Registration

Auto Search for Devices

When the smartphone and the device are connected to the same Wi-Fi network
1. The list of devices that have been found will appear automatically.
2. Enter the ID and the password, and click <OK>.
   - Devices that use the same ID and password can be added immediately.
3. Adding devices is complete.

Adding Devices Manually

1. Click the manual button.
2. Enter the connection information, and click <OK>.
3. Adding devices is complete.

Adding Devices using a QR Code

When the device has a QR code sticker attached
1. Click the QR code item.
2. Scan the QR code of the device with the smartphone.
3. Adding devices is complete when the QR code of the device has been identified.
XXX-0000 - CAM01

When double-tapped, it will switch to 1-channel mode.

Split screen 1, 4, 9, 16

Change channel

Add to My Channels
(It will be displayed on the top of the channel list.)

It is added to My Channels when the button [ ] on the bottom of the live main channel is clicked, and it will be displayed on the top of the channel list.
1-Channel Mode Screen and Button Description

PTZ Mode

Fisheye Mode
1. Move to the channel list by clicking [ ] on the top right of live monitoring.
2. Channel list can be searched when [ ] on the top right of the channel list screen is clicked.

Press the button to move to the corresponding function.

Adding New Devices

Modify Channel Information

When editing/deleting the connection information
Select the channel (thumbnail tile) if using the Camera.
Select the device name if using NVR.
SEARCH & PLAYBACK

Moving to the Playback Screen

- From the Menu Button
- In Live Monitoring screen

Searching by Date/Time and Event

- When the button is clicked, the multi-playback button and the layout change button are displayed.
- Only the dates with a saved image will be shown.

Timeline Screen Description in Detail

- Accelerated Speed Feature
- Swipe left and right to move the timeline.

Searching the Bookmark

- Align
- Edit
Event List

Appear/(Disappear)
Setting and Receiving Push Notifications

**Settings**

1. Register the QR code attached on NVR.
   - An NVR registered using a QR code can use push notifications.
2. When the registration is complete, set the `<Allow Notification>` item to `<ON>` after going to the settings screen.
3. Set the device to `<ON>` in the `<Device Setting>` item.

**Receiving Push Notifications**

1. A push event receiving screen will appear when an event occurs.
   - It can be received after the `<Allow Notification>` item has been set in the Settings screen.
   - The view can vary according to the Event Push Notifications style the user has set in the mobile terminal.
2. Click on the event in the push event receiving screen.
3. It moves to playback screen after running the app when the event is selected.

OPEN SOURCE ANNOUNCEMENT

OPEN SOURCE ANNOUNCEMENT

The Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use programs that ship with the Library, and therefore falls outside the scope of this License. Section 6 states terms for distribution of such executables.

Finally, software patents pose a threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that there is no warranty for the free library. Also, you must provide the complete corresponding source code for a work that you modify under these terms. This means that the terms permit modification of the work for the customer's own use and reverse engineering for debugging purposes.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

2. You may modify your copy or copies of the Library or any portion of it, freely linking only if the entire combination fits its criteria of freedom. This is intended to ensure that the Library is usable on a wide range of machines without restriction, at least in terms of runtime linking. However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the work only if the Library is modified, or if you have linked other free programs with the Library that are themselves derivative works. But, as a special exception, the materials licensed by this Library as a work based on the Library within the Library, and therefore falls outside the scope of this License. Section 6 states terms for distribution of such executables.

3. You may apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License is available, then you may opt to apply the terms of that version instead of version 2.) You must also modify the license notices of incorporated free software which are not covered by Section 6.)

4. You may modify the Library as a free software development project and you may freely distribute copies of the modified version as a free work, under the terms of your choice, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the modified work to carry prominent notices stating that you changed the files and describe the changes you have made.

c) You must cause the whole of the modified work to be placed at no charge to all third parties under the terms of the Library License.

d) If a facility in the modified Library refers to a function or table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs no operations other than those that would be performed when the function or table is supplied.

These requirements apply to the modified work as a whole. If sections of that work are derived from the Library, only those sections must beetus under the terms of this License, not the whole of the work.

5. You must cause all the files modified or linked with that copy to carry the notices required by this License.

OPEN SOURCE ANNOUNCEMENT

OPEN SOURCE ANNOUNCEMENT

GNU LESSER GENERAL PUBLIC LICENSE

Copyright (C) 1991, 1999 Free Software Foundation, Inc.

License. This license is designed to make software libraries, which are usually distributed as part of the executable, available under terms that are similar to a Free Software License, but which do not either require or restrict the modification and distribution of the whole Library. This License is intended to make a provision for this case, so that it is possible to use and modify the Library for ordinary operating systems, and also to permit linking of the Library with other programs.

This License is intended to make a provision for this case, so that it is possible to use and modify the Library for ordinary operating systems, and also to permit linking of the Library with other programs.

The Library is thus licensed so that the work as a whole is a "work based on the Library", even though some portions of it are not so based.

A "work based on the Library", whether verbatim or modified, that uses the Library must be distributed under this License, with the only exception being whether the whole combination fits its criteria of freedom. This is intended to ensure that the Library is usable on a wide range of machines without restriction, at least in terms of runtime linking. However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the work only if the Library is modified, or if you have linked other free programs with the Library that are themselves derivative works. But, as a special exception, the materials licensed by this Library as a work based on the Library within the Library, and therefore falls outside the scope of this License. Section 6 states terms for distribution of such executables.

Finally, software patents pose a threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that there is no warranty for the free library. Also, you must provide the complete corresponding source code for a work that you modify under these terms. This means that the terms permit modification of the work for the customer's own use and reverse engineering for debugging purposes.

You must give prominent notice of each copy of the work that you distribute. If the work is modified and shown at a public place, you must also show the modified source code, if anyone asks to see it.

As an exception to Sections above, you may also combine a link to "a work that uses the Library" with the Library to produce a work containing a portion of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must also do one of these things:

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.
End of Terms and Conditions

How to Apply These Terms to Your New Libraries

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to
which you make changes; thus the library is always free for all users.

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it
free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or,
alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the Library. It is safe to attach them to the start of each source file
that effectively changes the functioning of the Library. Any such file should also have the notice above for its own copyright
information.

The Library comes with these notices on all media from which it is distributed.

This License is designed for a wide class of的应用程序, including libraries that are considerable in one sense or another.
In particular, this License covers libraries that implement a subset of a standard interface of a non-free program, in such a
way that the library can be linked/embedded into the non-free program. The intent is to cover the library aspects of the
non-free program, not the program as a whole.

You may also distribute a copy of the Library free of charge together with
a qualified, valid, and effective open source license that permits redistribution
of the Library or an attribution notice, not excluding any license that
permits redistribution of object code or source code. When distributing
the library with the program, you must make the source code available
freely and prominently at no charge to the end users in accord with
the conditions of the attribution notice.

To apply these terms, attach the following notices to the Library. It is safe to attach them to the start of each source file
that effectively changes the functioning of the Library. Any such file should also have the notice above for its own copyright
information.
