute must be made available in Source Code form. The Source Code version must be distributed under the terms of this License, including by exchanging electronically.

2.5. Description of Modifications. You must cause all Covered Code to which You contribute to contain a file documenting the changes You made to create that Covered Code and the date of the changes. You must also include a prominent statement that the Modification is derived, directly or indirectly, from Original Code provided by the Initial Developer and include an appropriate copyright notice describing the changes You made to the Original Code (the Source Code, and (b) in any notice in an Executable version or related documentation in which You describe the origin or ownership of the Covered Code.

3.3. Description of Modifications. You must cause all Covered Code to which You contribute to contain a file documenting the changes You made to create that Covered Code and the date of the changes. You must include a prominent statement that the Modification is derived, directly or indirectly, from Original Code provided by the Initial Developer and include an appropriate copyright notice describing the changes You made to the Original Code (the Source Code, and (b) in any notice in an Executable version or related documentation in which You describe the origin or ownership of the Covered Code.

3.4. Intellectual Property Matters

(a) Third Party Claims. If Contributor has knowledge that a license under a third party’s intellectual property rights is required to exercise the rights granted by such Contributor in the Covered Code, Contributor must inform the Initial Developer. If the Initial Developer obtains knowledge that the Covered Code is subject to a license, Contributor must inform the Initial Developer.

(b) Open Source Licenses. Contributor is not required to provide information regarding any open source licenses which it has incorporated into the Covered Code.

(c) Contributor APIs. If Contributor’s Modifications include an application programming interface and Contributor has knowledge of patent licenses which are reasonably necessary for the Modifications made by such Contributor (or portions thereof) either on an unmodified basis, with other Modifications, as Covered Code and/or as part of a Larger Work.

(d) Without limiting the generality of the foregoing, if You distribute the Modifications created by such Contributor (or portions thereof) either on an unmodified basis, with other Modifications, as Covered Code and/or as part of a Larger Work, then You must provide a description of the Modifications.

(e) In the event of termination under Sections 8.1 or 8.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You prior to the effective date of termination shall remain valid and in full force and effect.

7. DISCLAIMER OF WARRANTY.

7.1. Covered Code is provided under this License on an "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION, WARRANTIES THAT THE COVERED CODE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NONINFRINGEMENT. THE ENTIRE RISK ASSUMED BY THE USER IN THE USE OF THE COVERED CODE IS DISCLAIMED.

7.2. Any law or regulation which, by its terms, requires that the Covered Code be distributed under the terms of this License, shall apply only to that Covered Code which is distributed under the terms of this License.

8. LIMITATION OF LIABILITY.

8.1. UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF ANY COVERED CODE, OR ANY SUPPLIER OF ANY OF SUCH SUBPARTIES, BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE COVERED CODE, OR THE MODIFICATIONS OR USE OR OTHER DEALINGS IN THE COVERED CODE.

8.2. If You initiate litigation by asserting a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You file such action is referred to as "Participant") alleging that:

(a) such Participant’s Modifications include an application programming interface and Contributor has knowledge of any such license which are reasonably necessary for the Modifications made by such Participant (or portions thereof) either on an unmodified basis, with other Modifications, as Covered Code and/or as part of a Larger Work;

(b) any software, hardware, or device, other than such Participant’s Contributor Version, directly or indirectly infringes any patent, then any rights granted to You by such Participant under Sections 2.1(b) and 2.2(b) are revoked effective as of the date You first made, used, sold, distributed, or had made, Modifications made by that Participant.

(c) you assert a patent infringement claim against Participant alleging that such Participant’s Contributor Version directly or indirectly infringes any patent where such assertion of patent infringement is not made in good faith, then the rights granted by such Participant to You under Sections 2.1(b) and 2.2(b) shall be taken into account in determining the amount or value of any payment or license.

8.3. In the event of termination under Sections 8.1 or 8.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You prior to the effective date of termination shall remain valid and in full force and effect.

9. LIMITATION OF LIABILITY.

9.1. Under no circumstances and under no legal theory—whether tort (including negligence), contract, or otherwise—shall you, the initial developer, any other contributor, or any distributor of any covered code, or any supplier of any such parties, be liable for any indirect, special, incidental, or consequential damages (including, but not limited to, procurement of substitute goods or services; loss of use, data, or profits; or business interruption) however caused and on any theory of liability, whether in contract, strict liability, or tort (including negligence or otherwise) arising in any way out of the use or distribution of the covered code, or the modifications or use or other dealings in the covered code.

9.2. Notwithstanding Section 9.1 above, no patent license is granted: 1) for code that you delete from the original code; 2) separate from the original code; or 3) for infringements caused by: i) the modification of the original code or ii) the combination of the original code with other software or devices.

9.3. The licenses granted in this section 2.1(a) and (b) are effective on the date initial developer first distributes original code under the terms of this license.

9.4. Effect of New Versions. Once Covered Code has been published under a particular version of the License, You may always continue to use it under the terms of that version. Free distribution of the Covered Code under the terms of this License, if any, is permitted for any purpose.

9.5. Infringement Claims. Notwithstanding Section 10.2 above, no one other than the Initial Developer has the right to modify the terms applicable to Covered Code created under this License.

9.6. Authority of Licensor. If You distribute Covered Code which You are permitted to distribute under this License (governed by this License), You must (a) restate Your license so that the phrase "Mozilla", "MOZILLAPLPL", "MOZPL", "MPL", "MPL" or any confusingly similar phrase do not appear in your license (except to note that your license differs from this Licence) and (b) otherwise make it clear that Your version of the license contains terms which differ from the terms of the Mozilla Public License.

10. Termination.

10.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms here and fail to cure such breach within 60 days of becoming aware of the breach. After the expiration of the 60 day notice period specified above.

10.2. If You institute litigation by asserting a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You file such action is referred to as “Participant”)

10.3. if You assert a patent infringement claim against Participant alleging that such Participant’s Contributor Version directly or indirectly infringes any patent where such assertion of patent infringement is not made in good faith, then the rights granted by such Participant to You under Sections 2.1(b) and 2.2(b) shall be taken into account in determining the amount or value of any payment or license.

11. MISCELLANEOUS.

11.1. This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

11.2. This License shall be governed by California law provisions (except to the extent applicable law, if any, precludes the application of California law). In any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California, with venue lying in Santa Clara County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys’ fees and expenses.

11.3. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which would
provides that the language of a contract shall be construed against the drafter shall not apply to this License.

12. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and you agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

13. MULTIPLE-LICENSED CODE.

Initial Developer may designate portions of the Covered Code as “Multiple-Licensed”. Multiple-Licensed means that the Initial Developer permits you to use portions of the Covered Code under the terms of either the MPL or the alternative license, if any, specified by the Initial Developer in the file described in Exhibit A.

EXHIBIT A - Mozilla Public License.

The contents of this file are covered under the Mozilla Public License Version 1.1 (the “License”); you may not use this file except in compliance with the License. You may obtain a copy of the License at http://www.mozilla.org/MPL/ Software distributed under the License is distributed on an “AS IS” BASIS, WITHOUT WARRANTY OF ANY KIND, either express or implied. See the License for the specific language governing rights and limitations under the License. The Original Code is __________________________________________________________.

The Initial Developer of the Original Code is __________________________. Portions created by __________________________ are Copyright (C) __________. All Rights Reserved.

Contributor(s): ______________________________________.

Alternatively, the contents of this file may be used under the terms of the _______ license (the [____] License), in which case the provisions of [____] License are applicable instead of those above. If you wish to allow use of your version of this file only under the terms of the [____] License and not to allow others to use your version of this file under the MPL, indicate your decision by deleting the provisions above or replace them with the notice provided as the alternative requirement. If you do not delete the provisions above, a recipient may use your version of this file under either the MPL or the [____] License.

[NOTE: The text of this Exhibit A may differ slightly from the text of the notices in the Source Code files of the Original Code. You should use the text of this Exhibit A rather than the text found in the Original Code Source Code for Your Modifications.]

The Independent JPEG Group’s JPEG Software

The software included in this product contains copyrighted software that is licensed under the JPEG License.

- JPEG License
- Code project . Generating Outline OpenGL, Libjpeg

This distribution contains the sixth public release of the Independent JPEG Group’s free JPEG software. You are welcome to redistribute this software and to use it for any purpose, subject to the conditions under the LEGAL ISSUES below.

Serious users of this software (particularly those incorporating it into larger programs) should contact US at jpeg-info@uunet.uu.net to be added to our electronic mailing list. Mailing list members are notified of updates and have a chance to participate in technical discussions.

This software is the work of Tom Lane, Philip Gladstone, Jim Boucher, Lee Crocker, Julian Minguillon, Luis Ortiz, George Phillips, Davide Rossi, Guido Vollbeding, Ge' Wellens, and other members of the Independent JPEG Group.

LEGAL ISSUES

In plain English:

1. We don’t promise that this software works. (But if you find any bugs, please let us know!)
2. You can use this software for whatever you want. You don’t have to pay us.
3. You may not pretend that you wrote this software. If you use it in a program, you must acknowledge somewhere in your documentation that you’ve used the JPEG code.

In legalese:

The authors make NO WARRANTY or representation, either express or implied, with respect to this software, its quality, accuracy, merchantability, or fitness for a particular purpose. This software is provided "AS IS", and you, its user, assume the entire risk as to its quality and accuracy.

This software is copyright (C) 1991-1998, Thomas G. Lane. All Rights Reserved except as specified below.

Permission is hereby granted to use, copy, modify, and distribute this software, and to make derivative works, and to sell or otherwise distribute copies of the software, subject to the following conditions:

(1) Any part of the source code for this software is distributed, then this README file must be included, with this copyright and no-warranty notice unaltered, and any additions, deletions, or changes to the original files must be clearly indicated in accompanying documentation.

(2) If only executable code is distributed, then the accompanying documentation must state that "this software is based in part on the Independent JPEG Group's software." and any additions, deletions, or changes to the original files must be clearly indicated in accompanying documentation.

(3) Permission for use of this software is granted only if the user accepts full responsibility for any undesirable consequences; the authors accept NO LIABILITY for damages of any kind.

These conditions apply to any software derived from or based on the JPEG code, not just to the unmodified binary. If you use our work, you ought to acknowledge us.

Permission is NOT granted for the use of any US author’s name or company name in advertising or publicity relating to this software or products derived from it. This software may be referred to only as "the Independent JPEG Group’s software.

We specifically permit and encourage the use of this software as the basis of commercial products, provided that all warranty or liability claims are assumed by the product vendor.

ansi2knr.c is included in this distribution by permission of L. Peter Deutsch, sole proprietor of its copyright holder, Aladdin Enterprises of Menlo Park, CA.

ansi2knr.c is NOT covered by the above copyright and conditions, but instead by the usual distribution terms of the Free Software Foundation; principally, that you must include source code if you redistribute it. (See the file ansi2knr.c for full details.) However, since ansi2knr.c is not needed as part of any program generated from the US code, this does not limit you more than the foregoing paragraphs do.

The Unix configuration script "configure" was produced with GNU Autoconf. It is copyright by the Free Software Foundation but is freely distributable. The same holds for its supporting scripts (config-guess, config-sub, config-gcmp, refresh, etc). Another support script, install-sh, is copyright by M.I.T. but is freely distributable. It appears that the arithmetic coding option of the JPEG spec is covered by patents owned by IBM, AT&T, and Mitsubishi. Hence arithmetic coding cannot legally be used without obtaining one or more licenses. For this reason, support for arithmetic coding has been removed from the free JPEG software. Since arithmetic coding provides only a marginal gain over the unpatented Huffman mode, it is unlikely that many implementations will support it. so far as we are aware, there are no patent restrictions on the remaining code.

The US distribution formerly included code to read and write GIF Files. To avoid entanglement with the Unix's LZW patent, GIF reading support has been removed altogether, and the GIF writer has been simplified to produce "uncompressed GIFs". This technique does not use the LZW algorithm; the resulting GIF files are larger than usual, but are readable by all standard GIF decoders.

We are required to state that "The Graphics Interchange Format" is the Copyright property of CompuServe Incorporated. GIF(sm) is a Service Mark property of CompuServe Incorporated."

T-Kernel License

This product uses the Source Code of T-Kernel under License granted by the T-Engine Forum(www.t-engine.org)

This License Agreement is for copyrights and the terms and conditions of use applicable to the source code of T-Kernel distributed by T-Engine Forum and any derivative work created therefrom.

Article 1. Scope of License Agreement

1. This License Agreement sets forth copyrights and the terms and conditions of use applicable to the source code of T-Kernel distributed by T-Engine Forum and any derivative work created therefrom.

Article 2. Definition

2. "T-Kernel" means a real-time operating system controlled and distributed by T-Engine Forum on behalf of the copyright holder thereof.

3. "Source Code" means a source program, including related comments and documents, for the T-Kernel and the Ported Source Code defined in Article 2.8, which is registered with T-Engine Forum.

4. "Hardware-dependent Part" means the part of the Source Code which depends on hardware and needs to be changed when the Source Code is ported and targeted on the hardware, and is designated and separated as such part.

5. "Compiler-dependent Part" means the part of the Source Code which depends on compiler and needs to be changed when the Source Code is ported and targeted on the hardware, and is designated and separated as such part.

6. "Header File" means the part of the Source Code which contains definitions necessary to develop application programs.

7. "T-Engine Hardware" means the hardware which is manufactured in accordance with the T-Engine Hardware specifications or the μT-Engine Hardware specifications issued by T-Engine Forum, and registered with T-Engine Forum.

8. "Similar Hardware to T-Engine Hardware" means any hardware (including software which emulates hardware) other than that defined in Article 2.6 above, on which the T-Kernel can be operated.

9. "Ported Source Code" means a source program produced from the Source Code by modifying only its Hardware-dependent Part and/or Compiler-dependent Part to enable it to be operated on the T-Engine Hardware or the Similar Hardware to T-Engine Hardware. The Ported Source Code which is registered with T-Engine Forum shall be included in the Source Code.

10. "Binary Code" means an executable code form which is created by compiling programs, which include all or part of the Source Code or the Modified Source Code.

11. "Derivative Work" means the Modified Source Code or the Binary Code.

12. "Embedded Product" means any product which operates with executable code form of the Source Code, the Modified Source Code or the Binary Code loaded on its Hardware.

14. "System Developer" means any person who develops the Embedded Product by itself or has a third party develop the same, and provides, whether with or without payment, the End User with the Embedded Product.

15. "Distributor of Modification" means any person who produces the Modified Source Code and, whether with or without payment, distributes the same to any third party.
16. "Patch for Modification" means a difference, program, system, or the like in order to create the Modified Source Code from the Source Code or the Binary Code thereof.

17. "Vicarious Execution of Patch Processing" means vicarious execution service to create the Modified Source Code applying the Patch for Modification to the Source Code or the Binary Code thereof.

19. "Distribution" means any of the following acts:
   1. to transmit a work to a large number of specific persons through the Internet communication, broadcasting, and the like;
   2. to transmit a work to the general public through the Internet communication, broadcasting, and the like automatically in response to a request from the public; and
   3. to distribute a copy of a work to the general public or a large number of specific persons.

Article 3. Copyright

1. The copyrights of the Source Code shall be owned by Ken Sakamura.

Article 4. License of Source Code

1. As provided for in this Article, T-Engine Forum shall provide, and grant a license to use, the Source Code free of charge to any person who has taken the necessary procedure for registration as prescribed by T-Engine Forum and agreed to the T-License.

3. In accordance with the license granted under Article 4.1 above, the Source Code User may perform the following acts:
   1. to copy and/or modify the Source Code provided by T-Engine Forum hereunder for its own research, development, and the like;
   2. to run the Source Code provided by T-Engine Forum hereunder for its own research, development and the like;
   3. to run the Source Code modified in accordance with the provision of Article 4.3 (1) above for its own research, development and the like;
   4. to distribute the Binary Code created from the Source Code provided by T-Engine Forum hereunder or from the Source Code modified in accordance with the provision of Article 4.3 (1) above;
   5. in accordance with the license granted under Article 4.1 above, the System Developer may perform the following acts:
      1. to perform any and all acts set forth in the Article 4.3 above.
      2. to develop and manufacture the Embedded Product containing the Binary Code, and, whether with or without payment, provide the End User with the same and make the Binary Code available to the End User on the Embedded Product.

5. The Source Code User and the System Developer shall be obligated to give a notice that the Source Code is used, in such a way as separately specified by T-Engine Forum, when they use the Source Code or the Binary Code, or make the Binary Code available for the End User on the Embedded Product.

Article 5. Distribution of Modified Source Code

1. Any of A- members of T-Engine Forum may become the Distributor of Modification by obtaining the approval of T-Engine Forum through the registration procedure as prescribed by the Forum provided that only the department of the A-member which has taken the registration procedure may distribute the Modified Source Code in such a way as provided for in this Article as long as it holds the Authorship.

2. The Distributor of Modification may create the Modified Source Code based on the Source Code provided by T-Engine Forum and the Patch for Modification to be applied to create such Modified Source Code from the Source Code.

3. The Distributor of Modification shall, prior to the distribution, inform T-Engine Forum of and register a name and description of the Modified Source Code in such a way as specified by T-Engine Forum.

4. The Distributor of Modification shall determine the name of the Modified Source Code subject to the rules separately established by T-Engine Forum and publish an appropriate notice as required by the rules on the Patch for Modification and the Modified Source Code.

5. The Distributor of Modification may distribute the Modified Source Code to a third party, whether with or without payment, provided that the Distributor of Modification shall take the necessary measures to prohibit the third party from making the re-Distribution of the Modified Source Code.

6. Developer with the Patch for Modification. Provided, however, that the Distributor of Modification shall be obligated to confirm that the System Developer is the Source Code User duly licensed under Article 4.1.

7. The Distributor of Modification may perform the Vicarious Execution of Patch Processing for the System Developer.

8. The System Developer shall not distribute the Modified Source Code in further modified form to any third party as a stand-alone software product.

9. The System Developer may, under the same obligation as imposed in Article 4.5, make the Embedded Product available for the End User through use of the Patch for Modification distributed by the Distributor of Modification or the Derivative Works obtained through the Vicarious Execution of Patch Processing.

Article 6. Distribution and Registration of the Ported Source Code

1. The Source Code User and the System Developer may, whether with or without charge, distribute to any third party only the following parts of the Ported Source Code on the T-Engine Hardware or the Similar Hardware to T-Engine Hardware:
   1. The Hardware-dependent Part and/or Compiler-dependent Part; provided that the Source Code User and the System Developer shall inform T-Engine Forum of, and T-Engine Forum may publish, a method for distributing said Part(s) to third parties.
   2. The Header File; provided that the Header File shall be distributed together with the Binary Code of the Ported Source Code.
   3. Any member of T-Engine Forum may request T-Engine Forum to register and distribute, as an original source code for T-Kernel, the Ported Source Code on the T-Engine Hardware or the Similar Hardware to T-Engine Hardware.
   4. Any member of T-Engine Forum who requests the distribution mentioned in the preceding paragraph shall accede to the following conditions:
      1. The member shall confirm that the object hardware is the T-Engine Hardware or the Similar Hardware to T-Engine Hardware.
      2. The member shall provide T-Engine Forum with a complete set of operational environment for the object hardware and T-Kernel free of charge when requesting the distribution.
   5. The member shall submit test results of the Ported Source Code to T-Engine Forum when requesting the distribution.
   6. In the event that T-Engine Forum accepts the request mentioned in Article 6.2, T-Engine Forum shall register and distribute the Ported Source Code as the Source Code for T-Kernel. Provided, however, that the Ported Source Code may be treated in the same way as the Modified Source Code until the time of registration hereunder.
   7. The provision set forth in Article 3 shall apply to the Ported Source Code registered in accordance with this Article.

Article 7. Use for Other Purpose

1. Any use of the Source Code, the Modified Source Code or the Ported Source Code other than those stipulated in Articles 4, 5 and 6 shall be subject to the prior approval of T-Engine Forum.

Article 8. Limited Warranty

1. T-Engine Forum and the copyright holder of the Source Code warrant that the Source Code does not infringe third party's copyrights. Provided, however, that T-Engine Forum and the copyright holder of the Source Code make no warranty as to the Hardware-dependent Part and/or Compiler-dependent Part set forth in Article 6.2 in the Ported Source Code by any third party.

3. Neither T-Engine Forum nor the copyright holder of the Source Code warrants that the Source Code does not infringe any third party's industrial property rights. In no event shall T-Engine Forum and the copyright holder of the Source Code be liable for any dispute which may arise between the Source Code User and a third party in connection with the third party's industrial property rights.

Article 9. Indemnity

1. Neither T-Engine Forum nor the copyright holder of the Source Code shall be liable for any damages (including, but not limited to, damages resulting from loss of profit, business interruption, loss of business information or any other pecuniary damage) arising out of use or impossibility of use of the Source Code, even if T-Engine Forum and the copyright holder have been informed of the possibility of such damages.

Article 10. Breach of Agreement

1. In case that T-Engine Forum considers that this License Agreement is breached or that the popularization of T-Kernel is obstructed, T-Engine Forum shall take measures to correct such breach or such obstruction, take measures on the ground of copyright infringement, or take any other necessary measures against the breaching person or the obstructing person, regardless of whether or not the said person is a member of T-Engine Forum.

2. In case of breach of this License Agreement by a member of T-Engine Forum, T-Engine Forum may take appropriate measures against the member; for example, the member is disqualified from membership, depending on what kind of breach has been committed by it.

3. Any legal dispute which may arise in relation to any breach of this License Agreement shall be subject to the exclusive jurisdiction of the Tokyo District Court.

Article 11. Governing Law and Language

1. This License Agreement shall be governed by and interpreted under the laws of Japan.

2. This License Agreement is executed in both Japanese text and English text provided that the Japanese text shall govern the interpretation and performance of this License Agreement.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

   "License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

   "Licensee" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

2. Grant of License.
“Legal Entity” shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, “control” means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

“Your” or “You” shall mean an individual or Legal Entity exercising permissions granted by this License.

“Work” shall mean the work of authorship, including the original version of the Work and any modifications or additions to that Work by any Developer. "Work" may also mean any derivative work(s) that You modify or create and in which You modify or alter the Work in any way.

Redistributions of Source Code must retain the above copyright notice, this list of conditions and the following disclaimer.

Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

Correct Disposal of This Product (Waste Electrical & Electronic Equipment) (Applicable in the European Union and other European countries with separate collection systems)

This marking on the product, accessories or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources.

Correct disposal of batteries in this product (Applicable in the European Union and other European countries with separate battery return systems.)

This marking on the battery, manual or packaging indicates that the batteries in this product should not be disposed of with other household waste at the end of their working life. Where marked, the chemical symbols Hg, Cd or Pb indicate that the battery contains mercury, cadmium or lead above the reference levels in EC Directive 2006/66. If batteries are not properly disposed of, these substances can cause harm to human health or the environment.

To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system.
